The Electrical Resistivity of Pure and Gas Covered Metal Films

By P. Wißmann. With 48 Figures

1. Introduction.....	1
2. Experimental.....	4
3. Structure of the Films.....	13
4. The Resistivity of Pure Metal Films.....	23
4.1 Theoretical Treatment.....	23
4.1.1 The Theory of Fuchs and Sondheimer.....	24
4.1.2 The Theory of Mayadas and Shatzkes.....	25
4.1.3 The Scattering Hypothesis.....	26
4.1.4 Comparison of the Theories.....	29
4.2 Experimental Results.....	33
5. The Temperature Dependence of Resistivity of Pure Metal Films.	44
5.1 Theoretical Aspects.....	44
5.2 Experimental Results.....	46
5.3 Limits of the Free Electron Gas Model.....	52
6. Resistivity Change Due to Gas Adsorption.....	57
6.1 Theoretical Treatment.....	57
6.1.1 Suhrman Model.....	57
6.1.2 Sachtler Model.....	59
6.1.3 Fuchs-Sondheimer Model.....	61
6.1.4 The Scattering Hypothesis.....	62
6.2 Experimental Results.....	63
6.2.1 Effect of Film Thickness.....	63
6.2.2 Effect of Annealing Temperature.....	67
6.2.3 Effect of Measuring Temperature.....	70
6.3 The Maximum Value of Resistivity Increase.....	72
6.4 The Discussion of the Over-all Curve $\Delta\rho(n)$	77
6.5 Changes in Hall Constant and Thermoelectric Power.....	80
7. Resistivity and Heat of Adsorption.....	83
8. Concluding Remarks.....	86
References.....	89

How Much Can Auger Electrons Tell Us About Solid Surfaces?

By K. Müller. With 10 Figures

1. Introduction.....	97
2. The Distribution $N(E)$	98
3. Energy Levels of the Sample.....	99
4. Some Important Interactions.....	100
4.1 Inelastic Loss Spectroscopy (ILS).....	100
4.2 Disappearance Potential Spectroscopy (DAPS).....	100
4.3 Appearance Potential Spectroscopy (APS).....	102
4.4 Auger Electron Spectroscopy (AES).....	102
4.5 Photoelectron Spectroscopy (XPS, UPS).....	103
5. Instrumentation.....	103
6. Auger Transitions.....	105
7. Inspection of an Auger Spectrum.....	106
8. The Qualitative Element Analysis.....	107
9. Steps Towards Quantitative Analysis.....	109
10. Deconvolution.....	112
11. Line Shape and the Density of States.....	113
12. Line Shape and Chemical Environment.....	115
13. Auger Electrons from Compound Solids.....	117
14. The Concept of Cross Transitions.....	118
15. A Potential Example: Cs-C.....	119
16. Metal Oxides.....	121
17. Conclusion.....	123
Abstract.....	123
Acknowledgement.....	123
References.....	124
