

Contents

Author Biography *x*

Preface *xi*

Acknowledgements *xiii*

1 Introduction *1*

- 1.1 Research Context and Academic Background *1*
- 1.2 Overview of the Significance of Glacier–Permafrost Interactions *3*
- 1.3 Explanation of the Book Structure *6*
- References *7*

2 Permafrost in Modern and Ancient Glacial Environments *9*

- 2.1 Introduction *9*
- 2.2 Thermal and Physical Properties *9*
 - 2.2.1 Defining Characteristics *9*
 - 2.2.2 Water in Permafrost *12*
 - 2.2.3 Ground Ice *15*
- 2.3 The Formation and Preservation of Permafrost *19*
 - 2.3.1 Subaerial Permafrost *19*
 - 2.3.2 Subglacial Permafrost *21*
- 2.4 The Distribution and Spatial Extent of Permafrost *26*
 - 2.4.1 The Modern Day and Last Glacial Maximum Distribution of Permafrost *26*
 - 2.4.2 The Spatial Distribution of Contemporary Permafrost *27*
 - 2.4.3 Temporal Changes in the Extent of Subglacial Permafrost *34*
- 2.5 Permafrost Rheology *37*
 - 2.5.1 The Rheology of Ice, Sediment and Ice–Sediment Mixtures *37*
 - 2.5.2 The Rheology of Subglacial Permafrost *44*
- 2.6 Summary *45*
- References *46*

3 Glaciers and Glacial Processes in Permafrost Environments *53*

- 3.1 Introduction *53*
- 3.2 Thermal Regimes of Glaciers and Permafrost *54*
- 3.3 Basal Boundary Conditions and Processes *60*

3.3.1	Introduction	60
3.3.2	Rigid-Bed Glaciers and Basal Sliding	62
3.3.3	Soft-Bed Glaciers and Subglacial Sediment Deformation	63
3.4	'Frozen Beds' and Traditional Glaciological Models	65
3.4.1	Frozen Beds and the Operation of Basal Processes	65
3.4.2	Thermal Controls on the Processes of Subglacial Erosion	67
3.5	Active Subglacial Processes at Sub-Freezing Temperatures – An Emerging Paradigm?	71
3.5.1	Early Experimental Studies	71
3.5.2	Direct Observations of Basal Processes Beneath Cold-Based Glaciers	72
3.5.3	Active Erosion and Debris Entrainment at Sub-Freezing Temperatures	75
3.5.4	Formation of Debris-Rich Basal Ice	78
3.5.5	Effective Beds and Dynamic Soles – Insights from Formerly Glaciated Environments	86
3.6	Ice-Marginal and Proglacial Processes	89
3.6.1	Introduction	89
3.6.2	Apron Entrainment	89
3.6.3	Proglacial Thrusting	92
3.6.4	The Deposition and Preservation of Ice Within Proglacial Environments	94
3.7	Summary	96
	References	97

4 Hydrology, Dynamics and Sediment Fluxes 107

4.1	Introduction	107
4.2	The Hydrology of Non-Temperate Glaciers	107
4.2.1	Introduction	107
4.2.2	Seasonal Variations	109
4.2.3	Drainage Pathways	114
4.2.4	Suspended-Sediment and Solute Fluxes	120
4.2.5	Glacial Groundwater Fluxes in Permafrost Environments	125
4.3	The Dynamic Behaviour of Non-Temperate Glaciers	132
4.3.1	Introduction	132
4.3.2	Modern-Day Non-Temperate Glaciers	133
4.3.3	Ice-Sheet Flow and Ice-Stream Dynamics	144
4.3.4	Pleistocene Ice Sheets and Cold-Based Ice	148
4.4	Sediment Fluxes Within Glaciated Permafrost Catchments	149
4.5	Summary	155
	References	157

5 The Landscape Expression of Glacier–Permafrost Interactions: Landforms, Sediments and Landsystems 163

5.1	Introduction	163
5.2	Cold-Based Glaciers and Glacial Protectionism	164
5.3	Specific Landforms Related to Cold-Based Glaciers and Glacier–Permafrost Interactions	173

5.3.1	Lateral Meltwater Channels	173
5.3.2	End Moraines	176
5.3.2.1	Ice-Cored Moraines	178
5.3.2.2	Push Moraines, Thrust Moraines and Composite Ridges	183
5.3.3	Subglacial Landforms	189
5.3.4	Massive Ground Ice	195
5.3.5	Iceings, Pingos and Blowouts	200
5.4	Sedimentological and Structural Evidence for Glacier–Permafrost Interactions	203
5.4.1	The Influence of Thermal Regime on the Sedimentology of Glacigenic Debris	203
5.4.2	Rafts, Intraclasts and Hydrofractures	209
5.4.3	The Glacitectonic Deformation of Permafrost	213
5.5	Glacial Landsystem Models	222
5.5.1	Process-Form Models and Glacial Landsystems	222
5.5.2	Pleistocene Ice Sheets	226
5.5.3	Arctic Glacial Landsystems	235
5.5.4	Cold Extremes – Antarctic Glacial Landsystems	238
5.5.5	Martian Landsystems	242
5.6	Glaciers, Permafrost and Paraglaciatio	246
5.6.1	Introduction	246
5.6.2	Rock Slope Failure	250
5.6.3	Thermokarst, Dead Ice and Megaslumps	253
5.7	Summary	262
	References	265
6	Future Research Directions	279
6.1	Basal Boundary Conditions and Processes Beneath Cold-Based Glaciers	279
6.2	The Rheology of Subglacial Permafrost	281
6.3	Using Geomorphological Evidence to Reconstruct Basal Thermal Regime	283
6.4	Sedimentological and Structural Criteria for Identifying Glacier–Permafrost Interactions	285
6.5	Determining the Influence of Permafrost on Glacier Dynamics	288
6.6	Glacier–Permafrost Interactions and Future Climate Change	290
6.7	Towards an Integrated Analysis of Glaciers and Permafrost	293
	References	294
	Index	301
