

Contents

1 Turbulent Flows

Small-Scale Behavior in Distorted Turbulent Boundary Layers at High Reynolds Number	
<i>S.G. Saddoughi</i>	3
Vortex Stretching and Enstrophy Generation in Numerical and Laboratory Turbulence	
<i>A. Tsinober, L. Shtilman, A. Sinyavskii, H. Vaisburd</i>	9
The Role of Singularities in Euler	
<i>R.M. Kerr</i>	17
On a Possible Euler Singularity During Transition in a High-Symmetry Flow	
<i>R.B. Pelz, O.N. Boratav</i>	25
Vortex Dynamics in Numerical Simulations of Transitional and Turbulent Shear Flows	
<i>P. Comte, E. David, F. Ducros, E. Lamballais, M. Lesieur, O. Métais, J. Silvestrini</i>	33
Turbulent Mixing: Small-Scale Properties	
<i>A. Pumir</i>	45
Compressible Flows and Vortex Stretching	
<i>D. Porter, A. Pouquet, P. Woodward</i>	51

2 Structures in Hydrodynamic Turbulence

Vortex Models of the Fine Scales of Turbulence	
<i>D.I. Pullin, P.G. Saffman</i>	61
Development of Turbulence in a Confined Elliptic Vortex	
<i>T.S. Lundgren, N.N. Mansour</i>	75
Axial Dynamics of Viscous Vortices	
<i>R. Verzicco, J. Jiménez</i>	83
Influence of the Low Pressure Filaments on the Velocity Statistics in a Turbulent Shear Flow	
<i>O. Cadot</i>	89
Geometric and Topological Aspects of Vortex Filament Dynamics under LIA	
<i>R.L. Ricca</i>	99
Nonlinear Schrödinger Equation: An Hydrodynamical Tool?	
<i>C. Nore, M. Abid, M Brachet</i>	105

3 Intermittency

Inertial-Range Intermittency	
<i>R.H. Kraichnan</i>	115
Statistics of Small-Scale Structures and a Dynamical Mechanism of Cascade	
<i>T. Kambe, I. Hosokawa</i>	123
New Results on Turbulence in Helium	
<i>F. Belin, J. Maurer, P. Tabeling, H. Willaime</i>	131
Structures in Turbulence and Multifractal Universality	
<i>D. Schertzer, S. Lovejoy, F. Schmitt</i>	137
Scaling Laws of Two-Dimensional Turbulence	
<i>P. Frick, A. Babiano, B. Dubrulle</i>	145
Scaling Laws in the Solar Wind Turbulence	
<i>V. Carbone, R. Bruno, P. Veltri</i>	153
Multiplicative Cascade Models and Multifractality	
<i>M. Blank</i>	159
Turbulent Jets: Reichardt's Inductive Theory and Intermittency Corrections	
<i>P. Bonin, M. Rieutord</i>	165
Transverse and Longitudinal Scaling Laws in Homogeneous and Non-homogeneous Low Re_λ Turbulence	
<i>R. Camussi, D. Barbagallo, G. Guj, F. Stella</i>	171
Morphology of the Mixing Layer in the Rayleigh-Taylor Instability	
<i>S. Mimouni, G. Laval, B. Scheurer, S. Jaffard</i>	179

4 Stratified and Inhomogeneous Flows

Stratified Turbulence: Structural Issues, and Turbulent Diffusion	
<i>Y. Kimura, J.R. Herring</i>	195
Small- and Large-Scale Structures of the Decaying Turbulence in a Continuously Stratified Liquid	
<i>Y.D. Chashechkin</i>	205
On the Vertical Transport of a Passive Scalar in a Stratified Medium	
<i>M. Meneguzzi, A. Vincent, G. Michaud</i>	213
Flow Field Around a Circular Obstacle Emerging from an Erosion Scour Hole	
<i>S. DePonte, R. Monti</i>	221
New Variants to the Dynamic Subgrid Scale Model	
<i>A. Abbà, R. Bucci, C. Cercignani, L. Valdetaro</i>	231

5 Structures in MHD Flows

Magnetohydrodynamic Turbulence with Net Currents <i>D. Montgomery, X. Shan</i>	241
High Reynolds Number Vortices with Magnetic Field in Non-axisymmetric Strain <i>K. Bajer</i>	255
A Model for the Distribution of Magnetic Flux in High Beta MHD Turbulence <i>E.T. Vishniac</i>	265
Anisotropy in Incompressible and Compressible 3D MHD Turbulence <i>S. Oughton, W.H. Matthaeus, S. Ghosh</i>	273
Current Sheets in Three-Dimensional MHD Turbulence <i>H. Politano, A. Pouquet, P.L. Sulem</i>	281
The Role of Coherent Structures in Magnetohydrodynamic Turbulence <i>R. Kinney, J.C. McWilliams</i>	289
Scale-Invariant Plasma Motions near X-Points <i>F. Pegoraro, B.N. Kuvshinov, M. Romanelli, T.J. Schep</i>	295

6 Magnetic Reconnection and Dynamo

On the Nature of 3D Reconnection <i>E.R. Priest</i>	303
How Does Fast Reconnection Work? <i>T.G. Forbes</i>	319
Current Sheets near Magnetic Separatrix Surfaces <i>S.V. Bulanov, G.I. Dudnikova, V.P. Zhukov, I.N. Inovenkov, V.V. Pichushkin</i>	325
Parallel Computation of Magnetic Fluxtube Reconnection <i>R.B. Dahlburg, D. Norton</i>	331
Fine Structure in Fast Dynamo Computations <i>D.J. Galloway, R. Hollerbach, M.R.E. Proctor</i>	341
Numerical Study of the Dynamo Effect in a Cylinder and the Role of Small Scales <i>J. Léorat</i>	347
A Flow-Field Instability by the Hydro-dynamical "Alpha-Effect" <i>B. Rekowski, L.L. Kitchatinov, G. Rüdiger</i>	355

7 Astrophysical and Geophysical Flows

Formation of Thin Current Sheets in Magnetospheres <i>K. Schindler</i>	363
---	-----

Turbulence in the Interstellar Medium	
<i>E. Falgarone</i>	377
Dynamo Generated Turbulence in Discs	
<i>A. Brandenburg, Å. Nordlund, R. F. Stein, U. Torkelsson</i>	385
Small Scales in the Solar Corona	
<i>G. Einaudi</i>	391
Solar Wind Turbulence: Comparison of MHD and Hybrid Simulations	
<i>A. Matthews, R. Grappin, A. Mangeney, J. Léorat</i>	399
Nonlinear Dynamics of Dispersive Alfvén Waves	
<i>T. Passot, P.L. Sulem</i>	405
Large Scale Circulation Induced by Small Scale Surface Gravity Waves	
<i>F. Califano, A. Mangeney</i>	411
List of Participants	417
