List of Figures	xiii
List of Tables.....	xv
List of Notations and Symbols	xvii
1 Introduction	1
2 Mean Reversion in Commodity Prices	9
2.1 Sources of Mean Reversion	9
2.1.1 Convenience Yields	9
2.1.2 Kaldor–Working Hypothesis.....	11
2.1.3 Time-Varying Risk Premia.....	12
2.2 Empirical Evidence of Mean Reversion	13
2.3 Mean Reversion and Volatility: The Samuelson Hypothesis	14
3 Fundamentals of Derivative Pricing	17
3.1 Derivative Pricing Under the Risk-Neutral Measure.....	17
3.1.1 Introduction.....	17
3.1.2 Change of Measure for Diffusion Processes	19
3.1.3 Change of Measure for Jump-Diffusion Processes	22
3.1.4 Change of Measure if the Underlying is not a Traded Asset	25
3.2 Characteristic Functions.....	26
3.3 Fundamental Partial Differential Equation	28
3.4 European Style Derivatives	31
3.4.1 Forwards and Futures	31
3.4.2 European Options	32
3.5 Fast Fourier Algorithms	37
3.5.1 Fast Fourier Transformation	37
3.5.2 Fractional Fast Fourier Transformation	40
3.6 Recovering Single Option Prices with Gauss-Laguerre Quadrature ...	42

4	Stochastic Volatility Models	55
4.1	Square-Root Stochastic Volatility	55
4.1.1	Comparison with the Tahani Square-Root Model	56
4.1.2	Solution for the Characteristic Function	60
4.1.3	Comparison with the Monte-Carlo Solution	64
4.2	Ornstein–Uhlenbeck Stochastic Volatility	66
4.2.1	Comparison with the Tahani OU Model	67
4.2.2	Solution for the Characteristic Function	67
4.2.3	Comparison with the Monte-Carlo Solution	71
5	Integration of Jump Components	81
5.1	Simulation of Poisson Processes	82
5.2	Lognormal Jumps of the Underlying	86
5.2.1	Non-Mean-Reverting Assets	86
5.2.2	Mean-Reverting Assets	87
5.2.3	Comparison with the Monte-Carlo Solution	89
5.3	Exponentially and Γ -Distributed Jumps in the Variance Process	90
5.3.1	Exponentially Distributed Jumps	90
5.3.2	Γ -Distributed Jumps	91
5.3.3	Comparison with the Monte-Carlo Solution	92
5.4	Jumps in Both the Underlying and Variance Process	93
5.4.1	Independent Jumps	93
5.4.2	Correlated Jumps	95
6	Stochastic Equilibrium Level	101
6.1	Constant Volatility	101
6.1.1	Mean-Reverting Equilibrium Level	101
6.1.2	Brownian Motion with Drift	103
6.2	Integration of Square-Root Stochastic Volatility	105
6.2.1	Mean-Reverting Equilibrium Level	105
6.2.2	Brownian Motion with Drift	106
6.3	Other Model Extensions	112
6.3.1	Ornstein–Uhlenbeck Stochastic Volatility	113
6.3.2	Model Extensions with Jump Components	114
7	Deterministic Seasonality Effects	115
7.1	Seasonality in the Log-Price Process	116
7.1.1	Constant Volatility	118
7.1.2	Square-Root Stochastic Volatility	119
7.1.3	Other Model Extensions	121
7.2	Seasonal Impact of Volatility	121
7.2.1	Seasonal Variance According to Richter and Sørensen	121
7.2.2	Modeling of Seasonality in the Variance Process	122
8	Conclusion	127
