

## Contents

### Preface IX

<b>1</b>	<b>Temperature for Living Things</b>	<b>1</b>
1.1	Temperature of Individuals	2
1.2	Responses to Temperature Variation at the Cellular Level	11
1.3	Significance of Intracellular Thermometry	13
	References	14
<b>2</b>	<b>Fluorescent Molecular Thermometers</b>	<b>17</b>
2.1	The Basics of Fluorescence	18
2.2	Responses of Fluorescent Molecular Thermometers	19
2.3	Small Organic Molecules Involving Intersystem Crossing	21
2.4	Small Organic Molecules with a Rotating Substituent Group	25
2.5	Reactive Small Organic Molecules	36
2.6	Viscosity-Sensitive Small Organic Molecules	38
2.7	Other Small Organic Molecules	39
2.8	Organometallic Complexes	41
2.9	Excimers and Exciplexes	49
2.10	Host-guest Interactions	54
2.11	Synthetic Polymers	57
2.12	Nucleic Acids (DNA and RNA)	76
2.13	Peptides	79
2.14	Fluorescent Proteins	79
2.15	Non-covalent Systems Based on Thermo-responsive Self-assembly and an Environment-sensitive Fluorophore	81
2.16	Inorganic Nanomaterials	84
2.17	Hybrid Nanomaterials	95
	References	97

<b>3</b>	<b>Intracellular Thermometry with Fluorescent Molecular Thermometers</b>	<b>109</b>
3.1	Early Attempts for Cellular Thermometry	109
3.2	Introduction of Fluorescent Molecular Thermometers into a Living Cell	112
3.3	Cytotoxicity Assessment	121
3.4	Practice of Intracellular Thermometry with Fluorescent Molecular Thermometers	126
3.5	Intracellular Thermometry with Organelle-targeted Fluorescent Molecular Thermometers	146
3.6	Intracellular Thermometry of Brown Adipocytes	156
3.7	Application of Intracellular Thermometry in Various Biological Fields	163
	References	175
<b>4</b>	<b>Cellular Thermometry Based on Non-fluorometric Principles</b>	<b>183</b>
4.1	Infrared Thermometry	185
4.2	Photoacoustic Thermometry	186
4.3	Raman Thermometry	188
4.4	Use of Transmission Spectroscopy	191
4.5	Thermocouple	193
4.6	Resonant Thermal Sensor	197
4.7	Bimaterial Microcantilever	199
4.8	Thermistor	200
	References	202
<b>5</b>	<b>Reliability Issue in Intracellular Thermometry</b>	<b>205</b>
5.1	Sensitivity and Temperature Resolution	205
5.2	Functional Independency of Fluorescent Molecular Thermometers	208
5.3	Preparation of a Calibration Curve of Fluorescent Molecular Thermometers	212
5.4	Objection to Endogenous Thermogenesis	215
5.5	Possible Artifacts in Near-infrared Luminescent Thermometry and Proposal for Reliable Thermometry	233
	References	236
<b>6</b>	<b>Applications of Intracellular Thermometry</b>	<b>241</b>
6.1	Creation of New Biological Concepts	241
6.2	In vivo Temperature Measurements	242
6.3	Thermal Medicine at a Single-cell Level	250
6.4	Utilization of Nanoheater/Fluorescent Thermometer Hybrids in Biotechnology	258
6.5	Accurate Measurements of Absolute Intracellular Temperature	262
6.6	Simultaneous Monitoring of Intracellular Temperature and the Concentration of a Chemical Species Related to a Temperature Variation Inside a Living Cell	263
6.7	Intracellular Thermometry of Plant Cells	266
	References	268

<b>Appendix 1</b>	<b>Review and Feature Articles on Fluorescent Molecular Thermometers and Intracellular Thermometry in General</b>	<b>273</b>
<b>Appendix 2</b>	<b>Comprehensive Collection of Fluorescent Polymeric Thermometers Based on the Combination of a Thermo-responsive Polymer and an Environment-sensitive Fluorophore</b>	<b>275</b>
<b>Appendix 3</b>	<b>Comprehensive Collection of Fluorescent Nanogel Thermometers Based on the Combination of a Thermo-responsive Polymer and an Environment-sensitive Fluorophore</b>	<b>295</b>
<b>Appendix 4</b>	<b>Comprehensive Collection of Non-covalent Fluorescent Temperature Sensing Systems Based on the Combination of a Thermo-responsive Polymer and an Environment-sensitive Fluorescent Compound</b>	<b>301</b>
<b>Appendix 5</b>	<b>Comprehensive Collection of Fluorescent Polymeric Logic Gates Based on the Combination of a Thermo-responsive Polymer and an Environment-sensitive Fluorophore</b>	<b>307</b>
<b>Appendix 6</b>	<b>Solid Inorganic Nanostructures Showing Temperature-dependent Emission Properties</b>	<b>321</b>
<b>Appendix 7</b>	<b>Tips for Intracellular Thermometry with Fluorescent Polymeric Thermometers Developed in the Author's Laboratory</b>	<b>323</b>
<b>Index</b>		<b>325</b>
