1	Introduction	
	R.S. Berry and H. Haberland (With 2 Figures)	1
1.1	What are Clusters?	2
1.2	What Makes Clusters Interesting?	5
1.3	How Does One Make Clusters?	6
1.4	Experiments with Clusters	7
1.5	Experiments Not Possible Today	8
1.6	Cluster, Tantalizing Subjects for Theoretical Studies	9
1.7	Clusters Make New Kinds of Materials	10
1.8	New Chemistry	11
1.9	Outlook	12
2	Theoretical Concepts	13
2.1	Quantum Chemistry of Clusters V. Bonačič-Koutecký, P. Fantucci, and J. Koutecký (With 9 Figures)	15
2.1.1	Introduction	16
2.1.2	Quantum Mechanical Background	30
2.1.3	Ground State Properties of Metal Clusters	37
2.1.4	Excited States of Alkali Metal Clusters and their Spectroscopical Properties	37
2.1.5	Conclusions	46
	References	48
2.2	Tight-Binding and Hückel Models of Molecular Clusters D.A. Jelski, T.F. George, and J.M. Vienneau (With 8 Figures).	50
2.2.1	Introduction	50
2.2.2	Quantum Chemistry Background	51
2.2.3	Application to Clusters	54
2.2.4	TB Model Applied to Silicon Clusters	55
2.2.5	Applications of the Hückel Model	63
2.2.6	Conclusions	65
	References	65
2.3	Density Functional Calculations for Clusters R.O. Jones (With 5 Figures)	67
2.3.1	Introduction	67

2.3.2	Calculating Structures	68
2.3.3	Application to Clusters of Group VIa Elements	74
2.3.4	Structure of Phosphorus Clusters, P_2 to P_{10}	79
2.3.5	Models Based on Electron Gas Calculations	80
2.3.6	Concluding Remarks	83
	References	84
2.4	Transition from van der Waals to Metallic Bonding in Clusters	
	G.M. Pastor and K.H. Bennemann (With 17 Figures)	86
2.4.1	Introduction	86
2.4.2	Theory for the Electronic Properties of Divalent- Metal Clusters	90
2.4.3	Properties of Hg_n -Clusters as a Function of Cluster Size: The Transition from van der Waals to Covalent to Metallic Bonding	95
2.4.4	Summary and Outlook	104
	Appendix A: Slave-Boson Approach to Electron Correlations in Small Clusters	107
	Appendix B: On the Size Dependence of the Ionization Energy of Small Clusters	110
	References	113
2.5	Analytic Cluster Models and Interpolation Formulae for Cluster Properties	
	H. Müller, H.-G. Fritsche, and L. Skala (With 13 Figures) . . .	114
2.5.1	Introduction	114
2.5.2	Special Role of the Analytic Cluster Model (ACM) . . .	114
2.5.3	Quantum Chemical Analytic Cluster Model (QACM) .	116
2.5.4	Topological Analytic Cluster Model (TACM)	126
2.5.5	Theoretical Background of Interpolation Formulae . . .	133
2.5.6	Concluding Remarks	138
	References	138
2.6	Shell Structure in Atoms, Nuclei and in Metals Clusters	
	S. Bjørnholm (With 9 Figures)	141
2.6.1	Quantum Shells in Spherical Fermion Systems	141
2.6.2	Nuclear Shell Structure and Deformations	146
2.6.3	Shells and Supershells in Large Fermion Systems . . .	153
2.6.4	Further Reading	161
2.6.5	Recent Developments	161
	References	162
2.7	Introduction to Statistical Reaction Rate Theories	
	M.F. Jarrold (With 8 Figures)	163
2.7.1	Introduction	163
2.7.2	RRK Theory	163
2.7.3	RRKM Theory and the Transition State	165
2.7.4	Phase Space Theory	169
2.7.5	Product Kinetic Energy Distributions	176

