Preface	V
Introduction	1
Examples of Iatrogenic Carcinogenesis in the Field of Internal Medicine and its Marginal Areas	4
Arsenic	4
Chloramphenicol	26
Cytostatics	30
Organ Transplantation	40
Iron-Dextran Complex	42
Hydantoin Derivatives	44
Phenacetin	47
Phenylbutazone	51
Diethylstilbestrol	56
Tar-Containing Ointments	60
Examples of Iatrogenic Carcinogenesis in the Field of Surgery and its Marginal Areas	63
Foreign-Body and Scar Sarcomas	63
Skin Tumors at the Site of Smallpox Vaccination Scars	68
Primary Carcinoma of the Operated Stomach	72
The Stewart-Treves Syndrome	89
Tumors of the Colon Following Ureterosigmoidostomy	97
Appendix	101
Isonicotinic Acid Hydrazide (INH)	101
Griseofulvin	101
Tannin	101
Thiouracil	101
Glucocorticoids	102
Poliomyelitis Vaccine	102
Cyclamate	102
Ovulation Inhibitors	102
Androgenic and Anabolic Steroids	103
Rauwolfia Derivatives	104

Spironolactones	104
Triazene Derivatives and Nitrosoureas	104
Streptozotocin	104
Hexamethylenetetramine	104
Herbae artemesiae absinthii	104
Pronethalol, Metronidazole, Niridazole	105
Nitrofurane Derivatives	105
Cantharidin and Asiaticosides	105
Lysergide	105
Drugs as Precursors of Nitrosamines	105
Inhalation anesthetics	105
Discussion	114
Subject Index	119
