

Contents

1. Physical Calorimetry and Instrumentation	1
1.1. The Microcalorimetric Study of Catalytic Reactions.	3
P. Gravelle	
1.2. Ballistic Measurements with the Batch Microcalorimeter	33
L. Tumerman, R. Zidovezki	
1.3. Development and Properties of Caloric Systems for Substrate Determinations with Immobilized Enzymes	39
G. Krisam, H.-L. Schmidt	
1.4. The Application of a Heat Transport Model for the Assessment of Regional Blood Flow and Regional Metabolic Heat Production in Dog Myocardium.	49
W. Müller-Schauenburg, H. Benzing	
2. Biochemical Calorimetry.	57
2.1. Hydration and Thermal Stability of α -Lactalbumin. A Calorimetric Study	59
M. Rüegg, U. Moor, A. Lukesch, B. Blanc	
2.2. Comparative Studies of the Formation of Magnesium, Manganese and Cobalt Complexes with ATP Using Potentiometric and Calorimetric Techniques	75
M. Ragot, J.C. Sari, J. Galea, G. Ferroni, J.P. Belaich	
2.3. Microcalorimetric Experiments on Cell Free Protein Biosynthesis	85
L. Berthe-Corti	
2.4. Enthalpy Changes in Reactions of Messenger-RNA Turnover	97
L. Tumerman, S. Ric	
3. Microbiological Calorimetry	107
3.1. Microcalorimetric Studies of Micro-Organisms	109
A.E. Beezer	
3.2. Calorimetric Studies of Yeast Metabolism under Nongrowing Conditions	119
T. Fujita, K. Nunomura	
3.3. Microcalorimetric Measurements of the Heat Production in Partially Synchronous Cultures of Baker's Yeast	129
R. Brettel	

VIII

3.4 Quantitative Relation between Heat Production and Weight During Growth of Microbial Cultures	139
B. Schaarschmidt, A.I. Zotin, I. Lamprecht	
3.5. Calorimetric Studies of Lactic Acid Bacteria and the Effect of 2,4-Dinitrophenol on their Catabolic Regulation.	149
P. Monk, W. Forrest, I. Wadsö	
4. Calorimetry of Organs	157
4.1. Calorimetric Investigations on Animal Suborganisms: Organites, Tissues and Isolated Organs.	159
P. Boivinet	
4.2. Calorimetric Studies of Muscle and Muscle Proteins	183
R.C. Woledge	
4.3. Calorimetric Investigations of Metabolic Regulation in Human Skin	199
A. Anders, G. Welge, B. Schaarschmidt, I. Lamprecht, H. Schaefer	
4.4. Organperfusion: in a Calvet Microcalorimeter: Adaptation of a Process Computer to an Experimental Arrangement Especially Designed for this Purpose.	209
F. Baisch	
5. Medical Calorimetry.	223
5.1. Applications of Microcalorimetry in the Medical Field	225
I. Wadsö	
5.2. Microcalorimetric Measurements of Heat Production in Human Erythrocytes with a Batch Calorimeter	241
M. Trumpa, B. Wendt	
5.3. Characterization of the Mode of Action of Tetracyclines Using Microcalorimetry	251
E. Semenz, F. Tiefenbrunner	
5.4. Whole Body Calorimetry.	261
E. Jéquier	
6. Ecological Calorimetry	279
6.1. Thermodynamic Considerations of Invertebrate Anoxibiosis	281
E. Gnaiger	
6.2. Microcalorimetric Investigations of Aquatic Biotopes	305
F. Tiefenbrunner	

6.3. Combustion Heat in Ecological Energetics. What Sort of Information can be Obtained?	315
W. d'Oleire-Oltmanns	
6.4. Energy Flow and Efficiency Differences in Plants and Plant Communities	325
H. Lieth	
Index	337
