Preface to the Ninth Edition	iv	21 Non-Hodgkin lymphomas 2: Individual diseases	270
About the Companion Website	v	22 Multiple myeloma and related plasma cell neoplasms	287
1 Haemopoiesis	1	23 Amyloid	302
2 Erythropoiesis and general aspects of anaemia	11	24 Aplastic anaemia and bone marrow failure syndromes	309
3 Hypochromic anaemias	27	25 Haemopoietic stem cell transplantation	320
4 Iron overload	42	26 Platelets, coagulation and normal haemostasis	337
5 Megaloblastic anaemias and other macrocytic anaemias	50	27 Bleeding disorders caused by platelet and vascular abnormalities	355
6 Haemolytic anaemias	65	28 Hereditary coagulation disorders	370
7 Genetic disorders of haemoglobin	79	29 Acquired coagulation disorders and thrombotic microangiopathies	385
8 The white cells, part 1: granulocytes, monocytes and their benign disorders	99	30 Thrombosis 1: Pathogenesis and diagnosis	399
9 The white cells, part 2: lymphocytes and their benign disorders	116	31 Thrombosis 2: Treatment	417
10 The spleen	131	32 Haematological changes in systemic diseases	437
11 The aetiology and genetics of haematological neoplasia	138	33 Blood transfusion	451
12 Management of haematological malignancy	155	34 Pregnancy and neonatal haematology	465
13 Acute myeloid leukaemia	168	Appendix: 5 <sup>th</sup> edition (2022) of the World Health Organization Classification of Haematolymphoid Tumours	475
14 Chronic myeloid leukaemia	185	Index	478
15 Myeloproliferative neoplasms	194		
16 Myelodysplastic neoplasms	210		
17 Acute lymphoblastic leukaemia	222		
18 The chronic lymphocytic leukaemias	236		
19 Hodgkin lymphoma	246		
20 Non-Hodgkin lymphomas 1: General aspects	259
