

Contents

1	Introduction	1
1.1	Quarks	1
1.2	Colour	2
1.3	Flavour	2
1.4	Quark Masses	3
1.5	Medium Effects on Quarks and Their Interactions	4
1.6	Phase Transition and Quark Gluon Plasma	6
2	Preliminaries and Simple Models	9
2.1	$SU(2)$ and $SU(3)$ Symmetry	9
2.2	The $SU(3)$ Group	10
2.3	Non-Abelian Gauge Transformations	11
2.4	$SU(3)$ Flavour Group	12
2.5	The $SU(3)$ Colour and the Multi-Quark Wave Function	13
2.6	The Necessity of Relativistic Models	15
2.7	Fully Relativistic One-Body Potential Models	19
2.8	Relativistic Hartree-Fock Models	20
3	Currents, Anomaly, Solitons and Fractional Fermions	24
3.1	The Theorem of Emmy Noether	24
3.2	Internal Symmetry and Space-Time Symmetry	25
3.3	Standard Examples	25
3.4	Current Algebra and Anomaly	26
3.5	Fractional Fermions	28
3.6	A Brief Review of Solitons: Kinks	29
3.7	Polyacetylene: One Dimensional Dirac-Type Equation	30
4	More on Chiral Anomaly	32
4.1	Chiral Anomaly in QED	32
4.2	Gentleness	32

4.3	Momentum Routing Anomalies	34
4.4	Anomalous Ward Identity from Path Integral Approach	36
4.5	Summary of Grassmann Algebra	37
4.6	Integration Over Fermi Fields	39
4.7	Chiral Transformation	39
5	Introduction to Instantons	43
5.1	Instantons or Pseudoparticles	43
5.2	Tunneling in Imaginary Time	44
5.3	Homotopy Theory	46
5.4	Compactification of Space-Time Manifold and Mapping	47
5.5	Bounds for the Instanton Solutions	50
6	Relevance of Instantons	53
6.1	θ Vacuum	53
6.2	The DEMON	54
6.3	Electroweak Baryon Number Violation	56
6.4	Conformally Invariant Solutions of Jackiw, Nohl and Rebbi	56
6.5	Instanton to Skyrmion	59
6.6	QCD Vacuum – Instanton Gas or Liquid?	63
6.7	Instanton Suppression by Light Fermions	64
6.8	Instanton Induced Effective Interaction	65
7	Chiral Perturbation Theory (CHPT)	72
7.1	CHPT for the Meson Sector	72
7.2	CHPT for the Nucleon	76
7.3	CHPT at Finite Temperature	77
8	The Topological and Non-Topological Soliton Models	79
8.1	Skyrmion: Baryon as a Topological Soliton in Meson Fields	79
8.2	The Non-topological Soliton or the Soliton Bag Model	81
8.3	The Nature of the QCD Vacuum	81
8.4	Description of the Model	81
9	QCD Sum Rules	83
9.1	Introduction to QCD Sum Rules	83
9.2	The Operator Product Expansion (OPE)	85

9.3	Calculation of the Coefficients and Borel Transform	87
9.4	Introduction to Sum Rules for Baryons.....	92
9.5	The Nucleon Correlator	92
9.6	Details of the Sum Rule for Nucleons	93
9.7	Finite Temperature and Density	94
