Preface	v
1 Introduction	1
1.1 Interquanta	1
1.2 The Structure of this Book	2
1.3 The Computer Laboratory	3
1.4 The Classroom Demonstrations	3
1.5 Literature	4
2 Free Particle Motion in One Dimension	5
2.1 Physical Concepts	5
2.2 A First Session with the Computer	9
2.3 The Time Development of a Gaussian Wave Packet	13
2.4 The Spectral Function of a Gaussian Wave Packet	15
2.5 The Wave Packet as a Sum of Harmonic Waves	16
2.6 Exercises	19
3 Bound States in One Dimension	22
3.1 Physical Concepts	22
3.2 Eigenstates in the Infinitely Deep Square-Well Potential and in the Harmonic-Oscillator Potential	29
3.3 Eigenstates in the Step Potential	32
3.4 Harmonic Particle Motion	35
3.5 Particle Motion in the Infinitely Deep Square-Well Potential	36
3.6 Exercises	38
4 Scattering in One Dimension	44
4.1 Physical Concepts	44
4.2 Stationary Scattering States in the Step Potential	58
4.3 Scattering of a Harmonic Wave by the Step Potential	60
4.4 Scattering of a Wave Packet by the Step Potential	61
4.5 Transmission and Reflection. The Argand Diagram	64
4.6 Exercises	66
4.7 Analogies in Optics	76

4.8	Reflection and Refraction of Stationary Electromagnetic Waves	80
4.9	Reflection and Refraction of a Harmonic Light Wave	82
4.10	Scattering of a Wave Packet of Light	83
4.11	Transmission, Reflection and Argand Diagram for a Light Wave	86
4.12	Exercises	88
5	A Two-Particle System: Coupled Harmonic Oscillators	91
5.1	Physical Concepts	91
5.2	Stationary States	97
5.3	Time Dependence of Global Quantities	97
5.4	Joint Probability Densities	100
5.5	Marginal Distributions	102
5.6	Exercises	103
6	Free Particle Motion in Three Dimensions	109
6.1	Physical Concepts	109
6.2	The 3D Harmonic Plane Wave	119
6.3	The Plane Wave Decomposed into Spherical Waves	122
6.4	The 3D Gaussian Wave Packet	123
6.5	The Probability Ellipsoid	125
6.6	Angular-Momentum Decomposition of a Wave Packet	126
6.7	Exercises	128
7	Bound States in Three Dimensions	131
7.1	Physical Concepts	131
7.2	Radial Wave Functions in Simple Potentials	141
7.3	Radial Wave Functions in the Step Potential	145
7.4	Probability Densities	147
7.5	Harmonic Particle Motion	151
7.6	Exercises	153
8	Scattering in Three Dimensions	157
8.1	Physical Concepts	157
8.2	Radial Wave Functions	165
8.3	Stationary Wave Functions and Scattered Waves	168
8.4	Differential Cross Sections	170
8.5	Scattering Amplitude. Phase Shift. Partial and Total Cross Sections	171
8.6	Exercises	175
9	Special Functions of Mathematical Physics	180
9.1	Basic Formulae	180
9.2	Hermite Polynomials	187

9.3	Eigenfunctions of the One-Dimensional Harmonic Oscillator	187
9.4	Legendre Polynomials and Associated Legendre Functions	188
9.5	Spherical Harmonics	192
9.6	Bessel Functions	192
9.7	Spherical Bessel Functions	195
9.8	Laguerre Polynomials	196
9.9	Radial Eigenfunctions of the Harmonic Oscillator	198
9.10	Radial Eigenfunctions of the Hydrogen Atom	200
9.11	Simple Functions of a Complex Variable	200
9.12	Exercises	202
10.	Additional Material and Hints for the Solution of Exercises	204
10.1	Units and Orders of Magnitude	204
10.2	Argand Diagrams and Unitarity for One-Dimensional Problems	211
10.3	Hints and Answers to the Exercises	220
 Appendix		
Appendix A.	A Systematic Guide to IQ	246
A.1	Dialog Between the User and IQ	246
A.1.1	A Simple Example	246
A.1.2	The General Form of Commands	249
A.1.3	The Descriptor File	250
A.1.4	The Descriptor (Record)	253
A.1.5	The PLOT Command	255
A.1.6	The STOP Command	256
A.1.7	HELP: The Commands HE and PH	256
A.2	Coordinate Systems and Transformations	257
A.2.1	The Different Coordinate Systems	257
A.2.2	Defining the Transformations	258
A.3	The Different Types of Plot	263
A.3.1	Choosing a Plot Type: The Command CH	263
A.3.2	Cartesian 3D Plots (Type 0 Plots)	263
A.3.3	Polar 3D Plots (Type 1 Plots)	264
A.3.4	2D Plots (Type 2 Plots)	266
A.3.5	3D Column Plots (Type 3 Plots)	269
A.3.6	Special 3D Plots (Type 10 Plots)	270
A.4	The Background in the Plots	270
A.4.1	Boxes and Coordinate Axes: The Command BO	270
A.4.2	Scales	271
A.4.3	Arrows	273
A.4.4	Text and Numbers	275

A.4.5	Mathematical Symbols and Formulae	277
A.5	Further Commands	279
A.5.1	Line Styles	279
A.5.2	Multiple Plots	281
A.5.3	Combined Plots	282
A.5.4	Using Different Plotting Devices	282
A.5.5	The Different Running Modes	284
A.5.6	Introducing Physical Variables: The Commands V0 to V9	286
A.5.7	Reserved Commands	286
Appendix B.	How to Install IQ	287
B.1	Hardware and Operating-System Requirements	287
B.2	Diskette Format	287
B.3	Installation on a Macintosh with Hard Disk	287
B.4	Installation on a Macintosh without Hard Disk	288
B.5	Limited Memory	289
B.6	Removing Output Files	290
Appendix C.	Lists of All Provided Files	291
C.1	Program File	291
C.2	Data File Specifying Graphics Devices	291
C.3	File Containing Fonts Used in Graphics	291
C.4	Descriptor Files for Examples and Exercises	292
C.5	Command Input Files and Associated Descriptor Files for Demonstrations	292
C.6	Help Files	293
Appendix D.	Graphics Devices and Metafiles	294
Index of IQ Commands		298
Subject Index		300
