Spasticity: History, Definitions, and Usage of the Term A.F. Thilmann (With 1 Figure) .....	1
 <b>Part I Descending Control of Movement</b>	
Organisation of Cortico-motoneuronal Projections from the Primary Motor Cortex: Evidence for Task-Related Function in Monkey and in Man A. Turton, C. Fraser, D. Flament, W. Werner, K.M.B. Bennett, and R.N. Lemon (With 4 Figures) .....	8
Investigation of Descending Motor Pathways in Man J.C. Rothwell, T.C. Britton, P. Brown, B.L. Day, J. Fong, P.D. Thompson, and K. Werhahn (With 4 Figures) .....	25
Propriospinal Transmission of Voluntary Movement in Humans E. Pierrot-Deseilligny and D. Mazevet (With 4 Figures) ..	40
The Site of Activation of the Corticospinal System by Transcranial Magnetic and Electrical Stimulation of the Human Motor Cortex D.J. Burke, R. Hicks, J. Stephen, I. Woodforth, and M. Crawford (With 3 Figures) .....	57
Plasticity of the Human Motor Cortex M. Hallett, L.G. Cohen, A. Pascual-Leone, J. Brasil-Neto, E.M. Wassermann, and A.N. Cammarota (With 4 Figures) .....	67
Discussion Summary E. Jankowska .....	82
Discussion Summary J. Noth .....	84

**Part II    Disturbance of Voluntary Movement**

The Role of the Corticospinal Tract in Spasticity Studied by Magnetic Brain Stimulation R. Benecke (With 3 Figures) . . . . .	89
Do Rapidly Conducting Ipsilateral Corticospinal Pathways Contribute to Recovery in Adult Hemiplegia? P. Ashby, E. Palmer, and V.E. Hajek (With 5 Figures) . . .	101
Strength Changes in Hemiparesis: Measurements and Mechanisms S.C. Gandevia (With 4 Figures) . . . . .	111
Factors Underlying Abnormal Posture and Movement in Spastic Hemiparesis J.P.A. Dewald and W.Z. Rymer (With 4 Figures) . . . . .	123
Disturbances of Voluntary Arm Movement in Human Spasticity: The Relative Importance of Paresis and Muscle Hypertonia S.J. Fellows, C. Kaus, H.F. Ross, and A.F. Thilmann (With 4 Figures) . . . . .	139
Spastic Movement Disorder: Similarities and Differences in Children and Adults W. Berger and V. Dietz . . . . .	150
Hyper-reflexia and Disordered Voluntary Movement G.L. Gottlieb and B.M. Myklebust (With 6 Figures) . . . . .	155
Discussion Summary M. Hallett . . . . .	167
Discussion Summary J. Eyre and S. Miller . . . . .	170

**Part III    Spinal Pathophysiology: Animal Models**

Regulated Properties of Motoneurons and Primary Afferents: New Aspects on Possible Spinal Mechanisms Underlying Spasticity J. Nielsen and H. Hultborn (With 4 Figures) . . . . .	177
---	-----

Functional Properties of the Neuromuscular System and Force Gradation D. Kernell (With 3 Figures) .....	193
Development of an Animal Model for the Study of Spinal Spasticity J.S. Taylor, C.J. Vierck, Jr., and J.B. Munson (With 5 Figures) .....	204
Monoaminergic Inhibitory Control of Spinal Interneurons E. Jankowska (With 4 Figures) .....	222
Discussion Summary D.J. Burke .....	233
 <b>Part IV Reflex Disturbances in Spasticity: Movement Studies</b>	
Pathological Changes in Spastic Muscle Reflexes Evoked by Passive Stretch or Tendon Taps A.F. Thilmann, S.J. Fellows, and H.F. Ross (With 4 Figures) .....	239
Spastic Paresis: Reflex Activity and Muscle Tone in Elbow Muscles During Passive and Active Motor Tasks V. Dietz, I.K. Ibrahim, M. Trippel, and W. Berger (With 6 Figures) .....	251
Discussion Summary S. Miller .....	266
 <b>Part V Reflex Disturbances in Spasticity: Electrophysiological Studies</b>	
Methodological Problems in the Hoffmann Reflex Study of Spasticity N. Yanagisawa, M. Shindo, H. Morita, and S. Yanagawa (With 4 Figures) .....	273
Signs of the Upper Motoneuron Syndrome in Relation to Soleus Hoffmann Reflex Tests B.W. Ongerboer de Visser, J.H.T.M. Koelman, L.J. Bour, and A.A.J. Hilgevoord (With 5 Figures) .....	287

Pathophysiological Mechanisms of Spasticity at the Spinal Cord Level P.J. Delwaide .....	296
Dynamics of Reflex Excitability Following Intrathecal Baclofen Administration in Patients with Severe Spastic Syndromes J. Dressnandt, A. Konstanzer, and B. Conrad (With 7 Figures) .....	309
Task-Dependent Spinal Inhibition in Spastic Hemiplegia S. Miller and R. Plant (With 4 Figures) .....	319
Late Flexion Reflex in Paraplegic Patients: Evidence for a Spinal Stepping Generator A. Roby-Brami and B. Bussel (With 3 Figures) .....	333
Kinematics of the Cat Hindlimb After Spinal Cord Hemisection J.P. Kuitz-Buschbeck, A. Boczek-Funcke, C. Weinhardt, and M. Illert (With 6 Figures) .....	344
Discussion Summary E. Pierrot-Deseilligny .....	355
Discussion Summary G. Gottlieb .....	358
 <b>Part VI Treatment and Rehabilitation</b>	
Spasticity of the Lower Urinary Tract: Therapeutic Strategies E. Möbius (With 3 Figures) .....	363
New Developments in the Medical Treatment of Spasticity M. Emre (With 2 Figures) .....	372
Muscle Relaxant Action of Excitatory Amino Acid Antagonists M. Schwarz and F. Block (With 4 Figures) .....	385
Effect of Intrathecal Baclofen on Monosynaptic Reflex in Man B. Bussel, P. Azouvi, and A. Roby-Brami (With 4 Figures) .....	398

Comparison of Cyproheptadine, Clonidine and Baclofen on the Modulation of Gait Pattern in Subjects with Spinal Cord Injury K.E. Norman and H. Barbeau (With 3 Figures) . . . . .	410
Neurophysiological Mechanisms of Spasticity Modification by Physiotherapy H. Hummelsheim and K.-H. Mauritz (With 4 Figures) . . .	426
Is Rehabilitation Effective in Spastic Syndromes? V. Hömberg (With 4 Figures) . . . . .	439
Discussion Summary B. Conrad . . . . .	451
<b>Subject Index</b> . . . . .	455
