I General Principles

1 Introduction	2	4 Characteristics of Abnormal Zones; Limits of Dosage	20
My First Encounter with Reflexotherapy of the Feet (RTF) and its Further Development	2	Signs of Abnormal Zones	20
A History of Reflexotherapy of the Feet	4	Sensation of pain	20
		Irritations of the autonomous nervous system	20
2 A Practical Approach to RTF	6	Palpation	20
Macrosystem of the Human Body As Recognized in Various Microsystems	6	Dosage Limits	20
Similarity in Shape between a Sitting Person and a Foot	7	Signs of the autonomous nervous system	20
Body Zones According to Fitzgerald ...	10	Audible and visible signs	21
Vertical Division into Ten Longitudinal Zones	10	How to Deal with Overreactions during the Treatment	21
Horizontal Division	10		
3 Therapeutic Approach to Feet: Touching—Treating	12	5 Stabilizing Grips	22
Basics	12	General Information	22
Grip Technique	12	Practical Application	22
Basic Thumb Grip	12	Stretching of the Heels	22
Basic Index Finger Grip	14	“Energy Cap”	23
Alternating Strokes	15	Regulating Respiration	24
Tissue Stretching	15	“Palms-to-Soles” Grip	24
Sedating Grip	16	Yin-Yang Grip	25
Rules of Grip Application	17	Summary	27
Practical Comparisons	18		
		6 Indications and Contraindications	28
		Reliable Indications for Beginners	28
		Contraindications	28
		Absolute Contraindications	28
		Relative Contraindications	28

II Practical Part

7 Treatment Preparation	30	General Information	53
Relationship between Patient and Therapist	30	Illustration of the Zones	53
Instructions for the Patient	30	Topography	53
Setting-up a Short Anamnesis	31	Technique	56
Patient Positioning during the Treatment	31	Zones of the Endocrine System	57
General Instructions	31	General Information	57
Variations	32	Illustrations of the Zones	57
Rules for the Therapist	32	Topography	57
Building Up Posture	32	Technique	59
Observing Our Own Breathing	32	Zones of the Respiratory Organs and Heart	62
Healthy Distance between Therapist and Patient	33	General Information	62
 8 Pain: Its Sense and Significance	34	Illustrations of the Zones	62
Various Perceptions of Pain during RTF	34	Topography	62
Pain from the Patient's Point of View	34	Technique	63
Background Thoughts on the Phenomenon of Pain	35	Zones of the Digestive Tract	66
 9 Seven Groups of Zones	42	General Information	66
Introduction	42	Illustration of the Zones	66
Zones of the Head and Neck	42	Topography	66
General Information	42	Technique	69
Illustration of the Zones	42	Zones of the Lymphatic System and Solar Plexus	69
Topography	42	General Information	69
Treatment Technique	43	Illustration of the Zones	70
Zones of the Spine, Thorax, and Shoulder Girdle	48	Topography of the Lymphatic Zones ..	70
General Information	48	Technique	71
Illustration of the Zones	48	 10 The First Treatment as an Assessment	75
Topography	48	The First Perception of the Feet	75
Technique	49	Visual Inspection	75
Zones of the Urinary Tract, Pelvis, and Lower Extremities	53	Inspection of the Skeletal Structure ..	75
		Inspection of the Tissue	77
		Inspection of Skin and Nails	77
		Temperature	79
		Palpation	79
		How to Differentiate Abnormal Zones during the First Assessment	80
		Practical Application of Palpation	80
		Differentiation between Symptomatic and Background Zones	81

Examples of the Same Symptomatic Zone with Different Background Zones	82	Examples of Severe Reactions	100
Summary	82	Negative Reactions	100
How to Work with the Treatment Card	82	Newly Developing Diseases	100
Exceptions with Regard to Performing the First Assessment	87		
Finishing a Treatment	88	15 Right—Left Interchangeability of Zones of the Feet	102
Rest after Treatment	88	General Information	102
Suggestions for Active Involvement of the Patient	88	Practical Aids for Differentiation	102
Summary	90	Summary	103
		16 Examples of Treatment	105
11 Performing the Follow-Up Treatments	91	Zones of the Head and Neck	106
Introductory Measures	91	Patient with Right-Sided Headache ..	106
Summary	91	Patient with Chronic Sinusitis	106
Technique	92	Patients with Sudden Deafness/Acute Hearing Loss, Left	109
Treatment of Abnormal Zones	92	Further Therapeutic Experiences with the Zones of the Head and Neck	111
Points of Emphasis	92	Zones of the Spine, Thorax, and Shoulder Girdle	112
12 Final Treatment	93	Patient with Lumbar Complaints	112
Performing the Final Treatment	93	Patient with Neck and Shoulder Problems on the Right Side	114
Summary	93	Patient with Neuralgia of the Left Fifth Intercostal Space	114
		Further Therapeutic Experiences with the Zones of the Spine and Shoulder Girdle	115
13 Duration of and Intervals between Treatments	94	Zones of the Urinary Tract, Bones and Tissue of the Pelvis and Lower Extremities	119
Duration of the First Assessment and Follow-Up Treatments	94	Patient with Postoperative Urine Retention	119
Intervals between Treatments	94	Nocturnal Enuresis (Bed Wetting) ...	120
Duration of a Treatment Series	94	Further Therapeutic Experiences	121
14 Reactions during Treatment Intervals	95	Zones of the Endocrine System	125
General Information	95	Female Patient with Menstrual Disorders	125
The Most Common Reactions	95	Patient with Benign Prostate Hypertrophy	127
How to Deal with Strong Reactions ...	99	Further Therapeutic Experiences with the Zones of the Endocrine System	127
General Information	99		
Practical Approach	99		

