

TABLE OF CONTENTS

	Page
LISTS OF FIGURES AND TABLES	V
I. INTRODUCTION	1
Gravity Wave Experiments. Motivation. Summary.	
II. FOCUSsing MECHANISMS FOR GRAVITATIONAL RADIATION	11
Introduction. Lens Focussing. Disk Focussing. Naked Singularities. Discussion.	
III. RELATIVISTIC GEODESICS	16
Introduction. Geodesics in the Schwarzschild Spacetime. Circular Geodesics in the Kerr Spacetime. Locally non-rotating Observers. Discussion.	
IV. ORDINARY SYNCHROTRON RADIATION	30
Introduction. Scalar Synchrotron Radiation in Flat Spacetime. Electromagnetic & Gravitational Synchrotron Radiation in Flat Spacetime. Discussion.	
V. PERTURBATIONS OF SPACETIMES	45
Introduction. The linearized Theory of Gravity. Definition of Perturbations. The Linearization Procedure. Point Gauge dependent and Point Gauge independent Perturbations. Perturbation Theory and Regge-Calculus. Regge-Wheeler Perturbation Technique. The Newman-Penrose Formalism. General Relativity in the Formalism of Geroch, Held & Penrose. Tetrad Gauge Transformations. Metric Perturbations Revised.	

VI.	DECOUPLED & SEPARATED PERTURBATION EQUATIONS	77
	Introduction. The Decoupling of the Perturbation Equations. Scalar Perturbations. Electromagnetic Perturbations. Gravitational Perturbations. Decoupled Master Equations. Coordinate Systems, Spin-Coefficients & GHP Operators. Separation of Master Equation. Completeness of Eigenfunctions. Boundary Conditions. Radial Green's Function Solution. Spin-Weighted Spherical & Spheroidal Harmonics. Low Frequency Expansion of Spin-Weighted Spheroidal Harmonics. High Frequency Expansion of Spin-Weighted Spheroidal Harmonics.	
VII.	POLARIZATION	117
	Introduction. Stokes Parameters, Poincaré Sphere, Jones Vector. Electromagnetic Stokes Parameters. Gravitational Stokes Parameters. The Equation of Radiative Transfer for Polarized Radiation. Stokes Parameters for the Most General Metric Theory of Gravity.	
VIII.	GEODESIC SYNCHROTRON RADIATION	139
	Introduction. Scalar GSR in the Schwarzschild Geometry. High Frequency Approximation of $g_u(r)$ and $g_S(\pi/2, 0)$ in the Kerr Geometry. Electromagnetic GSR in the Kerr Geometry. Gravitational GSR in the Kerr Geometry.	
IX.	DISCUSSIONS	171
	Master Formula for Power Spectra. Spin Dependence of Power Spectra. Limitations of Test Particle GSR. Some Open Questions in Gravitational Radiation Theory.	
	ACKNOWLEDGMENTS	182
	APPENDIX A	183
	APPENDIX B	183
