

Table of Contents

Semantics Specification I

OASIS: An Optimizing Action-Based Compiler Generator
Peter Ørbaek 1

Action Transformations in the ACTRESS Compiler Generator
Hermano Moura, David A. Watt..... 16

An Overview of Door Attribute Grammars
Görel Hedin 31

Coupling Evaluators for Attribute Coupled Grammars
Gilles Roussel, Didier Parigot, Martin Jourdan 52

Functional Languages

Towards the Global Optimization of Functional Logic Programs
Michael Hanus..... 68

A Portable and Optimizing Back End for the SML/NJ Compiler
Lal George, Florent Guillame, John H. Reppy..... 83

Efficient Organization of Control Structures in Distributed Implementations
Guido Hogen, Rita Loogen..... 98

Implementing 2DT on a Multiprocessor
Yosi Ben-Asher, Gudula Rünger, Reinhard Wilhelm, Assaf Schuster..... 113

Optimization I

Global Code Selection for Directed Acyclic Graphs
Andreas Fauth, Günter Hommel, Carsten Müller, Alois Knoll 128

Compiling Nested Loops for Limited Connectivity VLIWs
Adrian Slowik, Georg Piepenbrock, Peter Pfahler..... 143

Delayed Exceptions – Speculative Execution of Trapping Instructions
M. Anton Ertl, Andreas Krall 158

Static Analysis & Abstract Interpretation

On the Implementation of Abstract Interpretation Systems for
(Constraint) Logic Programs
Gerda Janssens, Wim Simoens 172

A Suite of Analysis Tools Based on a General Purpose Abstract Interpreter
Thomas Cheatham, Haiming Gao, Dan Stefanescu 188

Flow Grammars – A Flow Analysis Methodology
James S. Uhl, R. Nigel Horspool..... 203
