

Table of Contents

I Keynote 1

An Imaging Architecture Based on Derivative Estimation Sensors	3
<i>Maria Petrou and Flore Faïlle</i>	

II Image Coding, Processing and Analysis

Landmark Real-Time Recognition and Positioning for Pedestrian Navigation	21
<i>Antonio Adán, Alberto Martín, Enrique Valero, and Pilar Merchán</i>	
A Binarization Method for a Scenery Image with the Fractal Dimension	29
<i>Hiromi Yoshida and Naoki Tanaka</i>	
Selective Change-Driven Image Processing: A Speeding-Up Strategy . . .	37
<i>Jose A. Boluda, Francisco Vegara, Fernando Pardo, and Pedro Zuccarello</i>	
Coding Long Contour Shapes of Binary Objects	45
<i>Hermilo Sánchez-Cruz and Mario A. Rodríguez-Díaz</i>	
Finding Images with Similar Lighting Conditions in Large Photo Collections	53
<i>Mauricio Díaz and Peter Sturm</i>	
Color Image Registration under Illumination Changes	61
<i>Raúl Montoliu, Pedro Latorre Carmona, and Filiberto Pla</i>	
A Novel Approach to Robust Background Subtraction	69
<i>Walter Izquierdo Guerra and Edel García-Reyes</i>	
Automatic Choice of the Number of Nearest Neighbors in Locally Linear Embedding	77
<i>Juliana Valencia-Aguirre, Andrés Álvarez-Mesa, Genaro Daza-Santacoloma, and Germán Castellanos-Domínguez</i>	
K-Medoids-Based Random Biometric Pattern for Cryptographic Key Generation	85
<i>H.A. Garcia-Baleon, V. Alarcon-Aquino, and O. Starostenko</i>	
A Hardware Architecture for SIFT Candidate Keypoints Detection	95
<i>Leonardo Chang and José Hernández-Palancar</i>	

Analysis of Non Local Image Denoising Methods	103
<i>Álvaro Pardo</i>	

III Segmentation, Analysis of Shape and Texture

Texture Characterization Using a Curvelet Based Descriptor	113
<i>Francisco Gómez and Eduardo Romero</i>	

Improving Fingerprint Matching Using an Orientation-Based Minutia Descriptor	121
<i>Miguel Angel Medina-Pérez, Andrés Gutiérrez-Rodríguez, and Millon García-Borroto</i>	

Morphological Shape Context: Semi-locality and Robust Matching in Shape Recognition	129
<i>Mariano Tepper, Francisco Gómez, Pablo Musé, Andrés Almansa, and Marta Mejail</i>	

On the Computation of the Common Labelling of a Set of Attributed Graphs	137
<i>Albert Solé-Ribalta and Francesc Serratosa</i>	

Advances in Rotation-Invariant Texture Analysis.....	145
<i>Alfonso Estudillo-Romero and Boris Escalante-Ramirez</i>	

SAR Image Segmentation Using Level Sets and Region Competition under the $\mathcal{G}^H$ Model	153
<i>Maria Elena Buemi, Norberto Goussies, Julio Jacobo, and Marta Mejail</i>	

A New Segmentation Approach for Old Fractured Pieces	161
<i>Jesus Llanes, Antonio Adan, and Santiago Salamanca</i>	

Segmentation in 2D and 3D Image Using Tissue-Like P System	169
<i>Hepzibah A. Christinal, Daniel Díaz-Pernil, and Pedro Real Jurado</i>	

Dynamic Image Segmentation Method Using Hierarchical Clustering ...	177
<i>Jorge Galbiati, Héctor Allende, and Carlos Becerra</i>	

A Study on Representations for Face Recognition from Thermal Images	185
<i>Yenisel Plasencia, Edel García-Reyes, Robert P.W. Duin, Heydi Mendez-Vazquez, César San-Martin, and Claudio Soto</i>	

Fast Unsupervised Texture Segmentation Using Active Contours Model Driven by Bhattacharyya Gradient Flow	193
<i>Foued Derraz, Abdelmalik Taleb-Ahmed, Antonio Pinti, Laurent Peyrodie, Nacim Betrouni, Azzeddine Chikh, and Fethi Bereksi-Reguig</i>	

A Distributed and Collective Approach for Curved Object-Based Range Image Segmentation	201
<i>Smaine Mazouzi, Zahia Guessoum, and Fabien Michel</i>	
Learning an Efficient Texture Model by Supervised Nonlinear Dimensionality Reduction Methods	209
<i>Elnaz Barshan, Mina Behravan, and Zohreh Azimifar</i>	
A Fuzzy Segmentation Method for Images of Heat-Emitting Objects	217
<i>Anna Fabijańska</i>	

