

CONTENTS

Introduction	1
 PART I	
Chapter 1 The mineral industry – Present state of the art	11
Chapter 2 Reasons for poor planning of precious metal recoveries	17
Chapter 3 Market value and other variables affecting recovery decisions and recovery costs	25
Introduction	25
Metal geochemistry	27
Ore chemistry	30
Rock types – Physical character of host rock	31
Mineralogy/ore microcomposition	35
Metal-bearing minerals	35
Chemical composition of the metal-bearing mineral	36
Grain size of the metal-bearing mineral	37
Host minerals and mineral associations	38
Minerals other than the host mineral	42
Mineral stability	42
Chapter 4 Methods and techniques for the study of ores	45
Introduction	45
The microanalytical techniques	46

The ore microscope	46
The electron microprobe	48
The scanning electron microscope (SEM)	52
Choice and preparation of samples	54
Incorrect approach	57
Basic steps for the study of metal distributions	58
Misconception	61
Applications	62
Use of the microprobe preferable to that of the EDS-SEM	62
Use of the EDS-SEM preferable to that of the microprobe	62
Chapter 5 General principles of mineral processing	63
Introduction	63
Comminution	65
Physical separation	68
Hand sorting	68
Gravity concentration	69
Magnetic separation	70
Flotation	70
Other techniques	70
Ores to which little beneficiation is applied	71
Sintering and pelletizing	72
Roasting	72
Oxidation	73
Chlorination	73
Reduction	73
Sulfation and sulfidation	74
Chemical separation	74
Leaching	74
Solid-liquid separation	78
Solution purification and concentration	78
Smelting	79
Casting	80
Recovery from solutions – Refining	80
Precipitation	80
Electrolysis	80
Evaporation and crystallization	81
Refining	82
 PART II	
 Chapter 6 Gold	87
Introduction	87
Market value	89

Geochemistry	90
Fire assay	91
Rock types hosting gold	98
Ore microcomposition	98
Gold-bearing minerals	98
Native gold and electrum	100
The other gold-bearing minerals	101
Grain size	102
Host minerals	104
Pyrite	105
Arsenopyrite	108
Realgar and orpiment	109
Chalcopyrite	109
Secondary copper minerals	110
Other sulfides and sulfosalts	110
Oxides of iron	110
Uranium minerals	111
Quartz, silicates, carbonates and sulfates	111
Carbonaceous material (graphite/carbon)	111
Sands and gravels (placer gold)	112
Mineral associations	113
Minerals other than the host mineral	115
Mineral stability	115
Method of study	116
Metallurgy	119
Rock types hosting gold	120
Gold-bearing minerals	121
Native gold and low-silver electrum	121
High-silver electrum	122
Tellurides	123
Other gold-bearing minerals	125
Grain size and mineral associations	125
Host minerals	127
Pyrite	127
Arsenopyrite	129
Realgar and orpiment	129
Chalcopyrite and secondary copper minerals	129
Pyrrhotite	129
Marcasite	130
Galena and other lead minerals	130
Sphalerite	130
Stibnite and antimony sulfosalts	131
Other sulfides and sulfosalts	131
Oxides of iron (and other oxidized minerals)	131
Uranium minerals	131
Quartz, silicates, carbonates and sulfates	131

Carbonaceous material	132
Sands and gravels (placer gold)	132
Minerals other than the host mineral	134
Cyanicides	134
Clay and sericite	134
Carbonaceous material (graphite and carbon)	136
Mercury minerals	138
Discussion and conclusions	139
 Chapter 7 Silver	 149
Introduction	149
Market value	150
Geochemistry	151
Rock types hosting silver	152
Ore microcomposition	153
Silver-bearing minerals	153
Native silver	154
Electrum and kustelite	155
Acanthite – Argentite	155
Pyrargyrite – Proustite	155
Tetrahedrite – Tennantite	155
Polybasite, perceite and stephanite	157
Stromeyerite	157
Cerargyrite and the other silver halides	157
Argentojarosite and argentian plumbojarosite	157
Manganese minerals	157
Other minerals in which silver is a minor constituent	158
Grain size	161
Host minerals	161
Mineral associations	162
Mineral stability	162
Method of study	162
Metallurgy	164
Rock types hosting silver	165
Silver-bearing minerals	165
Native silver, electrum, acanthite, cerargyrite and secondary copper minerals	166
Tetrahedrite – Tennantite	166
Manganese minerals	167
Other silver minerals	168
Grain size and host minerals	168
Minerals other than the host mineral	170
Mineral stability	171
Discussion and conclusions	172
 Chapter 8 Differences between gold and silver and their effects on recoveries	 187

Chapter 9 Platinum group elements	193
Introduction	193
Ruthenium	193
Rhodium	194
Palladium	194
Osmium	194
Iridium	194
Platinum	194
Market value	195
Geochemistry	196
Rock types hosting the platinum group elements	197
Ore microcomposition	197
Method of study	199
Metallurgy	199
 Chapter 10 Uranium	 205
Introduction	205
Market value	206
Geochemistry	206
Rock types hosting uranium	207
Ore microcomposition	208
Uranium-bearing minerals	208
Uraninite-pitchblende	209
Secondary products after uraninite-pitchblende	209
Coffinite	210
Complex multiple oxides	210
Uranothorite	211
Thucholite	211
Miscellaneous accessory minerals	212
Grain size, host minerals and mineral associations	212
Minerals other than the host mineral	212
Mineral stability	212
Method of study	213
Metallurgy	217
The primary uranium minerals	219
The secondary products	220
The complex multiple oxides	220
 Chapter 11 Base metals	 227
Introduction	227
Method of study	228
Beryllium	230
Mineralogy	231
Metallurgy	231
Boron	232
Mineralogy	232

Metallurgy	232
Carbon	233
Mineralogy	234
Metallurgy	235
Magnesium	235
Mineralogy	236
Metallurgy	237
Aluminum	237
Mineralogy	238
Metallurgy	238
Potassium	239
Mineralogy	239
Metallurgy	240
Titanium	241
Mineralogy	241
Metallurgy	241
Chromium	242
Mineralogy	242
Metallurgy	244
Manganese	244
Mineralogy	244
Metallurgy	245
Iron	245
Mineralogy	246
Metallurgy	247
Cobalt	248
Mineralogy	248
Metallurgy	250
Nickel	250
Mineralogy	251
Metallurgy	252
Copper	253
Mineralogy	254
Metallurgy	255
Lead and zinc	258
Mineralogy	259
Metallurgy	259
Arsenic	261
Mineralogy	261
Metallurgy	261
Niobium and tantalum	262
Mineralogy	262
Metallurgy	262
Molybdenum	263
Mineralogy	264
Metallurgy	264

Tin	265
Mineralogy	265
Metallurgy	267
Antimony	267
Mineralogy	268
Metallurgy	268
Barium	268
Mineralogy	269
Metallurgy	269
Rare earths	269
Mineralogy	270
Metallurgy	271
Tungsten	271
Mineralogy	272
Metallurgy	272
Mercury	273
Mineralogy	273
Metallurgy	274
Bismuth	275
Mineralogy	275
Metallurgy	275
Recent Diamond Discoveries	277

PART III

Chapter 12 Mineral exploration	287
Determination of the origin of a mineralization	287
Evaluation of a deposit	289
Conclusions	
To what extent does microanalysis help	291
Suggestions for future research	293
Glossary of minerals, rocks and geological terms	297
References	307
Subject index	327
