1	Managing Telecommunications Services	1
1.1	Telecommunications Management Systems Overview	1
1.2	The Management Challenge	3
1.3	A Pattern Approach	4
1.4	Telecommunications Management Requirements	5
1.5	OSS Reference Model	6
1.6	OSS Systems Architecture	7
1.7	Summary	8
	References	9
2	Designing Management Solutions	11
2.1	Developing an OSS Systems Architecture	11
2.2	Developing Management Solutions	13
2.3	OSS Reference Architecture	14
2.4	Remote Operations Model	15
2.5	The OSS Implementation Profiles	16
2.6	The Managed-Entity Model	19
2.7	OSS Design Patterns	20
2.7.1	Documenting OSS Design Patterns	21
2.8	The Simple Inventory OSS Application	22
2.9	Summary	22
	References	23
3	OSS Architectural Patterns	25
3.1	Managed-Entity Value Pattern	25
3.2	OSS Façade Pattern	36
3.3	OSS Event Notification Pattern	41
3.4	OSS Iterator Pattern	48
3.5	OSS Factory Pattern	53
3.6	OSS Discovery Pattern	58
3.7	OSS Named-Procedure Pattern	64

3.8	OSS Command–Status Pattern	71
3.9	Summary	73
	References	74
4	OSS Programming Patterns	75
4.1	Managed-Entity Key Pattern	75
4.2	Managed-Entity Life Cycle Pattern	80
4.3	Managed-Entity Update Pattern	86
4.4	Managed-Entity Attribute Population Pattern	91
4.5	Managed-Entity Template Filter Pattern	95
4.6	Managed-Entity Bulk Update Pattern	100
4.7	Last Update-Version-Number Pattern	104
4.8	Final Thoughts	105
	References	105
