Preface xv  
Committees xvi

## PLENARY CONFERENCES

**Review of Flow Visualization Techniques for Unsteady Flows, M. Gad-el-Hak 3**  
**Flow Visualization Techniques Applied to Full Scale Vehicles, J.P. Crowder 15**  
**Moving Shock Waves in Transonic Flows, W. Frank 25**  
**Microholography – A Reference Method for the Study of Small Particles, H. Royer 37**

## 1. OPTICAL TECHNIQUES

**Deflection Mapping of Flames Using Sinusoidal Gratings, E. Bar-Ziv and S. Sgulim 45**  
**Identification of Regular Disturbances in Turbulence by a Modified Schlieren Method, M.R. Davis 51**  
**A Technique of Holographic Visualization to Flow Fields of a Model with Variable Angles of Attack, W. Xingyuan 57**  
**The Holography of High Speed Particles and Data Processing, Y. Ge, Z. Zhao-wen, J. Yuan, C. Chun-kun, S. Sou-chang, X. Lei and L. Chao-jie 61**  
**Laser Shadowgraphy and Holographic Interferometry for Visualizing Thermal Convection Induced by Direct-Contact Evaporation of Liquid Lenses, T. Nosoko, S. Endo and Y.H. Mori 67**  
**Two-Wavelength Holographic Interferometry for Ionised Media Studies, J. Surget, G. Dunet, J. Fort and J.B. Caucheteux 73**  
**Interfacial Turbulence in Evaporating Sessile Drops by a Combined Shadowgraph-Schlieren Method, T. Uemura and W.-J. Yang 79**

**Shock Tube Experiments with Grating Interferometer, L.L. Kolyshkina and E.F. Zhigalko 85**

**A Review of Some Visualization Experiments Carried Out at the ISL Shock Tubes, F. Srulijes and F. Seiler 91**

**3-D Flow Visualizations by Means of Laser Beam Sweeps, J.-P. Prenel, R. Procar and G. Diemunsch 99**

**A Wollaston Prism Interferometer Used as a Reference Beam Interferometer, G.M. Carlomagno 105**

## **2. SPECKLE TECHNIQUES**

**Retinal Blood-Flow Visualization and Measurement by Laser Speckle Photography, A.F. Fercher and E. Roth 113**

**Visualization of the Density and the Velocity Field in an Integral Gravity Wave, U. Grtner and W. Merzkirch 115**

**Measurement of Laminar and Turbulent Density Fields by Means of Speckle Photography, R. Erbeck, W. Merzkirch and U. Wernekinck 121**

**Analysis of Non-Stationary Flows by Evaluating the Fringe Visibility in Speckle Velocimetry, W. Arnold, K. Hinsch and W. Platen 127**

**Application of Particle Imaging Velocimetry in Windtunnels, J. Kompenhans and J. Reichmuth 133**

**Speckle Method for Velocity Measurement and Visualization of Flow, M. Kawahashi, S. Toyooka, K. Hosoi and M. Suzuki 139**

## **3. OBSERVATION METHODS**

**Photochromic Flow Visualization in Liquid-Liquid Two-Phase Flow, T. McWaid, E. Marschall and G. Johnson 147**

**Flow Visualization by Photochromic Dyes: Application to the Motion of a Fluid-Fluid Interface, M. Fermigier and P. Jenffer 153**

**Quantitative Analysis of Visualizations Obtained with a Smoke Filament in a Plane Mixing Layer, J.-P. Borleteau 159**

**Flash Lamp Light Slicing, A.J. Saber, T. Abdel-Wahab and M. Georgallis 165**

**A Pulsed Light Generator for Strobe Photography, W. Hiller, H.-M. Lent, G.E.A. Meier and B. Stasicki 171**

**Simultaneous Measurements of Two-Dimensional Velocity and Pressure Fields in Compressible Flows Through Image-Intensified Detection of Laser-Induced Fluorescence, B. Hiller, L.M. Cohen and R.K. Hanson 173**

**Measurement of Velocity and Temperature Distributions in Gas Flow by the Laser-Induced Luminescence Methods, N. Nakatani and T. Yamada 179**

**Visualization of Shock Wave and Streamline Around Hypersonic Vehicle by Using Electrical Discharge, M. Nishio and T. Kimura 185**

**Flow Visualization Around Golf Balls**, Y. Nakayama, K. Aoki, K. Wada, M. Kato and T. Okumoto **191**

**Applications of the Titanium Tetrachloride Method for Flow Visualization in Aerodynamic Testing**, F. Finaish, P. Freymuth and W. Bank **197**

