

Table of Contents

Foreword	1
<i>Michiel Doorman, Katja Maaß</i>	
1. Educating the educators – about the conference series	3
<i>Elena Schäfer</i>	
2. Conference hosts ETE IV	
<i>Michiel Doorman, Elena Schäfer, Sabine Mickler</i>	
MOST (Meaningful Open Schooling Connects Schools To Communities)	6
The International Centre of STEM Education Freiburg.	8
The Freudenthal Institute at Utrecht University	10
ICSE Consortium	12
Naturalis Biodiversity Centre	14
3. STEM and open schooling for sustainability education using the example of the Horizon 2020 project MOST	15
<i>Sabrina Deck, Sabine Mickler</i>	
4. Keynotes	
Learning our way out of systemic global dysfunction: Rethinking STEM education in the Capitalocene	21
<i>Arjen Wals</i>	
School-community projects as keys to sustainability education in the STEM domains	28
<i>Marta Romero-Ariza</i>	
5. Conference outcomes and conclusions	
Discussion on ‘How do we envision education-oriented communities to stand up for sustainability?’	31
<i>Jesper Boesen, Elena Schäfer</i>	
6. MOST policy seminar	
Opening up school education: Ways to support schools on their path to institutional change	37
<i>Sabine Mickler, Gultekin Cakmakci</i>	
7. MOST Fair	40
<i>Ragnhild Staberg, Monica Wijers, Sanne Korte, Lucas Weinberg</i>	
8. Papers	
A key-competence approach to teaching standard topics in STEM.	42
<i>Michiel Doorman, Željka Milin Šipuš, Andrej Šorgo, Annette Lykknes, Lucas Weinberg, Martin Bilek, Katja Maass</i>	
A professional development session on environmental socio-scientific issues and its impact on prospective mathematics teachers’ task designs	48
<i>Katerina Bogiatzi, Chrissavgi Triantafyllou, Maha Farah, Vasiliki Spiliotopoulou, Despina Potari, Giorgos Psycharis</i>	

Analysing the perception of families of a virtual open school-community project on climate change	55
<i>Julia Gracia, Jorge Alcántara-Manzanares, Jerónimo Torres-Porras</i>	
CYANce: Climate Creativity – Youth for Alpine Needs establishing a sustainable co-creative climate lab and launching an “education-research-industry” network for co-creation and inquiry-based-learning in Tyrol	59
<i>Elisabeth Lukasser-Vogl, Bettina Larl-Zögernitz, Vanessa Färber</i>	
Challenging girls to engage in STEM activities in the context of an online summer school	62
<i>Eleni Kli, Giorgos Psycharis, Maria Vasilopoulou</i>	
Context-based teaching for students’ sustainability consciousness	69
<i>Hanne Valde Thu, Ragnhild Lyngved Staberg, Maria Febri, John Magne Grindeland, Jan Tore Malmø</i>	
Changes of components of reflection and practice of novice facilitator in context of co-designing mathematical trails	75
<i>Janka Medová, Sílvia Haringová</i>	
Development of STEM education in KUSH: Task design for inquiry-based learning through Lesson Study	78
<i>Minoru Ohtani</i>	
Educating the educators: An innovative M.Ed. program in integrative STEM education incorporating open schooling principles	84
<i>Noa Ragonis, Daphne Goldman, Osnat Dagan</i>	
FLEBOCOLLECT: STEM education and citizen science project	93
<i>A. Bermejo, A. Mora-Urda, M. López de Felipe, D. Bermúdez-Rochas, L. del Álamo, R. Gálvez</i>	
Fostering learning on sustainability: Plastic soup with escape boxes.	96
<i>Alice Veldkamp, Sanne Korte</i>	
Girl empowerment in STEM education by means of summer camps	104
<i>Josette Farrugi, Maria Evagorou, Dita Kreuz, Vincent Jonker, Oliver Straser</i>	
Hands-on commodity science	110
<i>Susanne Gruber</i>	
Healthy beverages factory. Integrated STEAM project for primary school	117
<i>Juan Fraile, María Antonia López-Luengo</i>	
How does the CriThiSE PD-model support teachers in implementing critical thinking in sustainability education at upper primary school?	122
<i>Ragnhild Lyngved Staberg, Eldri Scheie, Niklas Gericke</i>	
How outdoor learning can support STEM and sustainability education in initial teacher training.	129
<i>Christina Wolf, Luana Monti Jermini</i>	
Integrated STEAM practice in teacher training: Get to know your rubbish	134
<i>María Antonia López-Luengo, Belén Palop</i>	

Integrated STEM professional development in interdisciplinary teacher design teams: Teacher self-efficacy profiles using cluster analysis	140
<i>Sepe Hermans, Natacha Gesquiere, Francis Wyffels, Peter van Petegem</i>	
Mathematical modelling for critical citizenship	148
<i>Jimbo Juanito B. Villamor, Catherine P. Vistro-Yu</i>	
Methods of increasing the attractivity of the teacher-profession for pre- and in-STEM teachers through professional development and career advice	157
<i>Oliver Straser, Barbara Degenhart</i>	
Open maths meets sustainability	160
<i>Marloes van Hoeve, Greg Alpár</i>	
PATIS BIODIVERS: Engaging elementary students in authentic inquiry to improve the biodiversity of their schoolyard	168
<i>Arnau Amat, Chadia Rammou</i>	
Promoting teacher competencies towards sustainability conducted through STEAM interventions in IndagaSTEAM escuela project	173
<i>T. Lupion-Cobos, M. Alarcon-Orozco, C. Lechuga-Jimenez</i>	
Roles, practices and competencies of STEM-teacher educators	178
<i>Sarah-Maria Rotschnig, BA BA MA, Assoc. Prof. Mag. Dr. Stefan Zehetmeier</i>	
Subject matter didactics for connections between the components of STEM	182
<i>Hannes Stoppel</i>	
Sustainability-related personal values of pre-service biology teachers	190
<i>Virginia Deborah Elaine Welter, Moritz Krell</i>	
The field work concept in STEM education – International students’ perspectives and expectations before an Erasmus+ course about climate change	194
<i>Bouke van Gorp, Jardar Cyvin, Martina Calovi, Jakob B. Cyvin</i>	
The implementation of school-community-projects and the effects on students’ sustainability consciousness	202
<i>Mirte W. Linthorst, Sanne Korte, Michiel Doorman</i>	
Use of new technologies for the challenges of the future	205
<i>Mathias Klaus Kirf, Stephanie Eugster</i>
