

Contents

Preface	v
1 Optical amplification	1
1.1 Interaction of radiation with matter	2
1.2 Absorption and optical gain	9
1.3 Creation of a population inversion	20
1.4 Laser rate equations	25
2 Properties of solid-state laser materials	32
2.1 Survey of solid-state laser materials	32
2.2 Ruby	44
2.3 Nd:YAG	53
2.4 Nd:Glass	61
2.5 Comparison of ruby, Nd:YAG, and Nd:Glass	65
2.6 Other solid-state laser materials	67
3 Laser oscillator	74
3.1 Operation at threshold	75
3.2 Gain saturation	80
3.3 Circulating power	83
3.4 Output versus input calculations	84
3.5 Output fluctuations	91
3.6 Examples of regenerative oscillators	98
3.7 Traveling-wave oscillator	120
4 Laser amplifier	123
4.1 Pulse amplification	125
4.2 Steady-state amplification	149

4.3	Signal distortion	155
4.4	Gain limitation and amplifier stability	162
5	Optical resonator	171
5.1	Transverse modes	172
5.2	Longitudinal modes	204
5.3	Temporal and spectral stability	229
5.4	Hardware design	236
6	Optical pump systems	245
6.1	Pump sources	245
6.2	Power supplies	278
6.3	Pump cavities	300
7	Heat removal	344
7.1	Thermal effects in laser rods	344
7.2	Cooling techniques	382
7.3	Noncylindrical laser elements	390
8	Q-switches and external switching devices	397
8.1	Pulse-reflection mode Q-switches	397
8.2	Pulse transmission mode Q-switches	441
8.3	Optical gates external to resonator	446
9	Mode locking	456
9.1	Passive mode locking	461
9.2	Active mode locking	474
10	Nonlinear devices	489
10.1	Second-harmonic generation	491
10.2	Parametric oscillators	524
11	Design of lasers relevant to their application	537
11.1	Lasers for general research	538
11.2	Lasers for holography	551
11.3	Materials-processing laser systems	555
11.4	Lasers for lunar and satellite ranging	559
11.5	Military lasers	566
11.6	Systems employed in fusion experiments	574
12	Damage of optical elements	585
12.1	Surface damage	586
12.2	Inclusion damage	588
12.3	Self-focusing	589

12.4	Damage threshold of optical materials	595
12.5	System design considerations	601
Appendix A: Laser safety		609
Appendix B: Conversion factors and constants		614
Subject Index		616