**Lag Motion Between the Tracer Particle and the Fluid in Flow Visualization**, M. Yano and S. Umeda **203**

**Diffusion of Smoke Behind a Line Source in Grid Turbulence**, H. Staptountzis, D.D. Stretch and R.E. Britter **210**

#### **4. IMAGE PROCESSING**

**A Digital Image Processing/Clustering Technique for Identifying Organized Wake Structures**, J.F. Keffer, M. Shokr and J.G. Kawall **217**

**Image Processing of Flow Around a Circular Cylinder by Using Correlation Technique**, I. Kimura and T. Takamori **221**

**Digital Image Processing Applied to the Statistical Study of the Mixing Zone Structure: Constraining Walls Effect**, M. Geron, D. Khelif and J.-L. Bousgarbies **227**

**Three Dimensional Analysis of Time Varying Tuft Behavior by its Successive Geometric Shape Modelling**, J. Doi and T. Miyake **229**

**3-D Reconstruction of Fluid Flow Visualization Images**, J.D. Agüí Garcia and L. Hesselink **235**

**Some Considerations on Automated Image Processing of Pathline Photographs**, T. Kobayashi, T. Saga and S. Segawa **241**

**Application of Image Processing of Hydrogen Bubble Flow Visualization for Evaluation of Turbulence Characteristics and Flow Structure**, L.J. Lu and C.R. Smith **247**

**Digital Video Image Processing Applications to Drop Size and Concentration Measurements**, Y. Biscos, F. Bismes, P. Hebrard, G. Lavergne and G. Toulouse **253**

**A Rule-Based System for the Analysis of Turbulence Flow Fields**, J.P. Cassou and Ch. Millour **261**

**Visualizing the Flow of Fluid and Heat as Predicted by Numerical Computations**, C.F. Dewey, Jr. and A.T. Patera **269**

**Description Syntactique et Morphométrie d'Ecoulements Instables**, A. Hernandez and P. Jesne **275**

**A New Method for Determination of Gas Density from Differential Interferograms**, S. Qiming **277**

**Shear Flow Patterns Analysed by Video Systems**, C. Berger, M. Bourgeois, G. Lavergne, C. Lempereur and J.M. Mathe **281**

#### **5. FLOW STUDIES: BOUNDARY LAYERS**

##### **5.1 Boundary Layers and Separated Flows**

**Visualization of Surface Shear Stress in Water Using Liquid Crystal Coatings**, P. Besch and T.B. Jones **291**

**Flow Visualization in Radial Flow Through Stationary and Corotating Parallel Disks,**  
S. Mochizuki, W.-J. Yang and M. Tanaka **297**

**Effects on Turbulent Boundary Layer Structure of Longitudinal Riblets Alone and in  
Combination with Outer Layer Devices,** A.M. Savill **303**

**Boundary Layers Behind Waves with Decaying Pressure Profiles,** B.E.L. Deckker and  
D. Singh **309**

**Flow Visualization of the Transitional Phenomenon in the Turbulent Spot,** M. Ohashi,  
T. Masuda and Y. Kotani **315**

**On the Visualization of Longitudinal Vortices in Stagnation Flows,** V. Kottke **321**

**Visualization of Inner/Outer Layer Interactions Producing Turbulence Near Walls,**  
R.E. Falco **327**

**Visualization of Longitudinal Eddies in an Open Channel Flow,** H. Imamoto and  
T. Ishigaki **333**

**Visualization of Boundary Layer Transition Along a Concave Wall,** A. Ito **339**

**Visualization of Double-Diffusive Layers,** A. Tsinober and J. Tanny **345**

**Visualization of Sloshing Motion in Nutation Dampers,** V.J. Modi and F. Welt **353**

**Visualization of the Laminar Separation Bubble on Airfoils at Low Reynolds Numbers,**  
T.J. Mueller, M. Brendel and G.S. Schmidt **359**

**Visualization of a Backward-Facing Step Flow,** J. Jezek and R. Reznicek **365**

**Flow Patterns in a Three-Dimensional Diffuser Designed to Generate Longitudinal Vortices,**  
R.L. Panton, L.N. Goenka and D.G. Bogard **371**

**Experimental and Numerical Visualizations of the Flow Past an Impulsively Started  
Oscillating and Translating Elliptic Cylinder,** K. Ohmi, M. Coutanceau, T.P. Loc, O. Daube and  
A. Dulieu **377**

