1	Hardwired Interpretation of Control Algorithms	1
1.1	Principle of Microprogram Control	1
1.2	Control Algorithm Interpretation with Finite State Machines	4
1.3	Control Algorithm Interpretation with Microprogram Control Units	10
1.4	Organization of Compositional Microprogram Control Units	22
	References	25
2	Matrix Realization of Control Units	29
2.1	Primitive Matrix Realization of FSM	29
2.2	Optimization of Mealy FSM Matrix Realization	35
2.3	Optimization of Moore FSM Logic Circuit	42
	References	52
3	Evolution of Programmable Logic	53
3.1	Simple Field-Programmable Logic Devices	53
3.2	Programmable Logic Devices Based on Macrocells	60
3.3	Programmable Devices Based on LUT Elements	64
3.4	Design of Control Units with FPLD	67
	References	71
4	Optimization for Logic Circuit of Mealy FSM	77
4.1	Synthesis of FSM with Replacement of Logical Conditions	77
4.2	Synthesis of FSM with Encoding of Collections of Microoperations	86
4.3	Synthesis of FSM with Encoding of Rows of Structure Table	92

4.4	Synthesis of FSM Multilevel Logic Circuits	95
	References	102
5	Optimization for Logic Circuit of Moore FSM	103
5.1	Optimization for Two-Level FSM Model	103
5.2	FSM Synthesis for CPLD with Embedded Memory Blocks	112
5.3	Synthesis of Moore FSM with Logical Condition Replacement	120
	References	126
6	FSM Synthesis with Transformation of GSA	129
6.1	Optimization of Logical Condition Replacement Block	129
6.2	Optimization for Block for Decoding of Microoperations	138
6.3	Synthesis of Multilevel FSM Models	145
	References	153
7	FSM Synthesis with Object Code Transformation	155
7.1	Principle of Object Code Transformation	155
7.2	Logic Synthesis for Mealy FSM with Object Code Transformation	157
7.3	Logic Synthesis for Moore FSM with Object Code Transformation	168
7.4	Multilevel Models of FSM with Object Code Transformation	181
	References	190
8	FSM Synthesis with Elementary Chains	193
8.1	Basic Models of FSM with Elementary Chains	193
8.2	Optimization of Block of Input Memory Functions	201
8.3	Optimization of Block of Microoperations	208
8.4	Synthesis for Multilevel Models of FSM with Elementary Chains	218
	References	227
9	Conclusion	229
