

CONTENTS

Preface.....

Kurt Brück - his life and contribution to thermal physiology E. Zeisberger	1
--	----------

W. S. Feldberg - his contribution to the pharmacology of thermoregulation A. S. Milton	9
--	----------

Section I: THERMOSENSITIVITY AND NEURONAL CONNECTIVITY

Cellular and synaptic mechanisms of thermosensitivity in hypothalamic neurons J. A. Boulant	19
---	-----------

Possible implications of the plasticity of temperature-sensitive neurons in the hypothalamus Fr.-K. Pierau, J. Schenda, M. Konrad, and H. Sann	31
--	-----------

Temperature-sensitive coupling in hypothalamic and spinal neurons of the rat in vitro H. Sann, M. Konrad, U. Pehl, H. A. Schmid, Fr.-K. Pierau and E. Simon	37
---	-----------

Lamina-specific effects of nitric oxide on temperature-sensitive neurons in rat spinal cord slices U. Pehl, H. A. Schmid and E. Simon	45
---	-----------

Excitatory amino-acid effects on rat hypothalamic neurons which respond to changes in scrotal skin temperature D. C. M. Taylor, R. J. Gayton, N. P. Cross, H. E. Miley and M. J. Parton	53
---	-----------

Hibernation-related changes in the effects of neuromodulators: An in vitro study on synaptic transmission in hippocampal slices P. Igelmund, H. Spangenberg and F. Gh. Nikmanesh	59
--	-----------

Effects of cold adaptation on the modulatory action of TRH upon temperature sensitive and insensitive hypothalamic neurons of rats B. Tschentke, J. Schenda and Fr.-K. Pierau	67
---	-----------

Thermoregulatory changes after neurochemical lesions of catecholaminergic and serotonergic neurons in the lower brain stem of the guinea pig J. Jöckel and E. Zeisberger	73
Functional neuroanatomical considerations on afferent and efferent projections of the nucleus raphe magnus D. M. Hermann, P. Hinckel, P. H. Luppi and M. Jouvet	79
 Section II: HEAT PRODUCTION	
The role of adrenergic stimulation in regulation of heat production and recruitment of brown adipose tissue B. Cannon, T. Bengtsson, A. Dicker, A. Jacobsson, P. Kuusela, H. Thonberg, P. Tvrdik, J. Zhao and J. Nedergaard	87
Pharmacology and regulation of the ion channels of the brown adipocyte plasma membrane A. Koivisto, T. Ringer, U. Ruß, J. Nedergaard and D. Siemen	103
Sympathetic outflow to brown adipose tissue and metabolic heat production in adult, aged, and cold-acclimated adult mice M. I. Talan and S. A. Kirov	109
Effects of female sex steroids in thermogenic tissues M. Puerta, M. P. Nava, M. Abelenda and A. Fernández	115
Effect of tumor necrosis factor on the lipoprotein lipase gene expression in brown adipocytes differentiated in culture Y. Uchida, K. Irie, F. Tsukahara, K. Ohba, T. Nomoto and T. Muraki	121
Ethanol and brown adipose tissue thermogenesis in rats exposed to cold: Uncoupling protein m-RNA P. Huttunen, M. Sämpe and R. Myllylä	129
An artificial intelligence approach to selectively search, analyze, and display thermoregulatory data T. J. Malkinson, K. E. Cooper, W. L. Veale and Q. J. Pittman	133

