

Inhaltsverzeichnis

Mikrooptik für photonische Verbindungstechnik	6
40 GHz bis 100 GHz Bonding und Packaging	36
Solderjet bumping for the assembly of optical fibers	42
From the idea to the prototype, a Demultiplexer for WDM over POF	47
Access Networks for 10 Gbit/s everywhere	60
Modulare Systemkomponenten auf Basis planar-optischer Polymer-Chips	73
Modul-Bauformen und Bauformen von ROSA und TOSA	83
Optical coupling using planar thin glass based waveguide components	101
Optical link for high-speed board-level parallel interconnections	105
<i>Multi channel coupling elements for optical printed circuit boards and optical backplanes</i>	110
Pluggable Connector Technologies for Polymeric Electro-Optical Backplanes	119
