

Contents

Chapter 1	<u>Introduction</u>	1
	1. General Considerations	1
	2. Methodology	3
Chapter 2	<u>The Tissues</u>	7
	1. Principles	7
	2. Molecular Unity and Diversity	7
	3. Morphology	13
Chapter 3	<u>Collagen</u>	15
	1. Identification	15
	2. Chemical Structure	16
	a) Primary and Direct-Coded Structure	16
	b) Secondary and Non-Coded Structure	18
	i) Cross-Links	18
	ii) Aldehydes	21
	iii) Hydroxyl Groups	21
	iv) Carbohydrate Groups	21
	v) Other Functional Groups	24
	3. Aggregate Forms	25
	4. Stability	25
	5. Comparative Biochemistry	28
	6. Invertebrate Collagen	29
	a) Porifera	29
	b) Coelenterata	30
	c) Platyhelminthes	33
	d) Annelida	33
	e) Aschelminthes	37
	f) Arthropoda	38
	g) Mollusca	38
	h) Brachiopoda	39
	i) Echinodermata	40
	7. Deuterostomia	41
	8. Chordata Acrania Collagen	42
	a) Urochordata (Tunicata)	42
	b) Cephalochordata	42
	9. Chordata Craniata (Vertebrate) Collagen	42
	a) Cyclostomata	43
	b) Chondrichthyes (Cartilage Fish)	43
	i) Dermal Collagen	43
	ii) Elastoidin	44
	iii) Ovokeratin	45
	iv) Cornea	45
	c) Osteichthyes (Bony Fish)	45
	d) Reptilia and Amphibia	46
	e) Aves	46

VIII

f) Mammalia	49
10. Basement Membranes and Vitrosin	52
11. Biosynthesis	54
a) Polypeptide Synthesis	54
b) Hydroxylation	55
c) Glycosylation	56
d) Aldehyde Formation	56
12. Immunology	57
13. Evolution	58
a) General Considerations	58
b) Variation in Thermal Stability	58
i) Correlation with Composition	58
ii) Correlation with Environmental Temperature	62
iii) Biological Significance	63
c) Fossils	65
d) Origins and Remote Ancestry	66
e) Molecular Phylogeny	69
i) Amino Acid Composition	72
ii) Amino Acid Sequence	76
iii) Secondary Chemical Structure	77
14. Development and Aging	77
 Chapter 4 <u>Elastin</u>	 79
1. Identification	79
2. Primary Structure	79
3. Secondary Chemical Features	81
a) Cross-Links	81
b) Aldehydes	82
c) Hydroxylation	82
4. Fibril Organization	82
5. Comparative Biology	84
 Chapter 5 <u>Structural Glycoproteins</u>	 86
1. Characterization	86
a) Definition	86
b) Structure	87
c) Biosynthesis	88
d) Immunology	88
e) Biological Function	88
2. Invertebrate	88
3. Vertebrate	89
a) Aorta	89
b) Ligament and Tendon	89
c) Skin	89
d) Cartilage	91
e) Bone, Enamel, and Dentin	91
f) Cornea	91
g) Brain	91
h) Other Sources	92
4. Conclusions	92
 Chapter 6 <u>Polyanionic Proteoglycans</u>	 93
1. Characterization as Parent Types	94
a) Glycosaminoglycans	94
i) Hyaluronate	97

ii)	Chondroitin 4-Sulfate, Chondroitin 6-Sulfate	97
iii)	Dermatan Sulfate (Chondroitin Sulfate B) ..	98
iv)	Keratan Sulfate	99
v)	Heparan Sulfate	99
vi)	Heparin	100
b)	Proteoglycosaminoglycan of Cartilage and Notochord	100
i)	Parent Type	100
ii)	Relationship to Skeletal Keratan Sulfate ..	103
iii)	Aggregates	103
c)	Other Proteoglycosaminoglycans	104
i)	Skeletal Keratan Sulfate	104
ii)	Corneal Keratan Sulfate	105
iii)	Dermatan Sulfate	105
iv)	Hyaluronate	105
v)	Heparan Sulfate	105
vi)	Heparin	105
2.	Structure of the Linkage Region	106
a)	Proteoglycans of Chondroitin Sulfate Type	106
i)	Vertebrates	106
ii)	Invertebrates	107
b)	Proteoglycans of Other Types	108
i)	Dermatan Sulfate	108
ii)	Corneal Keratan Sulfate	108
iii)	Skeletal Keratan Sulfate	108
iv)	Hyaluronate	109
v)	Heparin	109
vi)	Heparan Sulfate	109
3.	Comparative Macromolecular Structures of Proteoglycans	109
a)	Cyclostomes	110
b)	Chondrichthyes	110
c)	Osteichthyes	111
d)	Amphibia	111
e)	Reptiles	111
f)	Birds	111
g)	Mammals	111
h)	Invertebrates	115
4.	Biosynthesis	115
a)	Precursors	116
i)	Vertebrates	116
ii)	Invertebrates	116
b)	Assembly of Biosynthetic Units in Vertebrates ..	116
i)	Chondroitin Sulfate Type	117
ii)	Dermatan Sulfate Type	118
iii)	Heparin and Heparan Sulfate Types	118
iv)	Keratan Sulfate Types	119
v)	Hyaluronic Acid	119
c)	Assembly of Biosynthetic Units in Invertebrates	119
d)	Regulation of Biosynthesis	119
5.	Immunology	120
6.	Evolutionary Relationships	122
a)	Proteoglycans of Cartilage and Notochord	122
i)	Macromolecular Architecture	122
ii)	Polypeptide Structure	122
iii)	Glycan Structure	123
b)	Other Proteoglycans	123
c)	Perspectives	123