IV Keynote 2

Challenges and Opportunities for Extracting Cardiovascular Risk Biomarkers from Imaging Data	227
<i>I.A. Kakadiaris, E.G. Mendizabal-Ruiz, U. Kurkure, and M. Naghavi</i>	

V Geometric Image Processing and Analysis

A New Unsupervised Learning for Clustering Using Geometric Associative Memories	239
<i>Benjamín Cruz, Ricardo Barrón, and Humberto Sossa</i>	
Airway Tree Segmentation from CT Scans Using Gradient-Guided 3D Region Growing	247
<i>Anna Fabijańska, Marcin Janaszewski, Michał Postolski, and Laurent Babout</i>	
Geometric Approach to Hole Segmentation and Hole Closing in 3D Volumetric Objects	255
<i>Marcin Janaszewski, Michel Couprie, and Laurent Babout</i>	
Optimizations and Performance of a Robotics Grasping Algorithm Described in Geometric Algebra	263
<i>Florian Wörsdörfer, Florian Stock, Eduardo Bayro-Corrochano, and Dietmar Hildenbrand</i>	
Homological Computation Using Spanning Trees	272
<i>H. Molina-Abril and P. Real</i>	
Getting Topological Information for a 80-Adjacency Doxel-Based 4D Volume through a Polytopal Cell Complex	279
<i>Ana Pacheco and Pedro Real</i>	
Circular Degree Hough Transform	287
<i>Alejandro Flores-Mendez and Angeles Suarez-Cervantes</i>	

VI Analysis of Signal, Speech and Language

Isolate Speech Recognition Based on Time-Frequency Analysis Methods	297
<i>Alfredo Mantilla-Caeiros, Mariko Nakano Miyatake, and Hector Perez-Meana</i>	
Feature Selection Based on Information Theory for Speaker Verification.....	305
<i>Rafael Fernández, Jean-François Bonastre, Driss Matrouf, and José R. Calvo</i>	
Simple Noise Robust Feature Vector Selection Method for Speaker Recognition	313
<i>Gabriel Hernández, José R. Calvo, Flavio J. Reyes, and Rafael Fernández</i>	
Implementation of Three Text to Speech Systems for Kurdish Language	321
<i>Anvar Bahrampour, Wafa Barkhoda, and Bahram Zahir Azami</i>	
Functional Feature Selection by Weighted Projections in Pathological Voice Detection	329
<i>Luis Sánchez Giraldo, Fernando Martínez Tabares, and Germán Castellanos Domínguez</i>	
Prediction of Sequential Values for Debt Recovery	337
<i>Tomasz Kajdanowicz and Przemysław Kazienko</i>	
A Computer-Assisted Colorization Approach Based on Efficient Belief Propagation and Graph Matching	345
<i>Alexandre Noma, Luiz Velho, and Roberto M. Cesar-Jr</i>	
Signal Analysis for Assessment and Prediction of the Artificial Habitat in Shrimp Aquaculture	353
<i>José Juan Carbajal Hernández, Luis Pastor Sanchez Fernandez, José Luis Oropeza Rodríguez, and Edgardo Manuel Felipe Riverón</i>	

VII Document Processing and Recognition

Learning Co-relations of Plausible Verb Arguments with a WSM and a Distributional Thesaurus.....	363
<i>Hiram Calvo, Kentaro Inui, and Yuji Matsumoto</i>	
Handwritten Word Recognition Using Multi-view Analysis	371
<i>J.J. de Oliveira Jr., C.O. de A. Freitas, J.M. de Carvalho, and R. Sabourin</i>	

A Speed-Up Hierarchical Compact Clustering Algorithm for Dynamic Document Collections	379
<i>Reynaldo Gil-García and Aurora Pons-Porrata</i>	
Incorporating Linguistic Information to Statistical Word-Level Alignment	387
<i>Eduardo Cendejas, Grettel Barceló, Alexander Gelbukh, and Grigori Sidorov</i>	

