

Contents

Theory

R. Aversa, N. Mazzocca, U. Villano

Analytical Modeling of Parallel Application in Heterogeneous Computing Environments: A Study of Cholesky Factorization 1

B. Bacci, S. Gorlatch, C. Lengauer, S. Pelagatti

Skeletons and Transformations in an Integrated Parallel Programming Environment 13

C.-H. Chi, J.-L. Yuan

Sequential Unification and Aggressive Lookahead Mechanisms for Data Memory Accesses 28

A.E. Doroshenko, I.S. Kononenko, A.Y. Korotun

A Coordination Model and Facilities for Efficient Parallel Computation 42

A. Godlevsky, M. Gažák, L. Hluchý

Parallelizing of Sequential Programs on the Basis of Pipeline and Speculative Features of the Operators 48

K.O. Gorbunova

Kinetic Model of Parallel Data Processing 54

P. Hartmann

PSA Approach to Population Models for Parallel Genetic Algorithms 60

V.N. Konshin, V.A. Garanzha

Highly Accurate Numerical Methods for Incompressible 3D Fluid Flows on Parallel Architectures 68

S. Marić, Z. Jovanović

Dynamic Task Scheduling with Precedence Constraints and Communication Delays 77

N.A. Likhoded

Two-Dimensional Scheduling of Algorithms with Uniform Dependencies ... 92

A. Mostéfaoui, M. Raynal, M. Takizawa

Consistent Lamport Clocks for Asynchronous Groups with Process Crashes 98

S. Pudov

Comparative Analysis of Learning Methods of Cellular-Neural Associative Memory 108

A.V. Selikhov

Emergence and Propagation of Round Autowave in Cellular Neural Network 120

I.B. Virbitskaite, E.A. Pokozy

Parametric Behaviour Analysis for Time Petri Nets 134

H. Wanek, E. Schikuta

A Blackboard Approach for the Automatic Optimization of Parallel I/O Operations 141

C.-H. Yeh, E.A. Varvarigos, H. Lee

Routing and Embeddings in Super Cayley Graphs 151

Software

S. Bandini, G. Erbacher, G. Mauri

Implementing Cellular Automata Based Models on Parallel Architectures: The CAPP Project 167

O. Bessonov, D. Fougère, K.D. Quoc, B. Roux

Methods for Achieving Peak Computational Rates for Linear Algebra Operations on Superscalar RISC Processors180

L. Birov, A. Prokofiev, Yu. Bartenev, A. Vargin, A. Purkayastha,

Y. Dandass, V. Erzunov, E. Shanikova, A. Skjellum, P. Bangalore,

E. Shuvalov, V. Ovechkin, N. Frolova, S. Orlov, S. Egorov

The Parallel Mathematical Libraries Project (PMLP): Overview, Design Innovations, and Preliminary Results 186

A.V. Bystrov, I.B. Virbitskaite

Implementing Model Checking and Equivalence Checking for Time Petri Nets by the RT-MEC Tool 194

G. Capretti, M.R. Laganà, L. Ricci

Learning Concurrent Programming: A Constructionist Approach 200

D. Dalton

The Speedup Performance of an Associative Memory Based Logic Simulator 207

W.K. Giloi, H.W. Pohl, A. Schramm <i>A High-Level Programming Environment for Distributed Memory Architectures</i>	217
A. Konovalov, V. Samofalov, S. Scharf <i>Virtual Shared Files: Towards User-Friendly Inter-Process Communications</i>	223

S. Sancese, P. Ciancarini, A. Messina <i>Message Passing vs Tuple Space Coordination in an Aerodynamics Application</i>	320

Architecture

S.M. Achasova

Two Examples of Distributed Architecture for Solving Combinatorial Optimization Problems 335

F. Cappello, O. Richard, D. Etiemble

Performance of the NAS Benchmarks on a Cluster of SMP PCs Using a Parallelization of the MPI Programs with OpenMP 339

M. Dorojevets

COOL Approach to Petaflops Computing (invited paper) 351

B. Goossens, H. Essafi, M. Pic

Hardware and Software Optimizations for Multimedia Databases 365

V. Markova

Cellular Recursive Algorithm Architecture for Long Integers Multiplication in Arrays of Restricted Size 371

Applications

S. Bandini, G. Mauri, G. Pavesi, C. Simone

A Parallel Model Based on Cellular Automata for the Simulation of Pesticide Percolation in the Soil 383

O.L. Bandman

Comparative Study of Cellular-Automata Diffusion Models 395

K. Bolshakov, A. Borshchev, A. Filippoff, Yu. Karpov, V. Roudakov

Creating and Running Mobile Agents with XJ DOME 410

H. Häfner, W. Schönauer, R. Weiss

Parallelization and Integration of the LU and ILU Algorithm in the LINSOL Program Package 417

C. Hochberger, R. Hoffman, S. Waldschmidt

CDL++ for the Description of Moving Objects in Cellular Automata 428

I.E. Kaporin, I.N. Konshin

Parallel Solution of Large Sparse SPD Linear Systems Based on Overlapping Domain Decomposition 436

Y.-C. Kim, Y.-K. Jun

Restructuring Parallel Programs for On-the-Fly Race Detection 446

D. Petcu

Solving Initial Value Problems with a Multiprocessor Code 452

A. Ruiz-Andino, L. Araujo, F. Sáenz, J. Ruz

Parallel Implementation of Constraint Solving 466

Posters

R. Aversa, B. Di Martino

Experiences on Parallelization of Divide and Conquer Algorithms with Parallel Paradigms 473

C. Cérin

Differentiating Message Passing Interface and Bulk Synchronous Parallel Computation Models 477

T. Farid, D. Zerbino

Realization of Complex Arithmetic on Cellular Automata 479

S.I. Katkov, E.Y. Ruban

Parallel Programming System Based on Super Pascal Language 481

O.V. Klimova

Group-Theoretic Methods for Parallel Computation of Convolution 483

B. McCollum, P. Milligan, P.H. Corr

Knowledge Exploitation for Improved Data Distribution 485

P.J.P. McMullan, P. Milligan, P.H. Corr

An Expert System Approach to Data Distribution and Distribution Analysis 487

P.J. Parsons

Automated Communication Analysis and Code Generation for Non-contiguous Partitions of Two-Dimensional Arrays 489
