

## TABLE OF CONTENTS

Foreword and Acknowledgements		v
The VLT Workshop: Introduction and Conclusion	L. Woltjer	1
I. <u>Scientific Objectives of a VLT</u>		
The Potential of a VLT for Stellar Astronomy	I. Appenzeller	7
The Chemical Composition of Stars	P.E. Nissen	15
The Use of a VLT for Studying Inter-stellar Matter and Extended Objects	J. Lequeux	29
High and Intermediate Resolution Spectroscopy with an 8 m Telescope: Gains and Problems with Respect to the Present Generation of Large Telescopes and the Space Telescope	S. D'Odorico	37
Scientific Objectives of a VLT for Galaxies	M.-H. Ulrich	49
A Very Large Telescope for Cosmology	G.A. Tammann	61
II. <u>Instrumental Opportunities and Requirements</u>		
Optical Detectors and the VLT	M.J. Cullum	75
Fundamental Considerations Relevant to the Coupling of Grating Spectrographs with Very Large Telescopes	D. Enard	89
High-Resolution Spectroscopy: The Need for Larger Telescopes	D. Drawins	107
Infrared Spectroscopy with a VLT	A. Moorwood	109
High-Resolution Imaging with ESO's Very Large Telescope	G. Weigelt	121
Aperture Synthesis in the Infrared: Prospects for a VLT	P. Léna	129
Construction of Coherent Arrays	M. Dugué A. Labeyrie G. Schumacher	141
Future Possibilities of Ground-based Interferometry in the Visible	F. Roddier	155
High Angular Resolution in the Infrared with a Single Very Large Telescope (VLT)	P. Léna	163

**III. Future Large Telescopes and Related Projects**

The NTT (New Technology Telescope): Predecessor of the VLT	R.N. Wilson	173
Large Telescope Plans in the United States	E.J. Wampler	189
Large Field, Central Obscuration Free / Multimirror Telescope TEMOS 4	G. Courtes	197
New Technology for Large Optical Telescopes	M.J. de Jonge	199
ESO's VLT Studies and Options	J.-P. Swings	205

**IV. Site Selection**

Site Selection for a Very Large Telescope	A. Ardeberg	217
Testing Seeing Quality	F. Roddier	255
Speckle Site Testing	G. Weigelt	263
<b>List of Participants</b>		<b>269</b>
