

Contents

Sand as an archetypical natural solid	1
<i>Dimitrios Kolymbas</i>	
The Physics of Granular Mechanics.....	27
<i>Yimin Jiang, Mario Liu</i>	
Are we there yet? Following the energy trail in cohesionless granular solids	47
<i>Antoinette Tordesillas, Robert P. Behringer</i>	
Micromechanical alternatives to phenomenological hardening plasticity.....	85
<i>Itai Einav, Giang D. Nguyen</i>	
Mechanisms of localized deformation in geomaterials: an experimental insight using full-field measurement techniques	105
<i>Gioacchino Viggiani</i>	
Two-dimensional Distinct Element Method (DEM) modeling of tectonic fault growth in mechanically layered sequences	127
<i>Martin P.J. Schöpfer, Conrad Childs, John J. Walsh</i>	
When geophysics met geomechanics: Imaging of geomechanical properties and processes using elastic waves	147
<i>Stephen A. Hall</i>	
Fracture of Ice and other Coulombic Materials	177
<i>Erland M. Schulson</i>	

Experimental studies of the viscoplasticity of ice and snow ... 203
Jacques Meyssonier, Armelle Philip, Laura Capolo, Philippe Mansuy

Discontinuities in granular materials: Particle-level mechanisms..... 223
J. Carlos Santamarina, Hosung Shin

Grain Crushing, Pore Collapse and Strain Localization in Porous Sandstone..... 239
Teng-fong Wong, Patrick Baud

Long term behaviour and size effects of coarse granular media 255
E.E. Alonso, L. Oldecop, N.M. Pinyol

Nature A Very Clever Experimentalist..... 283
Gary D. Couples

Author Index..... 297
