

Contents

| | |
|---|-----------|
| 1. Fluctuation Waves of the Composition and Order Parameters | 1 |
| 1.1 Order in Solid Solutions and Fluctuations | 2 |
| 1.2 Thermodynamic Theory for Fluctuation Waves of Concentration and Long-Range Order Parameters in Undistorted Crystals | 10 |
| 1.2.1 Concentration Fluctuations | 11 |
| 1.2.2 Fluctuations of Long-Range Order Parameters in One-Component Solutions | 15 |
| 1.2.3 Fluctuations of Long-Range Order Parameters and Concentration in Solid Solutions | 19 |
| 1.3 Microscopic Semiphenomenological Theory of Fluctuation Waves in Solid Solutions | 23 |
| 1.4 Fluctuations of the Order Parameters in Solid Solutions | 35 |
| 1.5 Static Displacements Caused by Fluctuation Waves of Composition, Order and Correlation Parameters | 38 |
| 1.5.1 Long-Wavelength Limiting Case | 39 |
| 1.5.2 Fluctuation Waves of Static Displacements in Concentrated Solutions | 44 |
| 2. Effects of Long-Range Forces on Fluctuations in Crystals and the Production of Heterogeneous States | 51 |
| 2.1 Effects Caused by Elastic Interaction | 53 |
| 2.1.1 Effect of the Elastic Interaction on Fluctuations of Concentration and Order Parameters in Crystals | 53 |
| 2.1.2 Effect of Elastic Interaction on the Shape of Second-Phase Particles and Metastable Heterogeneous Structures in Two-Phase Systems | 64 |
| 2.2 Effects of Dipole–Dipole Interaction on Polarization Fluctuations | 72 |
| 2.3 Fluctuations of the Charged Defect Concentration | 79 |
| 2.4 Effects of Long-Range Forces on Fluctuation Waves in Metal Alloys | 81 |
| 2.5 Equilibrium Heterogeneous States with Long-Range Forces | 87 |
| 2.5.1 Crystal Structures with Large Parameters | 87 |

| | | |
|-----------|---|------------|
| 2.5.2 | Heterogeneous States in Metal Systems | 95 |
| 2.5.3 | Heterogeneous States in Semiconductor Systems | 112 |
| 3. | Diffuse Scattering of X-Rays and Neutrons in Solid Solutions and One-Component Ordered Crystals | 119 |
| 3.1 | Diffuse Scattering Intensity in Kinematical Theory | 120 |
| 3.2 | Diffuse Scattering by Solid Solutions: General Analysis | 127 |
| 3.3 | Diffuse Scattering in Undistorted Solid Solutions | 131 |
| 3.3.1 | Scattering by Homogeneous Solutions, Determination of the Correlation Parameters, Ordering Energies and the Fermi Surface Diameters | 132 |
| 3.3.2 | Scattering by Inhomogeneous Solutions | 140 |
| 3.4 | Diffuse Scattering in Distorted Solid Solutions | 144 |
| 3.4.1 | Scattering Caused by Concentration Fluctuations | 144 |
| 3.4.2 | Diffuse Scattering by Fluctuations of the Correlation Parameters | 150 |
| 3.5 | Analysis of Solid Solutions with Diffraction Techniques Employing Diffuse Scattering | 153 |
| 3.5.1 | Correlation Parameters | 153 |
| 3.5.2 | Ordering Energies and Thermodynamic Properties of a Solution | 156 |
| 3.5.3 | Diffraction Studies of the Kinetics of Diffusion Processes | 160 |
| 3.5.4 | Diffraction Studies of the Fermi Surface in Alloys | 163 |
| 3.5.5 | Analysis of Short-Range Order in Alloys | 167 |
| 3.6 | Diffuse Scattering by Long-Range Order Fluctuations | 179 |
| 3.6.1 | One-Component Crystals | 180 |
| 3.6.2 | Solid Solutions | 184 |
| 3.6.3 | Intrinsic Ferroelectrics | 185 |
| 3.6.4 | Incommensurate Structures | 188 |
| 3.7 | Diffuse Scattering by Ionic Crystals with Charged Defects or Impurities | 191 |
| 4. | Anomalous Scattering Near Second-Order Phase Transitions and Critical Points | 197 |
| 4.1 | Thermodynamic Parameters and Fluctuation Waves Near Second-Order Phase Transitions and Critical Points | 198 |
| 4.1.1 | Landau Theory | 198 |
| 4.1.2 | Fluctuation Range | 211 |
| 4.2 | Diffuse Scattering by Critical Fluctuations in Perfect Crystals .. | 217 |
| 4.3 | Effects Produced by Dislocations on Second-Order Phase Transitions and Anomalous Scattering | 246 |

| | | |
|-------------------|--|-----|
| 4.3.1 | Phase Transitions in Crystals with Dislocations | 246 |
| 4.3.2 | Scattering by Long-Range Order Inhomogeneities Produced by Dislocations Near a Second-Order Phase Transition | 257 |
| Appendix: | Calculation of the Mean Squares of the Fourier Components in the Microscopy Theory . | 265 |
