

Contents

1	Conductors, insulators and semiconductors	1
2	Semiconductors.....	8
3	The junction diode.....	17
4	Other types of semiconductor diodes	24
5	The junction transistor	30
6	The basic amplifying action of a transistor	38
7	Transistor characteristics and the operating point	45
8	Transistor equivalent circuits	52
9	The frequency response of a transistor amplifier	60
10	The transistor at high frequencies	70
11	Feedback amplifiers	78
12	Operational amplifiers.....	84
13	Linear analog systems.....	93
14	The field effect transistor.....	102
15	Oscillators and signal generators	112
16	Silicon controlled rectifiers or thyristors.....	119
17	Logic circuits.....	129
18	Logic families	138
19	Flip-flops.....	146

20	Shift registers	154
21	Electronic counters.....	160
22	Semiconductor memories	168
	Answers to exercises.....	178
	Vocabulary	222
	Index	231