Zones of the Respiratory Organs**and Heart** 131

Patient with Bronchial Asthma 131

Patient with Angina Pectoris 131

Patient with Circulatory Disturbances 134

Further Therapeutic Experiences with
the Respiratory Organs and Heart ... 136**Zones of the Digestive Tract** 137Patient with Irritated Colon, Such as
Ulcerative Colitis or Crohn's Disease 137Patient with Upper Abdominal
Problems 139

Patient with Hemorrhoids 140

Further Therapeutic Experiences with
the Zones of the Digestive Tract 140**Zones of the Lymphatic System** 143Female Patient after Mastectomy,
Left 146

Children with Lymphatic

Disorders 149

Female Patient with Lymphatic
Congestion in the Legs 146Further Therapeutic Experiences
with the Lymphatic System 149

III Additional Information and Treatment of Special Groups of Patients

**17 Deviations in the Location
of Zones** 152

Physiological Deviations 152

Pathological Deviations 152

Summary 152

Reciprocal Effects of Disorders of the

Feet and Organism 153

Effects of Foot Disorders 153

Effects of Disorders of the
Organism 153

Additional Interpretations of

Findings in Feet 154

Summary 154

**18 Careful Treatment of
Symptomatic Zones in
Special Diseases** 155

Summary 156

**19 Treatment in Acute
Situations** 157

General Information 157

Performance of Treatment in
Acute Situations 157Treatment of the Symptomatic Zone
with the Sedating Grip 157Additional Treatment of the
Background Zones 157

Summary 159

**20 Diagnostic Facilities and
Limitations** 161

General Information 161

Application of Differential Diagnosis 161

Additional Information 162

**21 Treatment
Combinations** 164

General Information 164

Approved Combinations 164

In Physiotherapy 164

In Clinics, Rehabilitation Centers,
and Sanatoriums 164

In Medical Practices 165

RTF and Medication 165

Colateral and Contralateral Treatment	165
Unspecific Treatment of Zones of the Extremities	165
Specific Treatment of the Extremities in Situ	166
Practical Rule in Situ	167
Accompanying Measures	169
Zones of the Hands	169
Hands and Feet: a Comparison	169
Therapy of the Hand Zones	169
Treatment Technique of the Hands ..	169
Special Indications	169

22 Self-Treatment and Mechanical Aids	171
Self-Treatment	171
Possibilities	171
Limits	171
Mechanical Aids	172

23 Patient Groups with Special Diseases	173
Chronically Sick and Bed-ridden Patients	173
Patient with Multiple Sclerosis	174
Geriatric Patients	174
Patients with Parkinson's Disease ...	174
Patients with Bechterew's Disease (Ankylosing Spondylitis)	174
Patients with Hemiplegia, Paraplegia, and Tetraplegia	175
Patients with Cancer	176
Summary	176
Care for Terminal Patients	176
Care through Relatives and Friends .	177
Care in Hospitals and Old People's Homes	177
Patients with Sleep Disorders	177
Patients with Anorexia Nervosa and Bulimia Nervosa	178
Patients with Allergies	179

24 Treatment of Scars	182
General Information	182
Performance	183
Overview	183
Choice of Scars for RTF	183
Localization of the Scar Zones	183
Technique	184
Suggestions for Providing Emotional Support	187
Frequency of Scar Treatments	188

25 Pregnancy, Delivery, and Treatment of the Newborn	190
Treatment during Pregnancy	190
Basic Treatment	190
Common Complaints	191
Difficulties before, during, and after Delivery	192
Treatment of the Newborn	194
Summary	195

26 Treatment of Babies and Children	196
General Information	196
The Correct Dosage	196
Approved Indications	197

27 Further Developments in RTF	200
Information on the Advanced Course	200
Information on the Final Course	200

Summary of the Method	204
Authorized RTF Schools	205
Main School	205
Other Schools in Germany	205
Schools in other countries	205
Index	207
