

Table of Contents

John Mylopoulos: Sewing Seeds of Conceptual Modelling.....	1
<i>Michael L. Brodie</i>	

Foundations

Foundations of Temporal Conceptual Data Models	10
<i>Alessandro Artale and Enrico Franconi</i>	
Faceted Lightweight Ontologies	36
<i>Fausto Giunchiglia, Biswanath Dutta, and Vincenzo Maltese</i>	
The Ontological Level: Revisiting 30 Years of Knowledge Representation	52
<i>Nicola Guarino</i>	
Some Notes on Models and Modelling	68
<i>Michael Jackson</i>	
A Semantical Account of Progression in the Presence of Defaults	82
<i>Gerhard Lakemeyer and Hector J. Levesque</i>	
Social Modeling and i^*	99
<i>Eric S. Yu</i>	

Information Systems

Data Modeling in Dataspace Support Platforms	122
<i>Anish Das Sarma, Xin (Luna) Dong, and Alon Y. Halevy</i>	
Conceptual Modeling: Past, Present and the Continuum of the Future	139
<i>Nick Roussopoulos and Dimitris Karagiannis</i>	
On Conceptual Content Management: Interdisciplinary Insights beyond Computational Data	153
<i>Joachim W. Schmidt</i>	

Information Integration

Conceptual Modeling for Data Integration	173
<i>Diego Calvanese, Giuseppe De Giacomo, Domenico Lembo, Maurizio Lenzerini, and Riccardo Rosati</i>	

Clio: Schema Mapping Creation and Data Exchange	198
<i>Ronald Fagin, Laura M. Haas, Mauricio Hernández, Renée J. Miller, Lucian Popa, and Yannis Velegrakis</i>	
Heterogeneity in Model Management: A Meta Modeling Approach	237
<i>Matthias Jarke, Manfred A. Jeusfeld, Hans W. Nissen, and Christoph Quir</i>	
Associativity and Commutativity in Generic Merge	254
<i>Rachel Pottinger and Philip A. Bernstein</i>	

Web and Services

The History of WebML: Lessons Learned from 10 Years of Model-Driven Development of Web Applications	273
<i>Stefano Ceri, Marco Brambilla, and Piero Fraternali</i>	
GAMBUSE: A Gap Analysis Methodology for Engineering SOA-Based Applications	293
<i>Dinh Khoa Nguyen, Willem-Jan van den Heuvel, Mike P. Papazoglou, Valeria de Castro, and Esperanza Marcos</i>	
Web Service Composition via the Customization of Golog Programs with User Preferences	319
<i>Shirin Sohrabi, Nataliya Prokoshyna, and Sheila A. McIlraith</i>	

Software and Requirements Engineering

Dealing with Complexity Using Conceptual Models Based on Tropos	335
<i>Jackson Castro, Manuel Kolp, Lin Liu, and Anna Perini</i>	
On Non-Functional Requirements in Software Engineering	363
<i>Lawrence Chung and Julio Cesar Sampaio do Prado Leite</i>	
Reasoning About Alternative Requirements Options	380
<i>Axel van Lamsweerde</i>	
Supporting Requirements Elicitation through Goal/Scenario Coupling	398
<i>Colette Rolland and Camille Sahnesi</i>	
Enhancing Tropos with Commitments: A Business Metamodel and Methodology	417
<i>Pankaj R. Telang and Munindar P. Singh</i>	

Implementations

“Reducing” CLASSIC to Practice: Knowledge Representation Theory Meets Reality	436
<i>Ronald J. Brachman, Alex Borgida, Deborah L. McGuinness, and Peter F. Patel-Schneider</i>	
The KBMS Project and Beyond	466
<i>Vinay K. Chaudhri, Igor Jurisica, Manolis Koubarakis, Dimitris Plexousakis, and Thodoros Topaloglou</i>	
Using the ConGolog and CASL Formal Agent Specification Languages for the Analysis, Verification, and Simulation of i* Models.....	483
<i>Alexei Lapouchnian and Yves Lespérance</i>	
Author Index	505
