

Contents

Karl Schwarzschild Lecture:

Signals From the Epoch of Cosmological Recombination By Rashid Sunyaev and Jens Chluba (With 22 Figures)	1
---	---

Ludwig Biermann Award Lecture:

Complexity in small-scale dwarf spheroidal galaxies By Andreas Koch (With 8 Figures)	39
---	----

The current status of MOND By R.H. Sanders (With 8 Figures)	71
--	----

Modeling the High- z Universe: Probing Galaxy Formation By Sadeh Khochfar (With 3 Figures)	87
--	----

Evolution of Massive Stars along the Cosmic History By Georges Meynet, Sylvia Ekström, Cyril Georgy, Cristina Chiappini & André Maeder (With 9 Figures)	97
---	----

Cosmic Evolution of Stellar Disc Truncations: $0 \leq z \leq 1$ By John E. Beckman (With 12 Figures)	127
---	-----

Star Formation from Spitzer (Lyman) to Spitzer (Space Telescope) and Beyond By João Alves & Virginia Trimble	141
---	-----

Catastrophism versus Uniformitarianism in the History of Star Formation By Virginia Trimble	147
--	-----

Lyman Spitzer, Jr. and the Physics of Star Formation By Bruce G. Elmegreen (With 4 Figures)	157
--	-----

What cluster gas expulsion can tell us about star formation, cluster environment and galaxy evolution By Geneviève Parmentier (With 5 Figures)	183
--	-----

The high mass end of extragalactic globular clusters By Michael Hilker (With 5 Figures)	199
--	-----

Solar System Formation By Aurélien Crida	215
---	-----

Solar Space Missions: present and future By Sami K. Solanki & Eckart Marsch (With 12 Figures)	229
Women in (European) Astronomy By Meg Urry	249