Section III: ADAPTATION

Beneficial and detrimental effects of thermal adaptation J. Werner	141
Altered responsiveness of cold-adapted rats to thermal stress M. Székely, M. Balaskó and Z. Szelényi	155
Acclimation of aged rats to cold Y. Asaki and M. Iriki	161
Avian thermoregulation during the perinatal period N. Nichelmann, B. Lange, R. Pirow, J. Langbein and S. Herrmann	167
Norepinephrine-induced phase shifts of the juvenile circadian core temperature rhythm in rat pups B. Nuesslein-Hildesheim and I. Schmidt	175
The effects of circadian rhythm and change in ambient temperature on body temperature in aged male rats D. Shemi and J. Kaplanski	181
Diurnal variations in response of golden spiny mice (<i>Acomys russatus</i>) to noradrenaline injection N. Krönfeld, N. Zisapel and A. Haim	185
Daily rhythms of body temperature in coexisting rodents of the genus <i>Acomys</i> acclimated to long-photoperiod: Effects of ethanol and melatonin A. Haim and N. Zisapel	191
Circadian rhythm in the snail <i>Helix pomatia</i> L. during estivation and hibernation W. Wünnenberg	197
Heat acclimation alters portal blood flow during heat stress W. Haddad and M. Horowitz	203
Functional evidence of vasomotor control by tachykinins in the heat dissipating tissues of the canine nose and face T. Ikeda and K. Pleschka	209

Vascular receptors involved in effect of neuropeptide-Y (NPY) on peripheral blood flow in the rat foot and tail M. E. Heath	215
Comparison of cortisol production by isolated adrenal cells from syrian hamsters and guinea-pigs at different incubation temperatures R. Werner and R. Reimer	221
Hibernation and cold adaptation induce different changes in the body temperature regulation in the golden hamster B. Stefl	227
 Section IV: THERMAL BALANCE IN THE CLINIC	
Basic aspects of fetal thermal homeostasis H. J. Schröder and G. G. Power	235
Thermoregulation and heat balance: General anesthesia D. I. Sessler	251
Alteration of heat dissipation by diabetes insipidus in humans R. Behr, Ch. Dietrich and K. Brück	267
Does intraoperative core hypothermia increase the incidence of surgical wound infections and prolong hospitalization? A. Kurz, D. I. Sessler, R. Lenhardt, E. Narzt, G. Huemer and F. Lackner	277
Hyperthermia following hypothermic cardiopulmonary bypass does not correlate with postoperative endotoxemia H. Schmidt, H. Böhler, J. Motsch, R. Urbaschek and E. Martin	283
Sweating and vasoconstriction thresholds during propofol sedation K. Leslie, D. I. Sessler, A. R. Bjorksten, M. Ozaki, M. Schroeder and S. Lin	287
Epidural anesthesia increases apparent leg temperature and decreases the shivering threshold M. Ozaki, T. Emerick, D. I. Sessler, K. Walters and M. Schroeder	293
Heat balance and distribution during epidural anesthesia J. M. Hynson, D. I. Sessler, B. Glosten and J. McGuire	299

Epidural and spinal anesthesia alter thermoregulatory response thresholds

- M. Schroeder, M. Ozaki, A. Kurz, D. I. Sessler, R. Lenhardt, A. Moayeri,
K. M. Noyes, E. Rotheneder, M. Kurz 305

Circadian rhythms of body temperature in patients with anorexia nervosa, hypothermia and hypophosphatemia

- S. Yoshiue, T. Kanamori, H. Sekine, A. Maeda, M. Ishida, J. Ogata and
T. Kato 311

Circadian rhythms of hot flashes and body temperature in menopausal women

- R. Freedman, D. Norton, S. Woodward, G. Cornélissen and F. Halberg 317

Cardiovascular and adrenergic manifestations of cold stress

- S. M. Frank, S. N. Raja, L. A. Fleisher, C. Beattie, M. S. Higgins and
M. J. Breslow 325

Adrenergic modulation of the surge in tail skin temperature induced by LHRH and 2 deoxyglucose

- M. J. Katovich, G. Strubbe and B. E. Wright 333

Section V:

FEVER AND ANTIPYRESIS

Fever and antipyresis

- M. J. Kluger 343

Selective brain cooling during fever?

