

Contents

Session 1: Analysis of Real Networks

Dynamics and Evolution of the International Trade Network	1
<i>Giorgio Fagiolo, Javier Reyes, Stefano Schiavo</i>	
Small World Behavior of the Planetary Active Volcanoes Network: Preliminary Results	15
<i>Giuseppe Nunnari, Giuseppe Puglisi, Alessandro Bonforte, Alessandro Spata</i>	
Correlation Patterns in Gene Expressions along the Cell Cycle of Yeast	23
<i>Jelena Živković, Marija Mitrović, Bosiljka Tadić</i>	

Session 2: Community Structure

Detecting and Characterizing the Modular Structure of the Yeast Transcription Network	35
<i>Alexandre S. Cristino, Roberto F.S. Andrade, Luciano da F. Costa</i>	
Finding Overlapping Communities Using Disjoint Community Detection Algorithms	47
<i>Steve Gregory</i>	
Discovering Community Structure on Large Networks Using a Grid Computing Environment	63
<i>Dario Fiumicello, Alessandro Longheu, Giuseppe Mangioni</i>	

Finding Community Structure Based on Subgraph Similarity	73
<i>Biao Xiang, En-Hong Chen, Tao Zhou</i>	

Session 3: Network Modeling

Structural Trends in Network Ensembles	83
<i>Ulrik Brandes, Jürgen Lerner, Uwe Nagel, Bobo Nick</i>	
Generalized Attachment Models for the Genesis of Graphs with High Clustering Coefficient	99
<i>Jens Gustedt</i>	
Modeling Highway Networks with Path-Geographical Transformations	115
<i>Paulino Ribeiro Villas Boas, Francisco Aparecido Rodrigues, Luciano da Fontoura Costa</i>	

Session 4: Network Dynamics

Simplicial Complex of Opinions on Scale-Free Networks	127
<i>Slobodan Maletić, Milan Rajković</i>	
An Axiomatic Foundation for Epidemics on Complex Networks	135
<i>Paul Loya, Adam R. Lucas</i>	
Analytical Approach to Bond Percolation on Clustered Networks	147
<i>Sergey Melnik, James P. Gleeson</i>	

Session 5: Applications

Order-Wise Correlation Dynamics in Text Data	161
<i>Masatoshi Funabashi, David Chavalarias, Jean-Philippe Cointet</i>	
Using Time Dependent Link Reduction to Improve the Efficiency of Topic Prediction in Co-Authorship Graphs	173
<i>Susanne Hoche, David Hardcastle, Peter Flach</i>	
Fast Similarity Search in Small-World Networks	185
<i>Kazuo Aoyama, Kazumi Saito, Takeshi Yamada, Naonori Ueda</i>	

**Detection of Packet Traffic Anomalous Behaviour via
Information Entropy** 197
Anna T. Lawniczak, Hao Wu, Bruno N. Di Stefano

**Identification of Social Tension in Organizational Networks:
Relating Clan/Clique Formation to Social Tension** 209
Ben Collingsworth, Ronaldo Menezes

Author Index 225