**A Flow Visualization Study of Reattaching Flow Associated with Two-Dimensional  
Excrescences,** H.H. Nigim **383**

**Use of Tracers for Hydrodynamic Visualization and Study of Separated Flows, Organized or  
Not,** H. Werlé **389**

**Combined Simultaneous Flow Visualization/LDV Measurement in the Near-Wall Region of  
Turbulent Channel Flow,** H. Ohnari, T. Saga, K. Watanabe and T. Saitou **395**

**Examples of Non-Usual Stokes Flow Visualization,** M. Coutanceau, R. Bouard, M. Hellou,  
A. Maalouf and A. Texier **401**

## **5.2 Stratified Flows, Mixing Layer**

**The Plane Mixing Layer: Flow Visualization Results,** C. Borrego **409**

**Colour Schlieren of Eddies in a Free Shear Flow,** M.F. Hibberd **415**

## **5.3 Vortices and Wakes**

**Parametric Exploration of Unsteady Wing Tip Vortices,** P. Freymuth, F. Finaish and  
W. Bank **419**

**Time-Like Visualization of Vortical Flow Field**, N. Izutsu, Y. Ishii, K. Oshima and Y. Oshima **425**

**Visualization of Vortex Breakdown on a Delta Wing**, R.C. Nelson, F.M. Payne and T.T. Ng **431**

**Three-Dimensional Vortex Structures in Wall Bounded Flows**, S.M. Batill and T.L. Doligalski **437**

**Study of the Flow Visualization of the Rotary Wing with Low Aspect Ratio**, S. Saito, T. Watanuki, Y. Tamura, K. Suzuki, K. Sagawa, M. Matsuzaka and H. Kubota **443**

**Visualization of Coherent Structures in the Plane Mixing Layer**, W. Zhonglei **449**

**Supersonic Vortex Rings – Visualization Techniques**, J.P. Baird, D. Campbell-Wilson and S. Gai **451**

**Computational Crossflow Performance of 2-Dimensional, Asymmetric, Subsonic Nozzles with Confined Impingement**, T.M. Sallam **455**

**High Speed Visualizations Applied to Subsonic and Transonic Base Flow**, O. Rodriguez, C. Ducruet and J.M. Desse **457**

**A Limiting Process for the Karman Vortex Street Showing the Change from Two- to Three-Dimensional Flow**, D. Gerich **463**

**Use of Tracers for Hydrodynamic Visualization and Measurements in Steady Vortex Flows**, M. Gallon **469**

**On the Existence of Taylor-Görtler-Vortices on Concave Walls**, V. Kottke and B. Mpourdis **475**

**Visualization of a Vortex Flow in a Rotating Tank**, Y. Kawano **481**

#### **5.4 Jets**

**A Technique for Visualizing the Interior of a Water Jet Discharging in Air**, J.W. Hoyt and J.J. Taylor **489**

**Experimental Study of a Bounded Jet Flow (Mechanism of the Secondary Flow)**, T. Nozaki, H. Maekawa and H. Kouno **495**

**Visual and Theoretical Investigation of Stability of Liquid Jets During of Vapour Condensation**, R. Zwierzchowski **501**

**Necessary Conditions for Starting and Maintaining a Stable Oscillatory Flow in a Hartmann-Sprenger Tube**, J. Iwamoto **507**

**Radial Jet Flow**, R.H. Page, C. Ostowari and J.S. Carbone **513**

**A Three-Dimensional Wall Jet: A Flow Visualization Study**, R.R. Schwab, A. Pollard and E.W. Grandmaison **523**

**Flow Visualization of Coaxial Impingement of Opposing Jets in Mixing Chamber**, S. Akaike, M. Nemoto and R. Ishiwata **527**

**Visualization of an Aerodynamically Excited Free Jet**, A. Szajner and J.T. Turner **533**

#### **5.5 Supersonic and Hypersonic Flows**

**Visual Studies of Characteristics of Slip Stream in Mach Reflection of a Shock Wave**, K. Matsuo, T. Aoki and H. Hirahara **543**

**Flow Behind a Rearward Facing Step in Hypersonic High Enthalpy Flow – Some Interferometric Studies, J.P. Baird, S.L. Gai and N.T. Reynolds 549**

## **5.6 Velocity Field**

**3-D Velocity Measurements in Fluid Flows Using Multiple Exposure Holography, M. Stanislas, O. Rodriguez, M. Dadi and F. Beluche 557**

**Flow Visualization in Circulating Air Flows Using the Smoke-Wire Technique, I.K. Tsanis 563**

## **5.7 Two-Phase Flows**

**Visualization of Nucleate Pool Boiling of Freon-113, M.A. Afify and D.H. Fruman 571**

**Observation and Visualization of the Unsteady Non-Cavitating and Cavitating Flow Around an Oscillating Hydrofoil, J.P. Franc, J.M. Michel and G. Brault 577**

