

Contents

Foreword.....	v
Preface.....	vii

Part I. Fuzzy Querying of Databases

Value-Based and Representation-Based Querying of Possibilistic Databases <i>Patrick Bosc, Laurence Duval, and Olivier Pivert</i>	3
Flexible Division Operators in Possibility-based Fuzzy Relational Databases <i>Michinori Nakata</i>	29

Part II. Data Mining Based on Fuzzy Sets

Fuzzy Data Mining: Discovery of Fuzzy Generalized Association Rules <i>Guoqing Chen, Qiang Wei, Etienne E. Kerre</i>	45
On Combining Intelligent Querying and Data Mining Using Fuzzy Logic Concepts <i>Janusz Kacprzyk and Slawomir Zadrozny</i>	67

Part III. Geographic Information Systems Dealing with Uncertainty

Uncertainty in Distributed and Interoperable Spatial Information Systems <i>Maria Cobb, Harold Foley, Frederick Petry, Kevin Shaw</i>	85
On Fuzzy Sets and the Management of Uncertainty in an Intelligent Geographic Information System <i>Vincent B. Robinson</i>	109

Conceptual Modeling of Geographic Information System Applications <i>Adnan Yazici and Kemal Akkaya</i>	129
--	-----

Part IV. Fuzzy Database Models: Definition and Implementation

A Generalised Object-Oriented Database Model <i>Guy de Tré, Rita de Caluwe, and Bart Van der Cruyssen</i>	155
---	-----

An Implementation for Fuzzy Deductive Relational Databases <i>Ignacio Blanco, Juan C. Cubero, Olga Pons, and Amparo Vila</i>	183
--	-----

The Fuzzy Object-Oriented Database Management System <i>Gloria Bordogna, Alberto Leporati, Dario Lucarella, and Gabriella Pasi</i> ..	209
---	-----
