

Table of Contents

Invited Speakers

User Defined Geo-referenced Information	1
<i>Dimitri Konstantas, Alfredo Villalba, Giovanna Di Marzo Serugendo, and Katarzyna Wac</i>	

Part I: Programming Languages

Extending the SSCLI to Support Dynamic Inheritance.....	9
<i>Jose Manuel Redondo, Francisco Ortin, and J. Baltasar Garcia Perez-Schofield</i>	
Scala Roles: Reusable Object Collaborations in a Library	23
<i>Michael Pradel and Martin Odersky</i>	

Part II: Software Engineering

Common Criteria Based Security Scenario Verification	37
<i>Atsushi Ohnishi</i>	
A Software Infrastructure for User-Guided Quality-of-Service Tradeoffs	48
<i>João Pedro Sousa, Rajesh Krishna Balan, Vahe Poladian, David Garlan, and Mahadev Satyanarayanan</i>	
On the Multiplicity Semantics of the Extend Relationship in Use Case Models	62
<i>Miguel A. Laguna and José M. Marqués</i>	
Secure Mobile Phone Access to Remote Personal Computers: A Case Study	76
<i>Alireza P. Sabzevar and João Pedro Sousa</i>	

Part III: Distributed and Parallel Systems

Understanding and Evaluating Replication in Service Oriented Multi-tier Architectures.....	91
<i>Michael Ameling, Marcus Roy, and Bettina Kemme</i>	
Applying Optimal Stopping for Optimizing Queries to External Semantic Web Resources	105
<i>Albert Weichselbraun</i>	

An Efficient Pipelined Parallel Join Algorithm on Heterogeneous Distributed Architectures	119
<i>Mohamad Al Hajj Hassan and Mostafa Bamha</i>	

Part IV: Information Systems and Data Management

Declarative Business Process Modelling and the Generation of ERP Systems	134
<i>Nicholas Poul Schultz-Møller, Christian Hølmer, and Michael R. Hansen</i>	

Single Vector Large Data Cardinality Structure to Handle Compressed Database in a Distributed Environment	147
<i>B.M. Monjurul Alom, Frans Henskens, and Michael Hannaford</i>	

Relaxed Approaches for Correct DB-Replication with SI Replicas	161
<i>J.E. Armendáriz-Iñigo, J.R. Juárez-Rodríguez, J.R. González de Mendiivil, J.R. Garitagoitia, F.D. Muñoz-Escof, and L. Irún-Briz</i>	

Measuring the Usability of Augmented Reality e-Learning Systems: A User-Centered Evaluation Approach	175
<i>Costin Pribeanu, Alexandru Balog, and Dragoş Daniel Iordache</i>	

Supporting the Process Assessment through a Flexible Software Environment	187
<i>Tomás Martínez-Ruiz, Francisco J. Pino, Eduardo León-Pavón, Félix García, and Mario Piattini</i>	

Part V: Knowledge Engineering

Increasing Data Set Incompleteness May Improve Rule Set Quality	200
<i>Jerzy W. Grzymala-Busse and Witold J. Grzymala-Busse</i>	

Anomaly Detection Using Behavioral Approaches	217
<i>Salem Benferhat and Karim Tabia</i>	

Author Index	231
