Introduction	XV	“Balanced” rearrangements in patients with dysmorphic syndromes compatible with autosomal chromosome aberrations	20
Determination of breakpoints	XV	Chromosome variants and their use	21
Structure of the Catalogue	XV	Origin and mechanism(s) of formation of chromosome aberrations	21
Guideline for the use of the Catalogue..	XVI	Populations cytogenetics	22
Abbreviations used in the text	XVII	Cytogenetics of spontaneous abortions	24
 Notes on Cytogenetics		 Notes on Clinical Findings in Autosomal Chromosome Aberrations	
Techniques for the detection and definition of chromosome aberrations	1	Characterization of autosomal chromosome aberrations	27
The banded human karyotype	1	Family history and pregnancy	27
Nomenclature	1	Growth	27
Application of techniques	1	Puberty and fertility	28
Prometaphase examination	3	Pattern of dysmorphic findings	28
Molecular marker analysis	3	Congenital malformations	29
Fluorescence in situ hybridization (FISH) ...	3	Radiologic skeletal abnormalities	30
Chromosome dissection and reverse painting	9	Malformation complexes, associations and syndromes associated with autosomal chromosome aberrations	30
Comparative genomic hybridization (CGH) ..	10	Chromosome aberrations and tumours	31
Spectral karyotyping	10	Chromosome aberrations in monovular twins	32
Types of chromosome aberrations	10	Motor and mental development: behaviour ..	32
Mosaicism	10	Karyotype-phenotype correlations	33
Double aneuploidy; triplication	11	 A few Notes on Clinical Findings in Sex Chromosome Aberrations.	35
Chromosome rearrangements	11	Chromosome 1	37
Robertsonian translocations	11	Monosomy	39
Reciprocal translocations	12	Deletions	39
Whole-arm translocations	14	Ring Chromosome	54
Pericentric inversions	14	Duplications	54
Paracentric inversions	15	Trisomy	74
Insertions within one chromosome	15	Uniparental Disomy	75
Insertions between 2 chromosomes	16	 Chromosome 2	77
Isochromosomes	16	Deletions	79
Centromere fission	18		
Meiotic rearrangements between homologues and chromatids	18		
Rearrangements between an X and an autosome	18		
Uniparental disomy (UPD)	19		
Increased risk for nondisjunction in offspring of carriers of balanced rearrangements? (Interchromosomal Effect)	20		

Ring Chromosome	91	Ring Chromosome	411
Duplications and Triplications	91	Duplications and Triplications	412
Trisomy	113	Trisomy	438
Uniparental Disomy	114	Uniparental Disomy	444
Chromosome 3	115	Chromosome 10	445
Deletions	117	Deletions	447
Ring Chromosome	128	Ring Chromosomes	461
Duplications and Triplications	129	Duplications and Triplications	462
Trisomy	153	Trisomy	481
		Uniparental Disomy	482
Chromosome 4	155	Chromosome 11	483
Deletions	157	Deletions	485
Ring Chromosomes	191	Ring Chromosome	503
Duplications	193	Duplications	503
Trisomy	219	Trisomy	515
Uniparental Disomy	219	Uniparental Disomy	515
Chromosome 5	221	Chromosome 12	519
Deletions	223	Deletions	521
Ring Chromosome	241	Ring Chromosome	525
Duplications and Triplications	241	Duplications and Triplications	525
Trisomy	259	Trisomy	541
Uniparental Disomy	260		
Chromosome 6	261	Chromosome 13	543
Deletions	263	Deletions	545
Ring Chromosome	273	Ring Chromosomes	566
Duplications	274	Duplications and Triplications	570
Uniparental Disomy	290	Trisomy	587
		Uniparental Disomy	597
Chromosome 7	293	Chromosome 14	599
Deletions	295	Deletions	601
Ring Chromosome	320	Ring Chromosome	605
Duplications and Triplications	321	Duplications and Triplications	607
Trisomy	335	Trisomy	615
Uniparental Disomy	337	Uniparental Disomy	618
Chromosome 8	341	Chromosome 15	621
Nullisomy	343	Deletions	623
Deletions	343	Ring Chromosomes	641
Ring Chromosome	359	Duplications and Triplications	646
Duplications and Triplications	359	Trisomy	663
Trisomy	383	Uniparental Disomy	665
Uniparental Disomy	393		
Chromosome 9	395	Chromosome 16	671
Deletions	397	Deletions	673
