

CONTENTS

Inelastic Electron Scattering.....	1
Descriptions of Hadronic Structure.....	44
On the Phenomenology of Multihadron Production in e^+e^- Annihilation.....	49
Hadron Final States in Deep Inelastic Processes.....	93
Dispersion Theory of Nucleon Form Factors.....	159
The Discreet Charm of the New Particles.....	208
Neutral Currents without Gauge Theory Prejudices....	258
Status of Broken Color Symmetry.....	322
Production of New Particles by p-N Interactions.....	347
Observable Quarks, Gluons and the Leptons.....	384
More than Four Quarks?.....	422
Quark Confinement.....	428
Charmed Particles and Other Observable Consequences from Gauge Theories.....	464
Hadron Geometry and Quark Coordinates.....	522
