

Table of Contents

New Attitudes to Experimental Teratology 1

- 1. A Developmental Approach to Teratology
M. C. JOHNSTON and R. M. PRATT. With 1 Figure 2
- 2. Chromosomal Animal Model of Human Disease. Fetal Trisomy and Developmental Failure
A. GROPP. With the Assistance of B. PUTZ. With 14 Figures 17
- 3. Animal Models of Major Gene Defects
K. S. BROWN. With 1 Figure 34
- 4. Cytotoxic Agents in Teratogenic Research
T. A. CONNORS. With 3 Figures 49

Problems of Predictive Teratology 81

- 5. Polygenic Models in Teratological Testing
C. L. BERRY and J. P. GERMAIN. With 7 Figures 83
- 6. Behavioural Teratology
S. M. BARLOW and F. M. SULLIVAN. With 2 Figures 103
- 7. Teratological Investigations in Laboratory Primates: Why, When and How to Use Them
D. E. POSWILLO and I. R. PHILLIPS. With 3 Figures 121
- 8. Screening Medicines for Teratogenicity: Problems of Interpretation
R. M. ATKINSON. With 6 Figures 136

Influencing the Fetal Milieu 147

- 9. Placental Causes of Maldevelopment
K. BENIRSCHKE. With 8 Figures 148
- 10. Future Prospects for Fetal Surgery
D. SOPHER. With 11 Figures 165

New Aspects of Developmental Teratology 181

- 11. Morphological and Behavioural Abnormalities Caused by Insults to the CNS in the Perinatal Period
J. LANGMAN, W. WEBSTER and P. RODIER. With 17 Figures 182

12. Polymorphisms: Their Lessons for Human Teratology
D. F. ROBERTS and J. BURN. With 5 Figures 201

13. The Impact of Malformation on the Emotional Development of the Child
and his Family
A. BENTOVIM 223

Subject Index 235
