

Table of Contents

Analysing the Orbital Movement and Trajectory of LEO (Low Earth Orbit) Satellite Relative to Earth Rotation	1
<i>Nafeesa Bohra, Hermann De Meer, and Aftab. A. Memon</i>	
A Cross-Layer PEP for DVB-RCS Networks	12
<i>Giovanni Giambene and Snezana Hadzic</i>	
Triple Play over Satellite, Ka-Band Making the Difference	20
<i>Guillaume Benoit, Hector Fenech, and Stefano Pezzana</i>	
Time Scheduling Based on Tradeoff between Detection Performance and QoS Requirement	29
<i>Jun Sun and Hongbo Zhu</i>	
Study of the Quantum Channel between Earth and Space for Satellite Quantum Communications	37
<i>Cristian Bonato, Andrea Tomaello, Vania Da Deppo, Giapiero Naletto, and Paolo Villorresi</i>	
Spectral Analysis of Experimental Ka-Band Propagation Measurements over the Australian LEO Microsatellite 'FedSat'	41
<i>Thorsten Kostulski and Sam Reisenfeld</i>	
Satellite Broadband Revolution: How Latest Ka-Band Systems Will Change the Rules of the Industry. An Interpretation of the Technological Trajectory	49
<i>Fabio Valle</i>	
Performance Enhanced Proxy Solutions for Satellite Networks: State of the Art, Protocol Stack and Possible Interfaces	61
<i>Igor Bisio, Mario Marchese, and Maurizio Mongelli</i>	
PEPsal Performance Analysis on Disruptive Radio Channels	68
<i>Carlo Caini, Rosario Firrincieli, and Daniele Lacamera</i>	
PEP Deployment and Bandwidth Management Issues	77
<i>Charles Younghusband, Peter Slade, and Jeff Weaver</i>	
High Altitude Platforms: Radio Resource Management Policy for MBMS Applications	85
<i>Alessandro Raschellà, Giuseppe Araniti, Antonio Iera, and Antonella Molinaro</i>	

Frequency Tracking Performance Using a Hyperbolic Digital-Phase Locked Loop for Ka-Band Communication in Rain Fading Channels	94
<i>Kandeepan Sithamparanathan and Radoslaw Piesiewicz</i>	
Design and Implementation of P2P Streaming Systems for Webcast	103
<i>Yusuke Gotoh, Kentaro Suzuki, Tomoki Yoshihisa, and Masanori Kanazawa</i>	
Comparisons on Performances in MIMO Systems under Different Propagation Environments	111
<i>Jun Sun and Hongbo Zhu</i>	
Combined Congestion Control and Link Selection Strategies for Delay Tolerant Interplanetary Networks	122
<i>Igor Bisio, Tomaso de Cola, Fabio Lavagetto, and Mario Marchese</i>	
Broadband Satellite Multimedia (BSM) Security Architecture and Interworking with Performance Enhancing Proxies	132
<i>H. Cruickshank, R. Mort, and M. Berioli</i>	
A Satellite-Based Infrastructure Providing Broadband IP Services on Board High Speed Trains	143
<i>Eros Feltrin and Elisabeth Weller</i>	
Author Index	153
