Introduction

Welcome to the book "Shrova Mall: A-to-Z e-commerce full-stack application". In this book, I explain how you can create a full-stack e-commerce application using Angular and NestJS.

The application provides payment and shipping functionalities by integrating Stripe for payments and Shippo for shipping.

To begin, I will show you the application we are going to build and then start by creating the database. Next, I will explain the backend and finally the frontend application. By the end of this book, you will be able to create your online e-commerce store and cover all possible scenarios.

Let's get started.

Screenshots

I will start by showing some screenshots of the application to understand what we are about to build.

The homepage

KUDCU Stand Food
Mixer; 6.5 Qt 660W

KitchenAid S Ultra Power
Speed Hand Mixer -
KHMS12, Aqua Sky

CHEFMAN
Multifunctional Digital
Air Fryer

Nuwave Brio 15.5Qt Air
Fryer Rotisserie Oven

Emeril Lagasse (4-
00675-02) 26 QT

Nuwave Bravo Air Fryer
Toaster Smart Oven

Shintechi 74"
Convertible Sectional
Sofa Couch

The store settings page

The screenshot displays the 'Store Name' and 'Store Address' sections of a settings page for 'Shrova Mall'. The top navigation bar includes the store logo, name, a search icon, a shopping cart icon with a '7' badge, and a total value of '\$1,208.00'. The 'Store Name' section has a single text input field containing 'Shrova Mall'. The 'Store Address' section contains five text input fields: 'Street1' (215 Clayton St.), 'City' (San Francisco), 'State' (CA), 'Zip' (94117), and 'Country' (US). A purple 'Save' button is located at the bottom left of the form area.
