

CONTENTS

1 Introduction	1
1.1 References	4
2 Technical Preliminaries	5
2.1 Aircraft Dynamics	5
2.1.1 Trimmed Equations	6
2.1.2 Longitudinal Linear Equations of Motion	7
2.1.3 Lateral/Directional Linear Equations of Motion	10
2.2 Flying Qualities	12
2.2.1 Longitudinal Response Requirements	15
2.2.2 Lateral/Directional Response Requirements	17
2.3 Uncertainty Representation	19
2.4 Structured Singular Value Analysis	21
2.5 Dynamic Inversion	25
2.6 Robust Eigenstructure Assignment	26
2.7 Full Order H_∞ Design	28
2.8 Reduced Order Observer Based H_∞ Design	30
2.9 Structured Singular Value Synthesis	32
2.10 Balanced Realizations and Truncation	34
2.11 Conclusions	36
2.12 References	37
3 Control Design Methodology	39
3.1 Control Selector	39
3.2 Inner Equalization Loop	40
3.3 Outer Robust Performance Loop	42
3.4 Conclusions	43
3.5 References	43
4 VISTA F-16 Lateral/Directional Design	45
4.1 Model Description	45
4.2 Flying Qualities Requirements	48
4.3 Control Selector Design	48
4.4 Inner Loop Design	50
4.4.1 Inner Loop Formulation	50
4.4.2 Low Angle of Attack Inner Loop Results	53
4.4.3 High Angle of Attack Inner Loop Results	54

4.5	Outer Loop Design	56
4.5.1	Outer Loop Synthesis	56
4.5.1.1	Ideal Model Generation	57
4.5.1.2	Performance Weighting	58
4.5.1.3	Actuator Weighting	58
4.5.1.4	Parameter Uncertainty Weighting	59
4.5.2	Low Angle of Attack Outer Loop Results	60
4.5.3	High Angle of Attack Outer Loop Results	64
4.6	Controller Implementation	68
4.7	Robustness Analysis	70
4.7.1	Low Angle of Attack Robustness Results	71
4.7.1.1	Low Angle of Attack Structured Uncertainty	71
4.7.1.2	Low Angle of Attack Unstructured Uncertainty	73
4.7.1.3	Low Angle of Attack Robust Performance	75
4.7.2	High Angle of Attack Robustness Results	77
4.7.2.1	High Angle of Attack Structured Uncertainty	77
4.7.2.2	High Angle of Attack Unstructured Uncertainty	77
4.7.2.3	High Angle of Attack Robust Performance	79
4.7.3	Robustness Analysis of Low/High Angle of Attack Blending	79
4.8	Nonlinear Analysis	81
4.8.1	Conventional Maneuvers	82
4.8.2	High Angle of Attack Maneuvers	88
4.9	Conclusions and Lessons Learned	92
4.10	References	92
Appendix 4		93
	Low Angle of Attack Design and Analysis Matrices	93
	High Angle of Attack Design and Analysis Matrices	94
	Outer Loop Controller Matrices	95
5	Thrust Vectoring F-18 Design	101
5.1	Model Description	101
5.1.1	Nonlinear model	102
5.1.2	Linear model	104
5.2	Control Selector Design	106
5.3	Longitudinal Axis Controller	110
5.3.1	Inner Loop Design	110
5.3.2	Outer Loop Design	117
5.3.3	Robustness Analysis	122
5.3.4	Flying Qualities Analysis	125
5.4	Lateral/Directional Axes Controller	128
5.4.1	Inner Loop Design	129

5.4.2 Outer Loop Design	131
5.4.3 Robustness Analysis	135
5.4.4 Flying Qualities Analysis	140
5.5 Nonlinear Analysis	141
5.6 Conclusions and Lessons Learned	148
5.7 References	148
Appendix 5	149
Actuator Models	149
Linear Design Models and Flight Conditions	150
Inner Loop Gain Schedules	155
Outer Loop Controllers	155
6 Conclusions	161
Index	163
