

Contents

1. Introduction. By Y.-R. Shen (With 2 Figures)

1.1 Historical Remarks	1
1.2 Infrared Generation by Optical Mixing	3
1.3 Infrared Parametric Oscillators	6
1.4 Infrared Generation by Stimulated Raman and Polariton Scattering	7
1.5 Other Methods of Nonlinear Infrared Generation	12
1.6 Summary	15
References	15

2. Optical Mixing of CO₂ Lasers in the Far-Infrared.

By R.L. Aggarwal and B.Lax (With 36 Figures)

2.1 Historical Background	19
2.2 Nonlinear Difference-Frequency Mixing	21
2.2.1 Theoretical Background	21
2.2.2 Phase-Matching Techniques	30
2.3 Choice of Nonlinear Crystal	38
2.4 Noncollinear Mixing Geometries	49
2.4.1 Simple Noncollinear Geometry	49
2.4.2 Folded Noncollinear Geometry	52
2.5 Experimental Systems Using CO ₂ Lasers	56
2.5.1 Noncollinear Phase-Matched FIR Generation in GaAs	59
2.5.2 Collinear Phase-Matched Generation in GaAs	66
2.5.3 FIR Generation in Other Systems	68
2.6 Applications	73
2.6.1 Far-Infrared Molecular and Solid State Studies	74
2.6.2 Plasma Studies with FIR Radiation	76
2.7 Future Outlook	78
References	78

3. Parametric Oscillation and Mixing. By R.L. Byer and R.L. Herbst (With 21 Figures)

3.1 Description	81
---------------------------	----

3.2 Nonlinear Interactions	86
3.2.1 Second-Harmonic Generation	86
Phase Matching and Effective Nonlinear Coefficient	87
Focusing	90
3.2.2 Three-Frequency Interactions	94
Sum Generation (Up-Conversion)	94
Difference Frequency Generation (Mixing)	95
Parametric Generation	96
3.3 Infrared Generation by Mixing	98
3.3.1 Dye Laser Sources	99
3.3.2 Parametric Oscillator Sources	104
3.3.3 Infrared Laser Sources	106
3.4 Infrared Generation by Raman Mixing	108
3.4.1 Stimulated Raman Scattering	109
3.4.2 Coherent Raman Mixing	113
3.5 Infrared Parametric Oscillators	116
3.5.1 Introduction	116
3.5.2 Threshold and Rise Time	117
3.5.3 Conversion Efficiency	121
3.5.4 Tuning and Bandwidth	125
3.6 Conclusion	132
References	133

4. Difference Frequency Mixing via Spin Nonlinearities in the Far-Infrared.

By V.T.Nguyen and T.J.Bridges (With 18 Figures)

4.1 Difference Frequency Mixing via Spin-Flip Transitions	140
4.1.1 Theoretical Background	140
4.1.2 Phase-Matching Problem	143
4.1.3 Collinear Interaction	143
4.1.4 Noncollinear Interaction	145
4.1.5 Details of Experiments	146
4.2 Generation of Tunable Far-Infrared Using Spin-Flip Raman Lasers	148
4.2.1 Linewidth and Tunability of 10.6 μm Pumped SFR Laser	148
4.2.2 Experiments on Generation of Tunable Far-Infrared	151
4.2.3 Linewidth and Tunability of Far-Infrared	156
4.3 Concluding Remarks	157
References	158

5. Optical Mixing in Atomic Vapors. By J.J.Wynne and P.P.Sorokin (With 33 Figures)

5.1 Experimental Techniques	160
5.2 Theory of the Optical Nonlinearity in Vapors	163

5.3 Infrared Generation	167
5.3.1 Infrared Generation by Stimulated Electronic Raman Scattering	168
5.3.2 Optical Mixing Between One Laser and Two Stokes Photons	181
5.3.3 Infrared Generation by Four-Wave Optical Mixing Using Stokes Photons	184
5.3.4 Infrared Generation by Other Four-Wave Mixing Processes	193
5.4 Ultraviolet Generation	195
5.4.1 Multiphoton Ionization	196
5.4.2 Ultraviolet Generation by Third-Harmonic Generation . .	198
5.4.3 Ultraviolet Generation by Four-Wave Parametric Sum Mixing	201
5.5 Concluding Remarks	212
References	213
 6. Optical Pumping in Gases. By T.Y.Chang (With 24 Figures)	
6.1 Background	215
6.2 Lasers Based on Electronic Transitions	222
6.2.1 Atomic Cs, Sr, and K Vapor Lasers	222
6.2.2 Molecular I ₂ , Na ₂ , and NO Lasers	225
6.3 Lasers Based on Vibrational-Rotational Transitions	227
6.3.1 Lasers Based on Difference Bands in CO ₂ , N ₂ O, OCS, CS ₂ , HCN, and C ₂ H ₂	227
6.3.2 Lasers Based on Hot Bands in OCS, SF ₆ , CO ₂ , NO and H ₂ O	235
6.3.3 Lasers Based on Fundamental Bands in HF and NH ₃ . .	237
6.4 Lasers Based on Pure-Rotational or Inversion Transitions . . .	237
6.4.1 Basic Principles	238
6.4.2 Summary of Observed Laser Lines	243
6.4.3 Specific Examples and Special Topics	246
6.4.4 Experimental Techniques	252
6.4.5 Theoretical Analyses of Laser Performance	256
6.4.6 Applications	265
6.5 Conclusions	267
References	268
 Additional References with Titles	273
Subject Index	275
