

Contents

Chapter 1. Real Numbers

1.1	Introduction	1
1.2	Classification and Measurement	1
1.3	A Problem with Percentages	4
1.4	Proper and Improper Use of Percentages	6
1.5	Algebraic Laws	7
1.6	Relative Numbers	10
1.7	Inequalities	12
1.8	Mean Values	14
1.9	Summation	14
1.10	Powers	16
1.11	Fractional Powers	18
1.12	Calculations with Approximate Numbers	20
*1.13	An Application	22
1.14	Survey	23
	Problems for Solution	24

Chapter 2. Sets and Symbolic Logic

2.1	“New Mathematics”	28
2.2	Sets	28
2.3	Notations and Symbols	29
2.4	Variable Members	32
2.5	Complementary Set	32
2.6	The Union	33
2.7	The Intersection	34
*2.8	Symbolic Logic	36
*2.9	Negation and Implication	38
*2.10	Boolean Algebra	40
	Problems for Solution	44

Chapter 3. Relations and Functions

3.1	Introduction	47
3.2	Product Sets	47
3.3	Relations	50
3.4	Functions	53

3.5	A Special Linear Function	57
3.6	The General Linear Function	60
*3.7	Linear Relations	64
	Problems for Solution	69
 Chapter 4. The Power Function and Related Functions		
4.1	Definitions	74
4.2	Examples of Power Functions	75
4.3	Polynomials	81
4.4	Differences	82
4.5	An Application	85
4.6	Quadratic Equations	87
	Problems for Solution	88
 Chapter 5. Periodic Functions		
5.1	Introduction and Definition	90
5.2	Angles	91
5.3	Polar Coordinates	94
5.4	Sine and Cosine	95
5.5	Conversion of Polar Coordinates	99
5.6	Right Triangles	103
5.7	Trigonometric Relations	107
*5.8	Polar Graphs	108
*5.9	Trigonometric Polynomials	111
	Problems for Solution	117
 Chapter 6. Exponential and Logarithmic Functions I		
6.1	Sequences	119
6.2	The Exponential Function	122
6.3	Inverse Functions	124
6.4	The Logarithmic Functions	128
6.5	Applications	130
*6.6	Scaling	132
*6.7	Spirals	137
	Problems for Solution	140
 Chapter 7. Graphical Methods		
7.1	Nonlinear Scales	143
7.2	Semilogarithmic Plot	146
7.3	Double-Logarithmic Plot	149

*7.4	Triangular Charts	152
*7.5	Nomography	155
*7.6	Pictorial Views	161
	Problems for Solution	168

Chapter 8. Limits

8.1	Limits of Sequences	171
8.2	Some Special Limits	177
8.3	Series	180
8.4	Limits of Functions	183
*8.5	The Fibonacci Sequence	189
	Problems for Solution	194

Chapter 9. Differential and Integral Calculus

9.1	Growth Rates	197
9.2	Differentiation	204
9.3	The Antiderivative	212
9.4	Integrals	214
9.5	Integration	220
9.6	The Second Derivative	226
9.7	Extremes	231
9.8	Mean of a Continuous Function	239
9.9	Small Changes	243
	Problems for Solution	246

Chapter 10 . Exponential and Logarithmic Functions II

10.1	Introduction	251
10.2	Integral of $1/x$	252
10.3	Properties of $\ln x$	254
10.4	The Inverse Function of $\ln x$	256
10.5	The General Definition of a Power	258
10.6	Relationship between Natural and Common Logarithms	261
10.7	Differentiation and Integration	262
10.8	Some Limits	263
10.9	Applications	264
10.10	Approximations and Series Expansions	271
*10.11	Hyperbolic Functions	274
	Problems for Solution	277

Chapter 11. Ordinary Differential Equations

11.1	Introduction	.281
11.2	Geometric Interpretation	.282
11.3	The Differential Equation $y' = ay$	.283
11.4	The Differential Equation $y' = ay + b$	.293
11.5	The Differential Equation $y' = ay^2 + by + c$	.298
11.6	The Differential Equation $dy/dx = k \cdot y/x$	.305
11.7	A System of Linear Differential Equations	.307
11.8	A System of Nonlinear Differential Equations	.315
*11.9	Classification of Differential Equations	.320
	Problems for Solution	.321

Chapter 12. Functions of Two or More Independent Variables

12.1	Introduction	.324
12.2	Partial Derivatives	.326
12.3	Maxima and Minima	.329
*12.4	Partial Differential Equations	.334
	Problems for Solution	.340

Chapter 13. Probability

13.1	Introduction	.342
13.2	Events	.343
13.3	The Concept of Probability	.346
13.4	The Axioms of Probability Theory	.349
13.5	Conditional Probability	.352
13.6	The Multiplication Rule	.357
13.7	Counting	.361
13.8	Binomial Distribution	.368
*13.9	Random Variables	.376
*13.10	The Poisson Distribution	.382
*13.11	Continuous Distributions	.388
	Problems for Solution	.398

Chapter 14. Matrices and Vectors

14.1	Notations	.403
14.2	Matrix Algebra	.405
14.3	Applications	.412
14.4	Vectors in Space	.418
14.5	Applications	.426
	Problems for Solution	.433

Chapter 15. Complex Numbers

15.1	Introduction	.436
15.2	The Complex Plane	.437
15.3	Algebraic Operations	.440
15.4	Exponential and Logarithmic Functions of Complex Variables	.443
15.5	Quadratic Equations	.448
15.6	Oscillations	.449
	Problems for Solution	.457
	Answers to Problems	.459
	References	.468
	Author and Subject Index	.477