VIII Keynote 3

When Pyramids Learned Walking	397
<i>Walter G. Kropatsch</i>	

IX Feature Extraction, Clustering and Classification

A Simple Method for Eccentric Event Espial Using Mahalanobis Metric	417
<i>Md. Haidar Sharif and Chabane Djeraba</i>	
A Combine-Correct-Combine Scheme for Optimizing Dissimilarity-Based Classifiers	425
<i>Sang-Woon Kim and Robert P.W. Duin</i>	
BR: A New Method for Computing All Typical Testors	433
<i>Alexsey Lias-Rodríguez and Aurora Pons-Porrata</i>	
Classifier Selection in a Family of Polyhedron Classifiers	441
<i>Tetsuji Takahashi, Mineichi Kudo, and Atsuyoshi Nakamura</i>	
Characterisation of Feature Points in Eye Fundus Images	449
<i>D. Calvo, M. Ortega, M.G. Penedo, and J. Rouco</i>	
Combining Functional Data Projections for Time Series Classification	457
<i>Alberto Muñoz and Javier González</i>	
Finding Small Consistent Subset for the Nearest Neighbor Classifier Based on Support Graphs	465
<i>Milton García-Borroto, Yenny Villuendas-Rey, Jesús Ariel Carrasco-Ochoa, and José Fco. Martínez-Trinidad</i>	
Analysis of the GRNs Inference by Using Tsallis Entropy and a Feature Selection Approach	473
<i>Fabício M. Lopes, Evaldo A. de Oliveira, and Roberto M. Cesar-Jr</i>	

Clustering Ensemble Method for Heterogeneous Partitions	481
<i>Sandro Vega-Pons and José Ruiz-Shulcloper</i>	
Using Maximum Similarity Graphs to Edit Nearest Neighbor Classifiers	489
<i>Milton García-Borroto, Yenny Villuendas-Rey, Jesús Ariel Carrasco-Ochoa, and José Fco. Martínez-Trinidad</i>	
A New Incremental Algorithm for Overlapped Clustering	497
<i>Airel Pérez Suárez, José Fco. Martínez Trinidad, Jesús A. Carrasco Ochoa, and José E. Medina Pagola</i>	
The Multi-level Learning and Classification of Multi-class Parts-Based Representations of U.S. Marine Postures	505
<i>Deborah Goshorn, Juan Wachs, and Mathias Kölsch</i>	
The Representation of Chemical Spectral Data for Classification	513
<i>Diana Porro, Robert W. Duin, Isneri Talavera, and Noslen Hdez</i>	
Visual Pattern Analysis in Histopathology Images Using Bag of Features	521
<i>Angel Cruz-Roa, Juan C. Caicedo, and Fabio A. González</i>	
A Brief Index for Proximity Searching	529
<i>Eric Sadit Téllez, Edgar Chávez, and Antonio Camarena-Ibarrola</i>	
Pigmented Skin Lesions Classification Using Dermatoscopic Images.....	537
<i>Germán Capdehourat, Andrés Corez, Anabella Bazzano, and Pablo Musé</i>	
A Multi-class Kernel Alignment Method for Image Collection Summarization	545
<i>Jorge E. Camargo and Fabio A. González</i>	

X Statistical Pattern Recognition

Correlation Pattern Recognition in Nonoverlapping Scene Using a Noisy Reference.....	555
<i>Pablo M. Aguilar-González and Vitaly Kober</i>	
Particle Swarm Model Selection for Authorship Verification	563
<i>Hugo Jair Escalante, Manuel Montes, and Luis Villaseñor</i>	
Image Characterization from Statistical Reduction of Local Patterns ...	571
<i>Philippe Guermeur and Antoine Manzanera</i>	
Semi-supervised Robust Alternating AdaBoost.....	579
<i>Héctor Allende-Cid, Jorge Mendoza, Héctor Allende, and Enrique Canessa</i>	

Robust Radio Broadcast Monitoring Using a Multi-Band Spectral Entropy Signature	587
<i>Antonio Camarena-Ibarrola, Edgar Chávez, and Eric Sadit Tellez</i>	
Real Time Hot Spot Detection Using FPGA	595
<i>Sol Pedre, Andres Stoliar, and Patricia Borensztein</i>	
Fast Pattern Classification of Ventricular Arrhythmias Using Graphics Processing Units	603
<i>Noel Lopes and Bernardete Ribeiro</i>	
SPC without Control Limits and Normality Assumption: A New Method	611
<i>J.A. Vazquez-Lopez and I. Lopez-Juarez</i>	