**Imaging for Measurement of Two-Phase Flow, M.S. Beck, A. Plaskowski and R.G. Green 585**

**Characterization of the Velocity Profiles in the Gas-Liquid Slug Flow by the Hydrogen-Bubbles Technique, L. Shemer, Y. Manor and D. Barnea 589**

**Visualization of Cavitation Bubbles Induced by a Laser Pulse, P. Testud-Giovanneschi, D. Dufresne and G. Inglesakis 597**

**Flow Visualization in Models of High Speed Centrifugal Separators, T. Lagerstedt and O. Nåbo 603**

## **6. HEAT TRANSFER**

**Heat Transfer Measurements by Means of Infrared Thermography, G.M. Carlomagno and L. de Luca 611**

**Simultaneous Measurement of Temperature and Velocity Fields in Thermal Convective Flows, W. Hiller and T.A. Kowalewski 617**

**Flow Visualization Studies on Transient Secondary Flow Development in the Thermal Entrance Region of an Isothermally Heated Horizontal Pipe, K.C. Cheng and F.P. Yuen 623**

**The Visualization of a Periodic Flow in Rectangular Channels, Z. Bar-Daroma, Y. Yassour and M. Wolfshtein 629**

**Visualization of Flow, Heat and Mass Transfer of Finned Tubes in Cross Flow, G. Schüz and V. Kottke 637**

**The Effect of a Transverse Electric Field on Laminar Channel Flow with a Constant Heat Rate, T. Fujino and Y.H. Mori 643**

**Development of the Karman Vortex Due to Buoyant Force in Opposing Flow, K. Noto, H. Tsugui and R. Matsumoto 649**

**A Video-Image Study of Electrolytic Flow Structure in Parallel Electric-Magnetic Fields, Z.H. Gu and T.Z. Fahidy 655**

**Simultaneous Flow and Temperature Field Visualization in a Mixed Convection Flow,**  
H.S. Rhee, J.R. Koseff and R.L. Street **659**

**Visualization of Ordered Motion in Turbulent Plane Forced Plume,** A. Murota and  
K. Nakatsuji **665**

**Buoyancy-Thermocapillary Convection in Rectangular Tanks with Evaporation by Laser  
Holographic Interferometry,** K. Kudo and W.J. Yang **671**

**Visualization of the Recirculation Flow in Enclosures,** M.J. Safi **679**

**Visualization of Evaporative Convection in Binary Drops by Laser Shadowgraphy and  
Holographic Interferometry,** N. Zhang and Y. Xu **685**

**Flow Visualization in the Model of a Solar House by Means of a Differential Interferometer,**  
C. Xian, L. Yuan-zhe and S. Ji-zu **691**

**Observation on Vortex Pair of Plane Thermal Plume in Thermally Stratified Fluid,** K. Noto,  
S. Matsui and R. Matsumoto **697**

## **7. ENGINES**

**Flow Structure Visualization in Reciprocating Engines,** C. Arcoumanis, H.G. Green and  
K.Y. Wong **705**

**Photoelectric Schlieren Method Used to Study the Properties of Diesel Engine Injection  
Systems,** R. Reznicek **713**

**Flow Velocity Field Mapping by Video Recording of Coded Seed Track Images,** L. Rimal, P. Li,  
A.A. Adamczyk, D.I. Klick, K.A. Marko, T. Ma and M. Davies **717**

**Liquid Flow Visualization Through Engine Cooling System,** C. Sollicec and C. Rey **723**

**Investigation of the Motion of Diesel Injection Jets Using High-Speed Cinematography and  
Short Time Holography,** F. Eisfeld **729**

**Visualization of Induction-Generated Flow in the Cylinder of a Piston Engine Via Water  
Analog Simulation,** J.C. Kent and A. Mikuć **735**

**Phase Average Imaging in Combustion Instability Studies,** T. Poinsot, A. Trouv , D. Veynante,  
S.M. Candel and E. Esposito **741**

**Flow Visualization Studies of Transverse Fuel Injection Patterns in a Nonreacting Mach 2  
Combustor,** J.C. McDaniel **747**

**Air Intake Flow Visualization,** M. Philbert, J.P. Fal ni and R. Deron **753**

**High-Speed Chrono-Photography of Unsteady Flows Using Pulsed Ruby Lasers,**  
M. Stanislas **759**

**Visualizing Study on Torch Flame Jet in a Prechamber Spark Ignition Engine by Using  
Oil-Film Technique,** H. Ryu, A. Ohtsu and T. Asanuma **765**

