

Table of Contents

1. Invited Talks

SAT Modulo Theories: Enhancing SAT with Special-Purpose Algorithms	1
<i>Robert Nieuwenhuis</i>	
Symbolic Techniques in Propositional Satisfiability Solving	2
<i>Moshe Y. Vardi</i>	

2. Applications of SAT

Efficiently Calculating Evolutionary Tree Measures Using SAT	4
<i>María Luisa Bonet and Katherine St. John</i>	
Finding Lean Induced Cycles in Binary Hypercubes	18
<i>Yury Chebiryak, Thomas Wahl, Daniel Kroening, and Leopold Haller</i>	
Finding Efficient Circuits Using SAT-Solvers	32
<i>Arist Kojevnikov, Alexander S. Kulikov, and Grigory Yaroslavtsev</i>	
Encoding Treewidth into SAT	45
<i>Marko Samer and Helmut Veith</i>	

3. Complexity Theory

The Complexity of Reasoning for Fragments of Default Logic	51
<i>Olaf Beyersdorff, Arne Meier, Michael Thomas, and Heribert Vollmer</i>	
Does Advice Help to Prove Propositional Tautologies?	65
<i>Olaf Beyersdorff and Sebastian Müller</i>	

4. Structures for SAT

Backdoors in the Context of Learning	73
<i>Bistra Dilkina, Carla P. Gomes, and Ashish Sabharwal</i>	
Solving SAT for CNF Formulas with a One-Sided Restriction on Variable Occurrences	80
<i>Daniel Johannsen, Igor Razgon, and Magnus Wahlström</i>	
On Some Aspects of Mixed Horn Formulas	86
<i>Stefan Porschen, Tatjana Schmidt, and Ewald Speckenmeyer</i>	

Variable Influences in Conjunctive Normal Forms	101
<i>Patrick Traxler</i>	

5. Resolution and SAT

Clause-Learning Algorithms with Many Restarts and Bounded-Width Resolution	114
<i>Albert Atserias, Johannes Klaus Fichte, and Marc Thurley</i>	
An Exponential Lower Bound for Width-Restricted Clause Learning....	128
<i>Jan Johannsen</i>	
Improved Conflict-Clause Minimization Leads to Improved Propositional Proof Traces	141
<i>Allen Van Gelder</i>	
Boundary Points and Resolution	147
<i>Eugene Goldberg</i>	

6. Translations to CNF

Sequential Encodings from Max-CSP into Partial Max-SAT	161
<i>Josep Argelich, Alba Cabiscol, Inês Lynce, and Felip Manyà</i>	
Cardinality Networks and Their Applications	167
<i>Roberto Asín, Robert Nieuwenhuis, Albert Oliveras, and Enric Rodríguez-Carbonell</i>	
New Encodings of Pseudo-Boolean Constraints into CNF	181
<i>Olivier Bailleux, Yacine Bouffkhad, and Olivier Roussel</i>	
Efficient Term-ITE Conversion for Satisfiability Modulo Theories	195
<i>Hyondeuk Kim, Fabio Somenzi, and HoonSang Jin</i>	

7. Techniques for Conflict-Driven SAT Solvers

On-the-Fly Clause Improvement	209
<i>Hyojung Han and Fabio Somenzi</i>	
Dynamic Symmetry Breaking by Simulating Zykov Contraction	223
<i>Bas Schaafsma, Marijn J.H. Heule, and Hans van Maaren</i>	
Minimizing Learned Clauses	237
<i>Niklas Sörensson and Armin Biere</i>	
Extending SAT Solvers to Cryptographic Problems	244
<i>Mate Soos, Karsten Nohl, and Claude Castelluccia</i>	

8. Solving SAT by Local Search

Improving Variable Selection Process in Stochastic Local Search for Propositional Satisfiability	258
<i>Anton Belov and Zbigniew Stachniak</i>	
A Theoretical Analysis of Search in GSAT	265
<i>Evgeny S. Skvortsov</i>	
The Parameterized Complexity of k -Flip Local Search for SAT and MAX SAT	276
<i>Stefan Szeider</i>	

9. Hybrid SAT Solvers

A Novel Approach to Combine a SLS- and a DPLL-Solver for the Satisfiability Problem	284
<i>Adrian Balint, Michael Henn, and Oliver Gableske</i>	
Building a Hybrid SAT Solver via Conflict-Driven, Look-Ahead and XOR Reasoning Techniques	298
<i>Jingchao Chen</i>	

10. Automatic Adaption of SAT Solvers

Restart Strategy Selection Using Machine Learning Techniques	312
<i>Shai Haim and Toby Walsh</i>	
Instance-Based Selection of Policies for SAT Solvers	326
<i>Mladen Nikolić, Filip Marić, and Predrag Janičić</i>	
Width-Based Restart Policies for Clause-Learning Satisfiability Solvers	341
<i>Knot Pipatsrisawat and Adnan Darwiche</i>	
Problem-Sensitive Restart Heuristics for the DPLL Procedure	356
<i>Carsten Sinz and Markus Iser</i>	

11. Stochastic Approaches to SAT Solving

(1,2)-QSAT: A Good Candidate for Understanding Phase Transitions Mechanisms	363
<i>Nadia Creignou, Hervé Daudé, Uwe Egly, and Raphaël Rossignol</i>	
VARSAT: Integrating Novel Probabilistic Inference Techniques with DPLL Search	377
<i>Eric I. Hsu and Sheila A. McIlraith</i>	

12. QBFs and Their Representations

Resolution and Expressiveness of Subclasses of Quantified Boolean Formulas and Circuits	391
<i>Hans Kleine Büning, Xishun Zhao, and Uwe Bubeck</i>	
A Compact Representation for Syntactic Dependencies in QBFs	398
<i>Florian Lonsing and Armin Biere</i>	
Beyond CNF: A Circuit-Based QBF Solver	412
<i>Alexandra Goultiaeva, Vicki Iverson, and Fahiem Bacchus</i>	

13. Optimisation Algorithms

Solving (Weighted) Partial MaxSAT through Satisfiability Testing	427
<i>Carlos Ansótegui, María Luisa Bonet, and Jordi Levy</i>	
Nonlinear Pseudo-Boolean Optimization: Relaxation or Propagation? ...	441
<i>Timo Berthold, Stefan Heinz, and Marc E. Pfetsch</i>	
Relaxed DPLL Search for MaxSAT	447
<i>Lukas Kroc, Ashish Sabharwal, and Bart Selman</i>	
Branch and Bound for Boolean Optimization and the Generation of Optimality Certificates	453
<i>Javier Larrosa, Robert Nieuwenhuis, Albert Oliveras, and Enric Rodríguez-Carbonell</i>	
Exploiting Cycle Structures in Max-SAT	467
<i>Chu Min Li, Felip Manyà, Nouredine Mohamedou, and Jordi Planes</i>	
Generalizing Core-Guided Max-SAT	481
<i>Mark H. Liffiton and Karem A. Sakallah</i>	
Algorithms for Weighted Boolean Optimization	495
<i>Vasco Manquinho, Joao Marques-Silva, and Jordi Planes</i>	

14. Distributed and Parallel Solving

PaQuBE: Distributed QBF Solving with Advanced Knowledge Sharing	509
<i>Matthew Lewis, Paolo Marin, Tobias Schubert, Massimo Narizzano, Bernd Becker, and Enrico Giunchiglia</i>	
c-sat: A Parallel SAT Solver for Clusters	524
<i>Kei Ohmura and Kazunori Ueda</i>