XI Neural Networks for Pattern Recognition

Improved Online Support Vector Machines Spam Filtering Using String Kernels	621
<i>Ola Amayri and Nizar Bouguila</i>	
Neural Network Ensembles from Training Set Expansions	629
<i>Debrup Chakraborty</i>	
Leaks Detection in a Pipeline Using Artificial Neural Networks	637
<i>Ignacio Barradas, Luis E. Garza, Ruben Morales-Menendez, and Adriana Vargas-Martínez</i>	
Computing the Weights of Polynomial Cellular Neural Networks Using Quadratic Programming	645
<i>Anna Rubi-Velez, Eduardo Gomez-Ramirez, and Giovanni E. Pazienza</i>	
Two-Dimensional Fast Orthogonal Neural Network for Image Recognition	653
<i>Bartłomiej Stasiak</i>	
An Enhanced Probabilistic Neural Network Approach Applied to Text Classification	661
<i>Patrick Marques Ciarelli and Elias Oliveira</i>	
Writer Identification Using Super Paramagnetic Clustering and Spatio Temporal Neural Network	669
<i>Seyyed Ataollah Taghavi Sangdehi and Karim Faez</i>	
Recognition and Quantification of Area Damaged by Oligonychus Perseae in Avocado Leaves	677
<i>Gloria Díaz, Eduardo Romero, Juan R. Boyero, and Norberto Malpica</i>	

Neurocontroller for Power Electronics-Based Devices	685
<i>M. Oliver Perez, Juan M. Ramirez, and H. Pavel Zuniga</i>	

XII Keynote 4

3D and Appearance Modeling from Images	695
<i>Peter Sturm, Amaël Delaunoy, Pau Gargallo, Emmanuel Prados, and Kuk-Jin Yoon</i>	

XIII Computer Vision

Towards an Iterative Algorithm for the Optimal Boundary Coverage of a 3D Environment	707
<i>Andrea Bottino</i>	
Measuring Cubeness of 3D Shapes	716
<i>Carlos Martinez-Ortiz and Joviša Žunić</i>	
Self-calibration from Planes Using Differential Evolution	724
<i>Luis Gerardo de la Fraga</i>	
Graph-Cut versus Belief-Propagation Stereo on Real-World Images	732
<i>Sandino Morales, Joachim Penc, Tobi Vaudrey, and Reinhard Klette</i>	
Combining Appearance and Range Based Information for Multi-class Generic Object Recognition	741
<i>Doaa Hegazy and Joachim Denzler</i>	
Dealing with Inaccurate Face Detection for Automatic Gender Recognition with Partially Occluded Faces	749
<i>Yasmina Andreu, Pedro García-Sevilla, and Ramón A. Mollineda</i>	
Rigid Part Decomposition in a Graph Pyramid	758
<i>Nicole M. Artner, Adrian Ion, and Walter G. Kropatsch</i>	
Multimodal Algorithm for Iris Recognition with Local Topological Descriptors	766
<i>Sergio Campos, Rodrigo Salas, Hector Allende, and Carlos Castro</i>	
Scene Retrieval of Natural Images	774
<i>J.F. Serrano, J.H. Sossa, C. Avilés, R. Barrón, G. Olague, and J. Villegas</i>	
Use of Ultrasound and Computer Vision for 3D Reconstruction	782
<i>Ruben Machucho-Cadena, Eduardo Moya-Sánchez, Sergio de la Cruz-Rodríguez, and Eduardo Bayro-Corrochano</i>	

Two-Frame Optical Flow Formulation in an Unwarping Multiresolution Scheme	790
<i>C. Cassisa, S. Simoens, and V. Prinet</i>	

XIV Video Segmentation and Tracking

Generating Video Textures by PPCA and Gaussian Process Dynamical Model	801
<i>Wentao Fan and Nizar Bouguila</i>	
Fuzzy Feature-Based Upper Body Tracking with IP PTZ Camera Control	809
<i>Parisa Darvish Zadeh Varcheie and Guillaume-Alexandre Bilodeau</i>	
Experimental Assessment of Probabilistic Integrated Object Recognition and Tracking Methods	817
<i>Francesc Serratos, Nicolás Amézquita, and René Alquézar</i>	
Real-Time Stereo Matching Using Memory-Efficient Belief Propagation for High-Definition 3D Tele-Presence Systems	825
<i>Jesús M. Pérez, Pablo Sánchez, and Marcos Martínez</i>	
Improving Recurrent CSVM Performance for Robot Navigation on Discrete Labyrinths	834
<i>Nancy Arana-Daniel, Carlos López-Franco, and Eduardo Bayro-Corrochano</i>	
Discrete Integral Sliding Mode Control in Visual Object Tracking Using Differential Kinematics	843
<i>Luis Enrique González Jiménez, Alexander Loukianov, and Eduardo Bayro-Corrochano</i>	
Machine Learning and Geometric Technique for SLAM	851
<i>Miguel Bernal-Marin and Eduardo Bayro-Corrochano</i>	
Compression and Key Feature Extraction for Video Transmission	859
<i>Esteban Tobias Bayro Kaiser, Eduardo Correa-Arameda, and Eduardo Bayro-Corrochano</i>	

