

CONTENTS

1.	Discovery of Aspartylglycosaminuria in England	1
	<i>R.J. Pollitt</i>	
2.	Peptiduria and Subsequent Aspartylglycosaminuria in Finland	11
	<i>Jorma Palo</i>	
	Abnormal Spot	11
	Abnormal Face	14
	Abnormal Peptide	14
	New Disease	15
	New Directions	16
3.	Clinical Manifestations of Aspartylglycosaminuria	19
	<i>Maria Arvio, Seppo Autio and Tarja Mononen</i>	
	Early Clinical Symptoms	20
	Progressive Mental and Motor Deterioration	20
	Psychiatric Symptoms	22
	Coarsening Habitus	23
	Other Clinical Manifestations	25
	Test Findings	26
	Life Expectancy	28
	Non-Finnish Patients with Aspartylglycosaminuria	28
4.	Life with Aspartylglucosaminuria	33
	<i>Maria Arvio</i>	
	Adaptive Skills in Patients with AGU	34
	Socialization Skills	35
	Self-help Skills	35
	Language	38
	Motor Skills	38
	Maladaptive Behavior	39
5.	Biochemistry and Biochemical Diagnosis of Aspartylglycosaminuria	41
	<i>Tarja Mononen and Ilkka Mononen</i>	
	Storage Material	42
	Assay of Glycoasparagines	44
	Assay of Glycosylasparaginase Activity	46
	Carrier Detection and Prenatal Diagnosis	47
	Conclusions	49
6.	Asparagine-linked Glycoproteins and Their Degradation ...	55
	<i>Nathan N. Aronson, Jr.</i>	
	Discovery of Asn-linked Glycoproteins	56
	Chemistry and Biosynthesis of the GlcNAc-Asn Linkage	58

Lysosomal Degradation of Asn-linked Glycoproteins:	
General Features	60
Lysosomal Degradation of Asn-linked Glycoproteins:	
Oligosaccharide Component	65
Lysosomal Degradation of Asn-linked Glycoproteins:	
Protein and Linkage Region	67
Linkage Region: Role of Glycosylasparaginase	67
Linkage Region: Role of Chitobiase	68
Summary	71
7. Enzymology and Structural Biology	
of Glycosylasparaginase	77
<i>Tiina Noronkoski, Ole K. Tollersrud and Ilkka Mononen</i>	
Discovery of Glycosylasparaginase	77
One Enzyme—Several Names	78
Preliminary Characterization of Glycosylasparaginase	79
Protein Structure	80
Disulfide Bridges	85
N-linked Oligosaccharide Chains Are Essential	
for Transfer to Lysosomes	86
Recombinant Glycosylasparaginase	87
Properties of Glycosylasparaginases	88
8. <i>Flavobacterium meningosepticum</i> Glycosylasparaginase ...	101
<i>Anthony L. Tarentino</i>	
Glycosylasparaginase Falls into Disuse	103
PNGase F and Glycosylasparaginase	103
Purification and Properties of Glycosylasparaginase	104
Subunit Structure and Relationship	
to the Mammalian Glycosylasparaginase	107
Molecular Biology of <i>Flavobacterium</i>	
Glycosylasparaginase	109
Auto-proteolytic Activation of Recombinant	
<i>Flavobacterium</i> Glycosylasparaginase	113
Summary	115
9. Molecular Biology of Glycosylasparaginase	119
<i>Nathan N. Aronson, Jr.</i>	
Cloning a cDNA for Glycosylasparaginase	120
cDNA of Human Glycosylasparaginase	124
Chromosomal Localization	128
Gene Structure	128
5'-Untranslated Region	128
3'-Untranslated Region	130
Evolution of Glycosylasparaginase	133

10. Gene Defects Causing Aspartylglycosaminuria	137
<i>Hyejeong Park and Nathan N. Aronson, Jr.</i>	
Finnish Mutations	140
Splicing Mutations	142
Missense Mutations	144
Nonsense Mutations	145
Insertions	146
Deletions	146
Genomic Rearrangements	147
Summary	147
11. Carrier Detection in Aspartylglycosaminuria	153
<i>Eeva-Liisa Romppanen and Ilkka Mononen</i>	
Hybridization with Allele-specific Oligonucleotides	154
Solid-phase Minisequencing	155
Oligonucleotide Ligation Assay (OLA)	157
Attitudes Toward Genetic Testing	159
Pilot Carrier Testing Programs of the Finnish-type AGU ..	159
Leaflet for AGU _{FIN} Genetic Counseling	160
12. Therapeutic Aspects of Aspartylglycosaminuria	165
<i>Ulla Dunder and Ilkka Mononen</i>	
Current Therapy in Lysosomal Disorders	166
Bone Marrow Transplantation	166
Enzyme Replacement Therapy	167
Gene Therapy	168
In Vitro Therapy of Aspartylglycosaminuria	168
Current Therapy of Aspartylglycosaminuria	172
13. A Mouse Model for Aspartylglycosaminuria	175
<i>Vesa Kaartinen, Ilkka Mononen, Nora Heisterkamp and John Groffen</i>	
Targeting Vector for Mouse Aga Gene	177
Production of Correctly Targeted ES-cell Lines	177
Generation of Chimeric and Aga-deficient Mice	177
Biochemical Characterization of Aga (-/-) Mice	179
Histological Characterization of Aga (-/-) Mice	180
Phenotypic Characterization of Aga (-/-) Mice	182
Future Perspectives	183
14. Calendar of Highlights in Aspartylglycosaminuria Research	187
<i>Ilkka Mononen and Nathan N. Aronson, Jr.</i>