2.7.6	Evaporative Cooling	181
2.7.7	Determining Cluster Dissociation Energies	182
2.7.8	Problems Associated with the Application of Statistical Theories to Clusters	183
2.7.9	Summary	185
	References	186
2.8	Melting and Freezing of Clusters: How They Happen and What They Mean	
	R.S. Berry (With 8 Figures)	187
2.8.1	Introduction: The "Phases" of Clusters	188
2.8.2	Theoretical Basis	189
2.8.3	Simulations and Experiments	195
2.8.4	Implications for Bulk Matter	202
	References	204
3	Experimental Methods	
	H. Haberland (With 34 Figures)	205
3.1	Sources	207
3.1.1	Supersonic Jets	208
3.1.2	Gas Aggregation	223
3.1.3	Surface Erosion Sources	225
3.1.4	Pick-up Sources	227
3.2	Detection of Cluster Ions	229
3.3	Electron Diffraction	231
3.4	Methods for the Production of (Nearly) Mass Selected Neutral Cluster Beams	
	U. Buck	232
3.4.1	Scattering from Atomic Beams	233
3.4.2	Re-Neutralization of Ions	237
3.4.3	Summary	239
3.5	Mass Spectrometers	239
3.6	Optical Spectroscopy	243
3.7	Infrared Spectroscopy	
	G. Scoles	245
3.8	Photo Electron Spectroscopy	247
3.9	Recent Developments	249
	References	250
4	Across the Periodic Table	
4.1	Alkali Clusters	
	C. Bréchnignac (With 17 Figures)	255
4.1.1	Introduction	255
4.1.2	Ionization of s^1 Clusters	255
4.1.3	Stability of s^1 Clusters	263
4.1.4	Optical Response of s^1 Clusters	278
	References	286

4.2	Clusters of s^2p^1 Metals and Semiconductors	
	M.F. Jarrold (With 12 Figures)	288
4.2.1	Introduction	288
4.2.2	Boron Clusters	288
4.2.3	Aluminum Clusters	293
4.2.4	Gallium, Indium, and Thallium Clusters	309
4.2.5	Conclusions	311
	References	312
4.3	Transition Metal Clusters: Physical Properties	
	M.F. Jarrold (With 6 Figures)	315
4.3.1	Introduction	315
4.3.2	Electronic Configuration and Bonding	315
4.3.3	Mass Spectra and Magic Numbers	317
4.3.4	Ionization Energies	317
4.3.5	Dissociation and Dissociation Energies	320
4.3.6	Magnetic Properties	322
4.3.7	Optical Spectroscopy	323
4.3.8	Electron Affinities and Photoelectron Spectroscopy	325
4.3.9	Geometric Structure	327
4.3.10	Summary	328
	References	328
4.4	Carbon Clusters	
	E.E.B. Campbell (With 18 Figures)	331
4.4.1	Introduction	331
4.4.2	The Small Clusters	333
4.4.3	The Fullerenes: C_n with $n \geq 24$	339
4.4.4	The "Buckyball" Era	349
4.4.5	Recent Developments	353
	References	353
4.5	Oxides and Halides of Alkali Metals	
	T.P. Martin (With 9 Figures)	357
4.5.1	Introduction	357
4.5.2	Interatomic Forces	358
4.5.3	Neutral Clusters at Zero Temperature	359
4.5.4	Charged Clusters at Zero Temperature	362
4.5.5	Catchment Area and Free Energy	363
4.5.6	Atomic Vibrations	366
4.5.7	Photoionization of Cs-O Clusters	368
4.5.8	Recent Developments	372
	References	372
4.6	Rare Gas Clusters	
	H. Haberland (With 12 Figures)	374
4.6.1	Neutral Rare Gas Clusters in the Ground	
	Electronic State	377

4.6.2	Potentials for Excited and Ionized Rare Gas Dimers and Clusters	379
4.6.3	Experiments with Neutral Rare Gas Clusters	381
4.6.4	Experiments with Positively Charged Rare Gas Clusters	389
4.6.5	Experiments with Negatively Charged Rare Gas Clusters	394
4.6.6	Summary	394
	References	394
4.7	Neutral Molecular Clusters	
	U. Buck (With 10 Figures)	396
4.7.1	Introduction	396
4.7.2	Structure Calculations	397
4.7.3	Electronic Spectroscopy	401
4.7.4	Vibrational Spectroscopy	404
4.7.5	Infrared Photodissociation of Size Selected Clusters . . .	407
4.7.6	Summary	413
4.7.7	Recent Developments	415
	References	416
	Subject Index	419