## **8. VARIOUS APPLICATIONS**

**Flow Visualization in Water by Dye and by Optical Interferometer,** J.H. Gerrard **773**

**Shear Layer Stability in Axisymmetric Backstep Flows,** A. Pollard and D.J. Latornell **779**

**Wave Induced Scouring Underneath a Circular Cylinder, M.M. Zdravkovich 785**

**Visualization of Surface Wave by Inclined Grid Moiré Topography, K. Yamamoto, S. Kawamata and A. Nomoto 791**

**Laboratory Observation of the Splash Up and the Air Entrainment by the Deep Water Plunging Breaker, P. Bonmarin 797**

**Cinematographic Study of Disintegration of Human Calculi by Underwater Shock Wave Focusing, K. Takayama, O. Onodera, K. Itoh, M. Kuwahara, K. Kambe, O. Kitayama, H. Ise and S. Kimura 803**

**Visualization of the Pulsating Flow Past Aortic Prostheses, R. Martínez-Val, A. Viedma and O. Lichtenstein 809**

**Experimental Study of Pulsating Flow in an Arterial System Model, G. Morin, J.J. Guibard, E.M. Benmadda, G. Touchard and J. Borzeix 815**

**Wake Vortices of Flying Dragonflies, I. Watanabe, A. Azuma and T. Watanabe 821**

**Optical Visualization of Oil Spill Penetration into the Capillary Zone of Groundwater Aquifers, E. Mechrez, A. Kessler and H. Rubin 827**

**Visualization of Clean Room Flows for Contamination Control in Microelectronics Manufacturing, G.S. Settles, B.C. Huitema, S.S. McIntyre and G.G. Via 833**

**Flow Visualization with Laser Light-Sheet Techniques in Automotive Research, W. Hentschel and B. Stoffregen 839**

**Observation of Flow Around a Semi-Submersible Platform, K. Tokunaga 847**

**Observation of Flow Around Ship Stern, T. Okuno 853**

**Electron Beam Visualization of Rarefied Gas Flows, J. Allègre, M. Raffin and J.-C. Lengrand 859**

**Investigating Sedimentation of Particles and Floccules by Holography, J. Timkó, T. Virág, E. Varga and O. Libor 861**

**Experimental Study on the Stability of Cooling Film on a Turbine Blade by Flow Visualization Technique, E. Xuequan, D. Suqing, K. Shaoyen and L. Kun 867**

**Experimental Determination of Extinction Factor of Non-Homogeneous Optical Medium, J. Stasiek 873**

**Numerical and Experimental Study of Laser Induced Flow in Front of Water Droplets, P. Vigliano, M. Autric and Ph. Bournot 879**

## **ADDENDUM**

### **Abstracts of Papers Not Presented**

**Study of Slow Flow Using Speckle Photography, N. Barakat, H. El-Ghandoor and A.M. Hamed 887**

**The Visualization of the Interaction of Shock Wave in a Gas with the Body of Complex Shape, T.V. Bazhenova, L.G. Gvozdeva, Y.P. Lagutov, D.K. Rayevsky, Y.L. Sharov and A.I. Charitonov 889**

**The Method of Multiexposition Particles Visualization in High-Speed Two-Phase Flows, V.M. Boiko, A.E. Bulyshev, A.N. Papyrin and N.G. Preobrazhensky 891**

**The Temperature Distribution of a Tubular Radiator with Square Fins Determined by Holographic Interferometry, S.-Q. Deng, J.M. Hu, J.Z. Shu and S.Y. Ko 893**

**The Investigation of Starting Vortex and Wake Flow Behind Two-Dimensional Flat Plate, Q.-X. Lian and H. Zheng 895**

**Studies on Turbulent Mixing in a Dump Combustor by Numerical Simulation and Mach-Zender Laser Interferometry, Z. Lixing, L. Rongxian, L. Wenyi and Q. Like 897**

**Computer-Aided Heat Transfer Research by Means of Holographic Interferometry, H. Miroslav 899**

**Oil-Flow Technique and Application in Hypersonic Shock Tunnel, L. Songhui, Y. Zuqing and W. Xirong 901**

**Study of Visualizing for Reynolds Number by Experimental Technique – Case of the Building Back Wind, H. Temporin 903**

**Complex Leeside Vortex Patterns on an Inclined Slender Body, X. Xuejian, Y. Xiaosheng and W. Qiang 905**

**The Measurement of Two-Dimensional Free Convection Temperature Field by Laser Double-Mirror Interferometer, Y.-Q. Yao, S.-Y. Ko and B.-G. Wu 907**

**Author Index 911**

**Subject Index 915**
