

Contents

1. Introduction	
<i>Peter Århem, Hans Liljenström, and Uno Svedin</i>	1
Part I Some New Perspectives	7
2. The Need for a Non-computational Extension of Quantum Action in the Brain	
<i>Roger Penrose</i>	11
3. The Berry Paradox	
<i>Gregory J. Chaitin</i>	29
4. Mind as Phenotype	
<i>Robert Rosen</i>	39
Part II Subcellular Levels	57
5. Quantum Automata in Cytoskeletal Microtubules: A Nanoscale Substrate for Cognition	
<i>Stuart R. Hameroff</i>	61
6. Of Maps and Territories: A Three Point Landing on the Mind-Body Problem	
<i>Michael Conrad and Deborah Conrad</i>	107
Part III Network and Systems Level	139
7. Synergetics of the Brain	
<i>Hermann Haken</i>	145
8. Cognition and the Efficiency of Neural Processes	
<i>Hans Liljenström</i>	177
Part IV The Subjective Level	215
9. Consciousness and the Matter of Perception	
<i>Petra Stoerig</i>	219

10. On Consciousness and Spontaneous Brain Activity	
<i>Peter Århem and B. I. B. Lindahl</i>	235
11. Concluding Remarks	
<i>Peter Århem, Hans Liljenström, and Uno Svedin</i>	255
Index	257
