Contents

Mathematical Symbols and Constants 1
Notations and symbols 1
Mathematical constants 2

Sets and Propositions 3
Notion of a set 3
Relations between sets 3
Operations with sets 4
Rules for operations with sets 5
Product sets and mappings 6
Propositional calculus 7

Number Systems and Their Arithmetic 9
Natural, integer, rational, and real numbers 9
Calculation with real numbers 10
Absolute values 11
Factorial and binomial coefficients 12
Equations 13
Inequalities 14
Finite sums 15
Powers and roots 15
Logarithms 16
Complex numbers 17

Combinatorial Analysis 19
Permutations 19
Arrangements 19
Combinations 20

Sequences and Series 21
Sequences of numbers 21
Sequences of functions 22
Infinite series 23
Function and power series 25

Bibliografische Informationen
http://d-nb.info/995654530

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

Taylor series ... 27
Fourier series ... 29

Mathematics of Finance ... 31
Simple interest ... 31
Compound interest ... 33
Annuities ... 36
Dynamic annuities ... 38
Amortization calculus ... 39
Price calculus ... 41
Investment analysis ... 42
Depreciations ... 43
Numerical methods for the determination of zeros ... 44

Functions of one Independent Variable ... 45
Basic notions ... 45
Linear functions ... 47
Quadratic functions ... 47
Power functions ... 48
Polynomials ... 49
Fractional rational functions, partial fraction decomposition ... 50
Exponential functions ... 51
Logarithmic functions ... 52
Trigonometric functions ... 53
Inverse trigonometric functions ... 55
Hyperbolic functions ... 56
Area-hyperbolic functions ... 56
Some economic functions ... 57

Functions of one Variable: Differential Calculus ... 61
Limit of a function ... 61
Continuity ... 62
Differentiation ... 63
Economic interpretation of the first derivative ... 66
Rates of change and elasticities ... 68
Mean value theorems ... 70
Higher derivatives and Taylor expansion ... 70
Description of function features by means of derivatives ... 72
Investigation of economic functions, profit maximization ... 75

Functions of one Variable: Integral Calculus ... 79
Indefinite integral ... 79
Definite integral ... 80
Tables of indefinite integrals ... 81
Improper integrals ... 88

Parameter integrals ... 88
Economic applications of integral calculus ... 89

Differential Equations ... 91
First-order differential equations ... 91
Linear differential equations of n-th order ... 92
First-order linear systems with constant coefficients ... 95

Difference Equations ... 97
First-order linear difference equations ... 97
Economic models ... 98
Linear second-order difference equations ... 99
Economic models ... 101
Linear difference equations of n-th order with constant coefficients 102

Differential Calculus for Functions of Several Variables ... 103
Basic notions ... 103
Point sets of the space $\mathbb{R}^n$ ... 103
Limit and continuity ... 104
Differentiation of functions of several variables ... 105
Total differential ... 108
Unconstrained extreme value problems ... 109
Constrained extreme value problems ... 110
Least squares method ... 112
Propagation of errors ... 113
Economic applications ... 114

Linear Algebra ... 115
Vectors ... 115
Equations of straight lines and planes ... 117
Matrices ... 119
Determinants ... 121
Systems of linear equations ... 122
Gaussian elimination ... 123
Cramer's rule ... 125
Exchange method ... 125
Inverse matrix ... 126
Eigenvalue problems for matrices ... 126
Matrix models ... 127

Linear Programming. Transportation Problem ... 129
Normal form of a linear programming problem ... 129
Simplex method ... 130
Dual simplex method ... 132
Generation of an initial simplex table ... 133

Duality 135
Transportation problem 136

Descriptive Statistics 139
Basic notions 139
Univariate data analysis 139
Statistical parameters 140
Bivariate data analysis 141
Ratios 144
Inventory analysis 145
Time series analysis 147

Calculus of Probability 149
Random events and their probabilities 149
Conditional probabilities 151
Random variables and their distributions 153
Discrete distributions 153
Continuous distributions 155
Special continuous distributions 156
Random vectors 159

Inductive Statistics 163
Sample 163
Point estimates 163
Confidence interval estimates 165
Statistical tests 167
Significance tests under normal distribution 168
Rank statistics 170
Analysis of variance (ANOVA) 173
Analysis of covariance 176

Tables 179
Distribution function of the standard normal distribution 179
Quantiles of the standard normal distribution 181
Quantiles of the t-distribution 181
Probability density of the standardized normal distribution 182
Quantiles of the F-distribution 183
Probabilities of the Poisson distribution 187
Quantiles of the χ^2-distribution 189
