## Preface

## Chapter 1: Wear Resistance of Structural Materials

|                                                                                                                                                                                                   |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>The Role of Thin Plies in Traditional Composite Structures Under Different Loading Conditions</b><br>T.A. Sebaey                                                                               | 3  |
| <b>Effect of Graphene Nanoplatelets on Flexural Behavior of Glass Fiber Reinforced Polymer Composites Subjected to Different Temperatures</b><br>S. Tudu and R. Velmurugan                        | 9  |
| <b>Effect of Number of Cycles on Surface Roughness of PPS Thrust Bearings Under Rolling Contact Fatigue in Water</b><br>S. Kajiwarra, T. Matsueda, K. Mizobe and K. Kida                          | 15 |
| <b>Wear Failure of PEEK-Alumina Ball Bearings in Dry Rolling Contact at 600 rpm - Part 1: Effect of Failure due to Wear Damage on Friction Torque</b><br>S. Matsubayashi, Y. Watanabe and K. Kida | 21 |
| <b>Wear Failure of PEEK-Alumina Ball Bearings in Dry Rolling Contact at 600 rpm - Part 2: Observation of Wear on Retainer</b><br>S. Matsubayashi, Y. Watanabe and K. Kida                         | 27 |
| <b>Controlling the Fracture Location of Capsules Using the Bonding Surface Characteristics of Photocurable Resin</b><br>J. Hu, T. Lim, H. Cheng, S.Y. Kim, Y.J. Lee and W.S. Jung                 | 35 |

## Chapter 2: Welding

|                                                                                                                                |    |
|--------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Residual Stresses of the Laser Welded Abrasion Resistant Steel Butt Joints</b><br>M. Hietala, M. Keskitalo and A. Järvenpää | 43 |
| <b>The Influence of Pipe Thickness on the Quality of Welded Joints</b><br>P.S. Minh, M. Le and H.N. Son                        | 49 |

## Chapter 3: Functional and Special Materials

|                                                                                                                                                                                                               |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Comparative Study of Optical and Chemical Properties of ZnO-Ag Composites Synthesized from Mimosa Pudica and Andrographis Paniculata Extracts</b><br>P. Raknoi, W. Chochuang and S. Sangjan                | 57 |
| <b>Effects of Electrolyte Composition on the Electrochemical Properties of an Aluminum Alloy Electrode for Al-Air Batteries</b><br>Y.W. Chung, S. Lee, W.K. Choi, C. Baeg and S.K. Jeong                      | 67 |
| <b>The Effect of Electrode Voltage on Acetylene Plasma Deposition Particles during the Preparation of PECVD Carbon Film Based on PIC-MCC Simulation</b><br>J. Che, P.Y. Yi, Y.J. Deng, L.F. Peng and X.M. Lai | 75 |
| <b>Doping Effects of Metals on Electrical Conductivity of TiO<sub>2</sub> from First-Principles Calculations</b><br>H. Sun, Z.T. Xu and D. Zhang                                                              | 83 |

## Chapter 4: Thermal Engineering

|                                                                                                                                                   |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Air Preheater Performance Analysis: Installation of Soft Seal Material to Improve Air Preheater Leakage</b><br>F.J.A. Monsanto and R. Tayactac | 91 |
|---------------------------------------------------------------------------------------------------------------------------------------------------|----|