XV Robot Vision

Robot Command Interface Using an Audio-Visual Speech Recognition System	869
<i>Alexánder Ceballos, Juan Gómez, Flavio Prieto, and Tanneguy Redarce</i>	

A Rapidly Trainable and Global Illumination Invariant Object Detection System	877
<i>Sri-Kaushik Pavani, David Delgado-Gomez, and Alejandro F. Frangi</i>	
Expanding Irregular Graph Pyramid for an Approaching Object	885
<i>Luis A. Mateos, Dan Shao, and Walter G. Kropatsch</i>	
Learning Relational Grammars from Sequences of Actions	892
<i>Blanca Vargas-Govea and Eduardo F. Morales</i>	
On Environmental Model-Based Visual Perception for Humanoids	901
<i>D. Gonzalez-Aguirre, S. Wieland, T. Asfour, and R. Dillmann</i>	
Dexterous Cooperative Manipulation with Redundant Robot Arms	910
<i>David Navarro-Alarcon, Vicente Parra-Vega, Silvionel Vite-Medecigo, and Ernesto Olguin-Diaz</i>	
A Simple Sample Consensus Algorithm to Find Multiple Models	918
<i>Carlos Lara-Alvarez, Leonardo Romero, Juan F. Flores, and Cuauhtemoc Gomez</i>	

XVI Keynote 5

Pulse Coupled Neural Networks for Automatic Urban Change Detection at Very High Spatial Resolution	929
<i>Fabio Pacifici and William J. Emery</i>	

XVII Intelligent Remote Sensing Imagery Research and Discovery Techniques

Randomized Probabilistic Latent Semantic Analysis for Scene Recognition	945
<i>Erik Rodner and Joachim Denzler</i>	
Object Contour Tracking Using Foreground and Background Distribution Matching	954
<i>Mohand Saïd Allili</i>	
Processing of Microarray Images	962
<i>Fernando Mastandrea and Álvaro Pardo</i>	
Multi-focus Image Fusion Based on Fuzzy and Wavelet Transform	970
<i>Jamal Saeedi, Karim Faez, and Saeed Mozaffari</i>	
Unsupervised Object Discovery from Images by Mining Local Features Using Hashing	978
<i>Gibran Fuentes Pineda, Hisashi Koga, and Toshinori Watanabe</i>	

XVIII CASI 2009 Workshop I: Intelligent Computing for Remote Sensing Imagery

Spectral Estimation of Digital Signals by the Orthogonal Kravchenko Wavelets $\{h_a(t)\}$	989
<i>Victor Kravchenko, Hector Perez Meana, Volodymyr Ponomaryov, and Dmitry Churikov</i>	
Video Denoising by Fuzzy Directional Filter Using the DSP EVM DM642	997
<i>Francisco J. Gallegos-Funes, Victor Kravchenko, Volodymyr Ponomaryov, and Alberto Rosales-Silva</i>	
Image Authentication Scheme Based on Self-embedding Watermarking	1005
<i>Clara Cruz-Ramos, Rogelio Reyes-Reyes, Mariko Nakano-Miyatake, and Héctor Pérez-Meana</i>	
Unified Experiment Design, Bayesian Minimum Risk and Convex Projection Regularization Method for Enhanced Remote Sensing Imaging	1013
<i>Yuriy Shkvarko, Jose Turpan, and Stewart Santos</i>	
Intelligent Experiment Design-Based Virtual Remote Sensing Laboratory	1021
<i>Yuriy Shkvarko, Stewart Santos, and Jose Turpan</i>	

XIX CASI 2009 Workshop II: Intelligent Fussion and Classification Techniques

Optimizing Classification Accuracy of Remotely Sensed Imagery with DT-CWT Fused Images	1031
<i>Diego Renza, Estibaliz Martinez, and Agueda Arquero</i>	
Filter Banks for Hyperspectral Pixel Classification of Satellite Images...	1039
<i>Olga Rajadell, Pedro García-Sevilla, and Filiberto Pla</i>	
Minimum Variance Gain Nonuniformity Estimation in Infrared Focal Plane Array Sensors	1047
<i>César San-Martin and Gabriel Hermosilla</i>	
Movement Detection and Tracking Using Video Frames	1054
<i>Josue Hernandez, Hiroshi Morita, Mariko Nakano-Miyatake, and Hector Perez-Meana</i>	

A New Steganography Based on χ^2 Technic	1062
<i>Zainab Famili, Karim Faez, and Abbas Fadavi</i>	
Near Real Time Enhancement of Remote Sensing Imagery Based on a Network of Systolic Arrays	1070
<i>A. Castillo Atoche, D. Torres Roman, and Y. Shkvarko</i>	
Author Index	1079