- G. Kuhnen 353

Cytokine levels during the early phase of the endotoxin fever

- L. Janský, S. Vybíral, D. Pospíšilová, J. Roth, J. Dornand, E. Zeisberger and
J. Kamínková 359

Glucose homeostasis in fevers induced by two doses of bacterial endotoxin (LPS), interleukin-1 β (IL-1 β) or tumor necrosis factor- α (TNF α) administered 24 hours apart

- A. Höche and W. Riedel 363

Endotoxaemia is normally a limiting factor in heat tolerance

- J. R. S. Hales and M. Nagai 369

The effect of exo- and endopyrogens on serotonin metabolism in the nucleus raphe dorsalis of the rat H. W. Clement, C. Ruwe, D. Gemsa and W. Wesemann	373
Effects of LPS and inhibitors of eicosanoid synthesis on short term fever response and production of hypothalamic PGE₂ J. Kaplanski, L. Abramovich and V. Fraifeld	379
Prolonged "slight" fever in rats induced by administration of Freund's complete adjuvant: Effects of indomethacin and NO-related drugs I. N. Semenenya, A. V. Gourine and V. N. Gourine	385
Ventral septal AVP release in the febrile hypertensive and normotensive rat M. L. Earle, T. Horn, N. Kasting, R. Landgraf and Q. J. Pittman	391
Hyperosmotic stimulation of the hypothalamic paraventricular and supraoptic nuclei alters body temperature in the normothermic and febrile rat T. Horn, T. J. Malkinson, Q. J. Pittman and R. Landgraf	397
Effects of immobilization on febrile, neuroendocrine and immunological responses in guinea pigs E. Zeisberger and J. Roth	403
Modifications of febrile temperature regulation by acclimation U. Beckmann and J. Werner	409
V₂-receptor-mediated hyperpyretic effect of arginine vasopressin in the ventral septal area of the rabbit brain A. A. Romanovsky, L. Janský and V. N. Gourine	415
Contribution of hypothalamic supraoptic nucleus (SON) to endogenous antipyresis in guinea pigs M. Bock, J. Roth and E. Zeisberger	421
Peripheral administration of the opiate antagonist naloxone attenuates the febrile response to polyinosinic:polycytidylic acid A. S. Milton, N. C. Eastmond and J. Davidson	427

Section VI: PHARMACOLOGICAL ASPECTS

Endogenous opioids and fever	
C. M. Blatteis and A. A. Romanovsky	435
Interaction between neurotensin and selective opioid agonists modulates body temperature in the rat	
C. M. Handler, D. J. Mondgock, E. A. Bradley, E. B. Geller and M. W. Adler ...	443
Thermoregulatory and cardiovascular effects of ONO-3144 in the rabbit	
M. J. Dascombe	449
Effect of a non-peptide angiotensin II receptor antagonist on the elevated blood pressure of cold-exposed rats	
M. J. Fregly, Z. Sun and J. R. Cade	455
Neuroprotective effects of an extract of Ginkgo biloba (EGb-761) in heat stress induced brain damage in the rat	
H. S. Sharma, J. Westman, F. Nyberg, J. Cervós-Navarro and P. K. Dey	461
Is the hypothalamic serotonergic system involved in septal 5-HT-induced hypothermia in rats?	
L. C. H. Wang, Y. Cui and T. F. Lee	469
Hypothalamic cooling induced by chronic antidepressant drugs in syrian hamsters	
W. C. Duncan, Jr., K. A. Johnson and T. A. Wehr	475
Thermoregulatory effects after intracerebroventricular injections of Wu-chu-yu extracts in rats	
T. F. Lee, T. H. Tsai, C. F. Chen and L. C. H. Wang	481
Nitric oxide modulates thermoregulatory effector mechanisms in the conscious rabbit	
R. Gerstberger, H. Hjelmqvist and R. Keil	485
Does central nitric oxide play a role in thermoregulation?	
A. V. Gourine	491
Hypothermia and social behaviour in mice	
J. W. G. M. Thuring and E. Schönbaum	497

Pharmacological analysis of anticholinesterase-induced hypothermia and hyperthermia

C. J. Gordon **503**

Thermoregulatory considerations affecting both acute and prolonged exposures to ozone in rodents

W. P. Watkinson, M. J. Wiester, J. W. Highfill, A. A. Aileru, M. J. Campen,
J. S. Tepper and D. L. Costa **509**

Keyword index **515**

Author index **521**
