ACKNOWLEDGEMENTS	1
GENERAL REMARKS	7
Abbreviations	7
Field research and related projects	9
Conventions	9
I. INTRODUCTION	11
1. Research topics	14
2. Research questions	15
3. Methods of survey	15
4. Research methods	16
4.1 Documentation	16
4.2 Laboratory methods	17
4.2.1 Grain size analysis (GSA)	17
4.2.2 Grain shapes	17
4.2.3 Bulk mineral analysis (BMA) by XRD	17
4.2.4 Clay mineral analysis (CMA)	18
4.2.5 Simultaneous Thermo Analysis (STA)	18
4.2.6 Infrared Spectroscopy (IRS)	19
4.2.7 Sample colours	19
4.2.8 Shrinkage tests and determining the drying shrinkage	19
4.2.9 Point load tests	19
4.2.10 Hardness tests according to Vickers	20
4.2.11 Plasticity tests ('Atterberg limits')	20
4.2.12 Coefficient for the activity	20
4.2.13 Clay additives	20
4.2.14 Method of desludging	20
5. Origin of the samples	22
6. Geology and tectonic aspects of the Himalayas	24
6.1 Geology of the Himalayas	24
6.2 Tectonic plates	28
6.3 Geological aspects with reference to the chapters II, III and IV	28
6.3.1 Chapter II	28
6.3.2 Chapter III	28
6.3.3 Chapter IV	29
6.3.4 Palaeolakes	29

II. MINERAL TRADITIONS AT THE NYARMA MONASTERY IN LADAKH	33
1. Material aspects of the Nyarma Monastery	36
1.1 Clay pits and new bricks	39
1.2 Historical adobe bricks	41
1.3 Plasters	42
1.3.1 On the burnishing of plasters	43
1.3.2 Layers of plasters	45
1.4 The method of desludging	48
2. Research questions	51
3. Origin of the samples	51
4. Mineral analysis	53
4.1 Clay pits	53
4.2 New adobe bricks	56
4.3 Historical adobe bricks	59
4.4 Interior wall plasters	63
4.4.1 Wall plasters in the <i>cella</i> of the main temple	63
4.4.2 Wall plasters in the assembly hall	72
4.4.3 Wall plaster in Temple IIIa	75
4.4.4 Wall plaster in Temple IV	76
4.4.5 Wall plaster in the side Temple V south of the assembly hall	80
4.4.6 Wall plasters in an accessible stupa in the monastery compound	82
4.4.7 Modelled wall frieze in an accessible stupa	86
4.4.8 Clay modelled aureoles	87
4.5 Exterior wall plasters	90
4.5.1 Wall plaster in the inner ambulatory	90
4.5.2 Wall plaster in the outer ambulatory	92
4.6 Results of mineral analysis given in tables	97
5. Further material analyses	103
5.1 Plasters	103
5.1.1 Quality of surfaces	103
5.1.2 Burnishing of plasters	106
5.1.3 REM investigation of burnished surfaces	111
5.2 Method of desludging	115
5.2.1 Reconstruction on the site	115
5.2.2 Laboratory analysis	116
5.2.3 Comparison with original plaster samples	127
6. Conclusion	129
 III. ARGA STONE ROOF CONSTRUCTION	 139
1. Himalayan flat roof constructions	139
1.1 General aspects of Himalayan flat roofs	140
1.1.1 Subconstruction of flat earth roofs	144
1.2 Flat earth roofs	145
1.2.1 Insulation layer	147
1.2.2 Layers of clay	152

1.3 <i>Arga</i> stone roofs	155
1.3.1 Ramming	158
1.3.2 Smoothing and burnishing	162
1.3.3 Today's meaning of an <i>arga</i> roof	166
2. Research questions	167
3. Origin of the samples	168
4. Mineral analysis	169
4.1 Central Tibet	169
4.2 West Tibet	176
4.3 Ladakh	178
4.4 Zangskar	179
4.5 Results of mineral analysis given in tables	181
5. Material analysis	182
5.1 The effect of crushing and grinding the <i>arga</i> on its crystal structure	182
5.2 The <i>arga</i> surface	183
5.3 Vickers needle tests	188
5.4 Point load tests	190
6. Analysis of the construction	191
6.1 A materially intermeshing structure and a burnished surface	191
6.2 Hydraulic properties	192
7. Conclusion	193
 IV. <i>MARKALAK</i> CLAY	 199
1. Origin of the samples	202
2. Research questions	205
3. Properties of the studied clay	206
3.1 Spituk	206
3.2 Analyses of Spituk samples	214
3.2.1 Shrinkage tests according to DIN 18952	214
3.2.2 Testing the plasticity according to DIN 18122	215
3.2.3 Coefficient for the activity	217
3.2.4 Hardness of the sample according to Vickers	217
3.3 Alchi	218
3.4 Lamayuru	223
3.5 Basgo	227
3.6 Shey	231
3.7 Nako	236
3.8 Shelkhar	238
3.9 Khorchag	242
3.10 Results of mineral analysis given in tables	245
4. <i>Markalak</i> clays and marine clays	248
4.1 Comparative material	251
5. Conclusion	252

V. SUMMARY AND FUTURE PERSPECTIVES	261
1. Summary	261
2. Future perspectives	263
 VI. APPENDIX CHAPTER II	 265
 VII. APPENDIX CHAPTER III	 309
 VIII. APPENDIX CHAPTER IV	 329
 IX. BIBLIOGRAPHY	 363
 X. LIST OF ILLUSTRATIONS	 377
