

CONTENTS

Preface	iii
Authors and conference participants	v
Ross Allen Beaumont (In Memoriam) <i>J. D. Reid and W. J. Wickless</i>	1
Modular group algebras and simply presented groups <i>P. Hill</i>	7
Abelian automorphism groups of countable rank <i>W. May</i>	23
Transitivity and full transitivity over subgroups of abelian p -groups <i>G. Hennecke</i>	43
Subgroups of p^5 -bounded groups <i>F. Richman and E. A. Walker</i>	55
Groups acting on modules <i>P. Schultz</i>	75
Some mixed abelian groups as modules over the ring of pseudo-rational numbers <i>A. A. Fomin</i>	87
The Baer-Kaplansky theorem for direct sums of self-small mixed groups <i>W. J. Wickless</i>	101
Finite rank Butler groups with small typesets <i>D. M. Arnold and M. Dugas</i>	107
Normal forms of matrices with applications to almost completely decomposable groups <i>O. Mutzbauer</i>	121
Admissible matrices as base changes of $B^{(1)}$ -groups: a realizing algorithm <i>C. De Vivo and C. Metelli</i>	135
Butler modules over 1-dimensional Noetherian domains <i>H. P. Goeters</i>	149
Completely decomposable summands of almost completely decomposable groups <i>A. Mader and L. G. Nongxa</i>	167
Some matrix rings associated with ACD groups <i>J. D. Reid</i>	191

Stacked bases for a pair of homogeneous completely decomposable groups with bounded quotient <i>M. A. Ould-Beddi and L. Strüngmann</i>	199
Separability conditions for vector R-modules <i>U. Albrecht, A. Giovanitti and H. P. Goeters</i>	211
Almost disjoint pure subgroups of the Baer-Specker group <i>O. Kolman and S. Shelah</i>	225
Abelian groups mapping onto their endomorphism rings <i>S. Feigelstock, J. Hausen and R. Raphael</i>	231
Purity and Reid's theorem <i>A. Blass and J. Irwin</i>	241
Basic subgroups and a freeness criterion for torsion-free abelian groups <i>A. Blass and J. Irwin</i>	247
Absolutely rigid systems and absolutely indecomposable groups <i>P. C. Eklof and S. Shelah</i>	257
Around nonclassifiability for countable torsion free abelian groups <i>G. Hjorth</i>	269
On the compact-open topology of $\text{Ext}(\mathbf{C}, \mathbf{A})$ <i>C. Leopold</i>	293
Direct decompositions of LCA groups <i>P. Loth</i>	301
Realizing automorphism groups of metabelian groups <i>R. Göbel and A. T. Paras</i>	309
On the class semigroups of Prüfer domains <i>L. Fuchs</i>	319
Uniform modules, Γ -invariants, and Ziegler spectra of regular rings <i>J. Trlifaj</i>	327
Locally simple objects <i>I. Herzog</i>	341
On purely extending modules <i>J. Clark</i>	353
The number of submodules <i>A. Ecker</i>	359
Index	369