Chapter 7	<u>Polyanionic Glycans of Cartilage, Bone and Notochord</u>	126
1.	Biological Significance	126
a)	Cartilage and Bone	126
b)	Notochord	128
c)	Taxonomic Interpretation	128
2.	Invertebrates	129
a)	Annelida	132
b)	Mollusca	133
i)	Gastropod Odontophore Cartilage	133
ii)	Cephalopod Cartilage	135
c)	Arthropoda	136
d)	Evolution	136
3.	Lower Deuterostomia	138
4.	Vertebrates	139
a)	Cyclostomata	139
i)	Hagfish	140
ii)	Lamprey	140
b)	Chondrichthyes	141
i)	Ratfish (Holocephali)	141
ii)	Sharks (Pleurotremata) of Marine Habitat ..	142
iii)	Rays and Skates (Hypotremata) of Marine Habitat	142
iv)	Marine Sharks of Fresh Water	143
v)	Rays of Freshwater Habitat	144
vi)	Conclusions	145
c)	Osteichthyes	146
i)	Actinopterygii	146
ii)	Dipnoi	147
iii)	Crossopterygii	147
d)	Tetrapoda	150
i)	Amphibia	150
ii)	Reptilia	152
iii)	Aves	152
iv)	Mammalia	152
5.	Calcified Cartilage, Bone and Teeth	152
6.	Discussion	154
Chapter 8	<u>Polyanionic Glycans in Development and Aging of Vertebrate Cartilage</u>	156
1.	General Considerations	156
2.	Lower Vertebrates	158
3.	Amphibia	158
4.	Birds	159
5.	Mammals	161
a)	Rat	161
b)	Hog	162
c)	Rabbit	162
d)	Ox	162
e)	Man	164
i)	Histochemical Studies	164
ii)	Chemical Studies	164
6.	Discussion	167
a)	Functional Roles of Proteoglycans	167
b)	Embryonic Development and Maturation	167
c)	Aging	169

Chapter 9	<u>Polyanionic Glycans of Other Tissues</u>	172
1.	Introduction	172
2.	Invertebrates	172
	a) Protista	172
	b) Porifera	173
	c) Coelenterata	174
	d) Annelida	175
	e) Arthropoda	175
	f) Mollusca	176
	i) Mucins	176
	ii) Glycans of Shell and Mantle	177
	iii) Mactin and Spisulan	177
	iv) Glycans of Cephalopod Eye and Skin	178
	g) Brachiopoda	180
	h) Echinodermata	181
3.	Chordata Acrania	182
	a) Urochordata (Tunicata)	182
	b) Cephalochordata	182
4.	Chordata Craniata (Vertebrata)	182
	a) Skin	183
	i) Cyclostomes	183
	ii) Chondrichthyes	184
	iii) Osteichthyes	184
	iv) Amphibia	185
	v) Aves	187
	vi) Mammalia	188
	b) Cornea	189
	i) Chondrichthyes	190
	ii) Osteichthyes	190
	iii) Reptilia	190
	iv) Aves	190
	v) Mammalia	191
	c) Vitreous and Other Tissues of the Eye	192
	i) Vitreous	192
	ii) Other Tissues of the Eye	192
	d) Blood Vessels	193
	i) Man	195
	ii) Other Vertebrates	195
	e) Intervertebral Disc	195
	f) Eggs and their Matrices	195
	i) Teleosts	195
	ii) Amphibia	196
	iii) Birds	196
	iv) Mammals	197
	g) Neural Tissues	197
	h) Electrorceptors and Electric Organs	199
	i) Electrorceptors	199
	ii) Electric Organs	200
	i) Cells that Store Glycosaminoglycans	201
	i) Leukocytes	201
	ii) Kurloff Cells	201
	iii) Mast Cells	201
	j) Tumors	202
	k) Some Other Sources	202
	i) Body Fluids	202
	ii) Kidney	202
	iii) Liver	202
	iv) Umbilical Chord (Human)	203
	v) Placenta	203
	vi) Tendon	203

vii) Rooster Comp	204
viii) Allantoic Fluid	204
ix) Toad Venom	204
x) Lungs and Gills	204
5. Discussion	205
a) Origins and Taxonomy	205
b) Development and Aging	205
c) Evolution	206
 Chapter 10 <u>Molecular Interrelationships and Functions</u>	207
1. General Considerations	207
2. Primary Level - Molecular Properties	211
a) Collagen	211
b) Elastin	212
c) Polyanionic Proteoglycans	212
i) Conformation and Molecular Size	213
ii) Cation Binding	217
iii) Water Binding and Osmotic Pressure	220
iv) Molecular Exclusion	222
3. Macromolecular Interactions	223
a) Primary (Homotypic) Interactions	223
i) Collagen	223
ii) Elastin	223
iii) Polyanionic Proteoglycans	224
iv) Structural Glycoproteins	224
b) Secondary (Heterotypic) Interactions	224
i) Collagen	224
ii) Elastin	227
iii) Polyanionic Glycans and Proteoglycans ...	227
iv) Structural Glycoproteins	228
c) Tertiary (Complex Heterotypic) Interactions	228
i) Collagenous Structures	229
ii) Elastic Structures	231
iii) Polyanionic Glycans and Proteoglycan Structures	231
iv) Structural Glycoprotein Structures	232
4. The Tissues	232
a) Skin	232
b) Cornea	233
c) Vitreous	235
d) Cartilage	235
5. Extrinsic Factors Influencing Function	237
a) Mechanical Factors - Physical Feedback	238
b) Matrix Macromolecules - Chemical Feedback ..	239
i) Biosynthesis of Matrix	239
ii) Interactions between Cells	240
6. Conclusions	242
 Chapter 11 <u>Conclusion</u>	245
 <u>References</u>	252
 <u>Subject Index</u>	307
